ance in such terms as we thought it merited. We would again take occasion to observe that the production in question, is one of the ablest and best essays on the subject, which we have ever had the good fortune to read. We like the style of the letter; it is plain, perspicuous and concise, and we like still more, the information it communicates, which is valuable, accurate and comprehensive. And the enlarged, enlightened, and solid views of the writer, are in our estimation among the most striking characteristics of the letter. We speak not in the ordinary spirit of newspaper commendation; we say in honest sincerity, that in our humble opinion, the writer has entitled himself to the high estimation and respect of every man capable of understanding and appreciating the true interest and prosperity of our native State.

Arrival of European Steam Ships at New York.—The British Steam Packets SIRIUS and GREAT WESTERN, arrived at the city of New York during the present week, after extraordinary passages. The Sirius made the voyage across the Atlantic in 17 days, and the Great Western in 15 days. The Sirius is a vessel of 709 tons, with engines of 320 horse power, and has been fitted up in a most splendid manner. We publish in another column, some further particulars respecting her. The Great Western is the largest vessel propelled by steam, which has yet made her appearance on the waters of Europe, her registered admeasurement being 1604 tons; length 234 feet; breadth from out to out of the paddle boxes, 58 feet; and with engines and machinery of 450 horse power. Our readers may form a more distinct idea of her by imagining a large line of battle ship without armament. What is still more extraordinary she is a fast sailer and steers well. In addition to these vessels, there is another great steam ship, larger than either, the "British Queen," of 1,890 tons, which was to be launched soon after the sailing of the Sirius, and belonging to the same owners, the British and American Steam Navigation Company. The "British Queen" is said to be a master-piece of naval architecture of most beautiful model and extraordinary strength and solidity. The importance of these arrivals has been manifested by a suitable reception on the part of the New York corporation. These facts go to show that we have reached a new era in Atlantic Navigation.

Last Wednesday the water was let into the New Basin above Messrs. Parvin & Clemens' Steam Grist Mill, excavated during the past winter, and leading up to the mines of our enterprising townsman, Mr. Samuel Lewis, who can now *load his coal directly from his mine into the boat, which is to carry it to the consumer.* The capacity of the Basin is sufficient for several lengths of boats, and wide enough, at its head, for the longest boat used on the canal to turn round; and what is not a little remarkable, but quite a coincidence in the growing importance of the grand staples of our matchless Pennsylvania, the first boat loaded after the water was let in, and commenced the same afternoon, is destined for the Iron Works of Mr. Kunze, at Manayunk, for the purpose of smelting the Iron with our Anthracite Coal!! Success to the invaluable enterprise!!! "*Dam* our Rivers--*Sink* our Mines—and *Blast* our Furnaces."

Appointment by the Court, and Commissioners of Schuylkill County.—Abraham Boughner, Esq. to be a Commissioner of Schuylkill County, in the place of Adam Focht, resigned.

The List of Delegates to the Young Men's State Convention, has been crowded out of this paper. It will appear in Wednesday's paper.

Porter at Home.—We have been informed by a gentleman that Joseph Ritner will get from 8 to 1200 majority in Huntingdon county. In this county David R. Porter, the Loco Foco candidate for Governor resides.

Gotham Parks.—The late defeated candidate for Governor of Maine has been appointed Marshall for that State by President Van Buren. It will be recollected by our readers, that after the defeat of Mr. Parks, two of his political papers declared that his defeat was to be attributed to the fact that he was known to be a *drunkard.*—This, however, appears to be no objection with Martin Van Buren.

THE WHY AND BECAUSE.

At a meeting of the citizens of Huntingdon, in Huntingdon county, the residence of David R. Porter, the following resolution was adopted, which is short and significant:

Resolved, That we cannot support the election of David R. Porter for Governor, for the following reason:

Because WE KNOW HIM!

Locofocoism & Christianity.—It appears that George A. Chapman, the person who lately gave the following toast in Boston, is the partner of *Abner Kneeland*, who has gained notoriety in Boston on account of his infidelity.

"*Christianity and the banks—tottering on their last legs—may their downfal be speedy.*"

It is stated that the late arrivals at New York from Europe bring about four Millions of Dollars in Specie. The English seem to understand *our* interests and their own, much better than our own Government. While *our* Government is warring against credit, the English are sending out specie to establish credit in this country, and thereby not only enabling us to pay off the foreign debt, but also to purchase a much greater supply of their manufactures. This undoubtedly will be the effect of the great importation of specie to this country.

Mr. BANNAN—The following extract from a letter of the 21st inst. at Philadelphia, seem to me so interesting to the great bulk of your readers, that I deem it proper to give them to you for your Journal.—"This morning I went at the request of a friend, with two others, to the Mutual Insurance Office, to see some Iron, Coal, Ore, Slag, &c. &c. from Crane's Works, in Wales, brought out by a Welsh miner of the name of Richard Jones, well known to Burd Patterson and others—the experiment is complete; and I understand it was the intention of Mr. Crane, if he had his patent, to send out a hand immediately, to this country, to erect furnaces in Scuylkill county; but Mr. Geissenheinner's *Caveat* prevents him doing so, and the coal interest of our country suffers by it. Mr Crane is said to be a bachelor and would be satisfied to hand his name down to posterity in this way, intending, after satisfying the public of his being the discoverer of the matter, to make it public to all the world. Jones will be in Pottsville in the course of the coming week. The ore is in small veins of from two to six inches, and I understand that 2700 pounds of Anthracite Coal make one ton of Iron. Whilst in the Office, I was introduced to a Mr. Garrett, who is making Locomotive Engines for the Columbia Rail Road.—He says they now have four Engines running from the Plane at the Schuylkill to Columbia; that the result of their experiment is as follows:—One Engine uses *half a ton* of Anthracite, another uses *two thirds of a ton*, and another *three fourths of a ton*, and with a train of several burthen cars attached to the passenger car of one ton. The Engines using wood, consume *three cords each trip*—making a saving by the use of Anthracite Coal of *two thirds* in the cost of fuel!"

Yours &c. A. S. N.

April 23d, 1838.

FROM WASHINGTON.

April 23, 1838.

UNITED STATES SENATE.

After some unimportant business the Anti-Bank Bill came up, when Mr. CLAY said, we have nothing to do with the Bank of Pennsylvania called the United States Bank. We have to deplore that we have not a United States Bank. A lack of such an institution has surrounded the country with embarrassments, with misfortunes upon every side and upon every subject.

As for Nicholas Biddle, said Mr. Clay, his merchandise, his non-resumption, his cotton bags &c., we have nothing to do with them—we want nothing to do with them, so far as I know the opinions of my friends and my own mind.—What is he to us, or we to him, that he or his Bank should be continually dragged before the Senate? I had hoped, said Mr. Clay, that an attempt to aid resumption which was made in the other House would have been better treated there by the friends of the Administration than it was treated. That resolution voted down by the friends of the Administration showed that they were opposed to resumption.

I think, said Mr. Clay, the Bill before the Senate unnecessary. Among the irredeemable paper currency now afloat through the country, there was none so good as this,—none preferred to this,—it was good from one end of the Union to the other.

In the town of the honorable Senator from Tennessee, (Mr. Grundy) who had most strongly advocated the Bill, the notes of this Bank were commanding a premium of 18 and 19 per cent.—precisely the same premium demanded in Nashville market for specie itself. Throughout the South and South West it bears a great premium.

Mr. Clay said there was no occasion for legislation at this moment. Now was the time for encouragement—the time for kindness—for conciliation—not for legislation or exaction and punishment. No Senator doubted but that the notes of the old Bank would be redeemed and speedily redeemed. There was no Senator who did not prefer the notes of this Bank to the notes of any other Institution.

I do think, said Mr. Clay, the Bill involves the most enormous stretch of power I ever witnessed, or that ever has been attempted. Mr. Clay here gave his opinions upon the Constitutional question.

Following this part of the subject, he said the Bill contained the most odious and infamous power which could be conceived of. No Federal party or any portion of the Federal party had ever contended for such power. As for Mr. Biddle, said Mr. Clay, addressing himself to Mr. B. "hang him if you please." He belongs to Pennsylvania. We have nothing to do with Nick Biddle or Nick Biddle's Bank. Pennsylvania made it, and Pennsylvania was responsible for it; and if, said Mr. Clay, the Senator from Pennsylvania thinks proper to stand up here and abuse him, he should not quarrel with him for that.—He thought, however, it would appear better if Mr. Buchanan would stand forward in defence of his own constituents. Speaking of the Sub-Treasury Bill, and one of Mr. Buchanan's prophecies, Mr. Clay said, when I can see that experiment buried, as I hope in God it will be, in the bowels of the earth, then I will have some confidence in his prophecies—not till then.

Mr. BUCHANAN made a brief rejoiner to Mr. Clay, after which Mr. MORRIS demanded the yeas and nays. Being ordered, they were as follows:

Yeas, Messrs. Allen, Benton, Brown, Buchanan, Calhoun, Clay, of Ala. Cuthbert, Fulton, Grundy, Hubbard, Linn, Lumpkin, Lyon, Morris, Niles, Norvell, Pierce, Rives, Roane, Robinson, Ruggles, Smith of Conn., Tipton, Trotter, Williams, Wright, Young—27.

Nays—Messrs. Clay of Ky., Clayton, Crittenden, Davis, King, Merrick, Nicholas, Prentiss Preston, Smith of Ind., Spence, Swift, White 13.

In the debate in the Senate on the anti-duelling bill, it was said to be designed for the protection of the members of Congress. The good humored Mr. F. Grundy hereupon observed that he then had very little interest in the bill, as the good people of Tennessee had decreed him an early retiracy to the shades of private life. The Rev. Dr. Niles, who had just received news from the Connecticut election, remarked that he, too, like his worthy friend from Tennessee, felt very little personal interest in the bill, as his days were numbered.—He saw the hand writing on the wall, and he resigned himself to his fate.—*Alex. Gaz*

Fanny Wright Darpsmont lectures every Sunday evening, at the circus in Cincinnati.—Tickets twelve and a half cents.

ARRIVAL OF THE GREAT STEAMER SIRIUS FROM CORK.

Seven days later from London, and six days later from Liverpool.

The Sirius has performed her voyage without any accident, save a slight one which befel her on coming in the Hook, where she grounded, but will no doubt get off at high water. Since her departure from Cork, she has used only fresh water in her boilers, having on board Mr. Hall's condensing apparatus.

We have to thank her commander for London Journals to the 30th March, Liverpool 2nd and 3d instants. The late hour at which we received them, compel us to give a scant notice of their contents.

The further proceedings in the British Parliament have no interest here.

Lord Dalhousie, formerly Governor General of Canada, is dead.

The differences between France and Hayti have been adjusted by two treaties, which are officially published.

The differences between Holland and Belgium now seem to be as far from adjustment as ever.

LONDON, MARCH 28.

The character of the money market, as regards the value of money, either on the stock exchange or for commercial purposes, has not altered, and money continues to find employment at full rates of interest. Some large policies were opened at Lloyd's yesterday, upon bullion about to be shipped to America at 1 4 per cent.; but as this was merely the result of prior opperations, it created no particular interest.

The arrival of the great steamer SIRIUS has furnished us with English news to a very late date. We have also Cork papers to the 3d instant. They contain no intelligence of importance; the whole columns, or nearly the whole, being reports of trials in law courts, of cases arising out of the unhappy political differences of the country, in which it would appear that the clergy and laity take part with a peculiar relish.

We copy from the Cork Reporter of the 2nd instant the subjoined notice of the Sirius:

DEPARTURE OF THE SIRIUS STEAM SHIP FOR NEW YORK.

Of this magnificent vessel, which is now at Passage, and will take her departure for New York to-morrow morning we extract the following account of a trial between her and the *Great Western*, on Wednesday last from the *London Times* of Saturday:—

"The experiment of a steam voyage from England to America has commenced. Wednesday afternoon, the St. George Steam Packet Company's powerful Steam Ship Sirius, Lieutenant Roberts, R. N., commander, sailed from off East lane Stairs for New York, proceeding in the first instance for Cork, from whence she will start for her final destination on Monday next. The Sirius is a vessel of 700 tons, with engines of 320 horse power; and has been fitted up in a most splendid manner. It is expected that she will complete the voyage in fifteen days, and so confident are her owners of this, that they have already announced her setting out from New York for the return voyage on the 1st of May—She carries out from London 22 passengers, but this number will be considerably augmented at Cork. She does not take out any goods, being intended for a passenger ship only. On going down the river, the Sirius came up with the Great Western, with a respectable pleasure party on board, and a trial of speed was the consequence. When the Sirius had got abreast of Gravesend, she was upwards of a mile a-head of her rival. The Sirius made the distance from Greenwich to Gravesend, against a strong tide, in one hour and 56 minutes. The banks of the river were thronged with spectators, and both ships had their colors hoisted. Soon after the departure of the Sirius, the American line of packet ship Quebec, Captain Herbert, for New York, came down the river in tow of a steam-packet. She carries out no fewer than 171 emigrants, viz—cabin 17, between decks, 32, and steerage 122. The latter were chiefly agricultural labourers with their families. Some parties were bold enough to lay even wagers that the Quebec will arrive before the Sirius at New York.

Important to Pensioners.—Pensioners who neglect to call for their pensions within eight months after they become due, will *forfeit them.*

Pretty Economy.—A bill is before Congress, appropriating $150,000, to pay for pulling down the walls of the new Treasury building, just put up, which are found to be too insecure and made to answer the purpose; there are two horses, one for putting up and one for pulling down an amount for nearly half a million dollars.

Farmers and Gardeners do your duty—The turnip Fly.—A writer in the Leeds Journal, England, May 10th 1834, after trying various methods to prevent the ravages of this insect, ascertained by a lens on every seed of the Turnip a number of white plattish substance. 2, 3, 4, or 5 of these substances were on one seed, but some seed without any on them. I made a pretty strong brine, and soaked the seeds in it for 24 hours, then dried them thoroughly and sowed them. When the plants appeared not a single fly infested them. I tried this course again and again only *three hours* and no insects appeared, and the seed came up well.

I now practice this with the seed of Cabbage, Turnip, and all the cured form plants with satisfactory success. Radish seed may thus be secured.

The State of New York has made a praiseworthy disposition of the income arising from her share of the public deposites received under the act of Congress. A law passed at the recent session of the Legislature appropriates $110,000 of the revenue to the support of Common Schools. The sum of $45,000 is likewise appropriated annually to the several school districts in the State for the purchase of Libraries. After three years, however, they may apply it either to the purchase of Libraries or the support of teachers, as they may elect. The bill also appropriates $6000 annually to Geneva College, $6000 to the New York University, (first payment to be made 1st August next,) $3000 to Hamilton College, $28,000 to the Literary Fund. The residue of the income is to be added annually to the capital of the common school fund.

The New York Gazette of yesterday says.

"It is rumored that we are to have a Bank with a capital of $20,000,000, under the General Bank Law organized in this city, at the head of which stands a prominent house in Wall street.—Mr. Biddle, too, is to start a new Bank in this city, under the Banking Law, and to commence operations in about a fortnight."

Breach of marriage Promise.—Miss Abigal Ann McGary, of Schoharie Co. has recovered at the Circuit Court just closed at Cattskill, $1300 of Mr. Lawrence Brandon, of Green Co. for a breach of marriage promise. The parties are highly respectable, but the evidence, according to the Cattskill Messenger, was much of it too obscene for publication. This is one way of subserving morals.

POSTSCRIPT.

VICTORY!!

Good News from Baltimore.

We have just received the Baltimore *American* of this morning, from which we learn that Mr. KENNEDY, the Whig candidate, has been elected by a grand and conclusive majority of EIGHT HUNDRED AND SEVENTY-TWO VOTES!

This is glory enough for *one* election. It shows that the march of Whig Reform is ONWARD, it rejoices like the outgoings of the morning; and it will know neither stop nor pause, until the whole land is illumined.

The following extract from the paper just mentioned, shows the aggregate returns. Every thing was done by the Locofocos that imported votes. Washington money, and other inducements could accomplish—but it wouldn't do.

RECAPITULATION.

	KENNEDY.	MARRIOTT.
Baltimore City,	5957	5337.
Ann Arundel,	1052	820
Annapolis,	20	
Total.	7029	6157

Mr. Kennedy's majority in the entire district, 872 votes.

In the regular Congressional election, held in July, 1837, the average majority for the Van Buren ticket in the city of *Baltimore* was 283 votes; and the average majority for the same ticket in the whole district, was 251 votes.

Anti-Van Buren, Anti-Porter, Anti-Sub-Treasury System Ticket for Borough Officers:

Chief Burgess
Jacob Reed.
Council
Daniel Klapp, 2 years.
George C. Wynkoop,
Samuel Lewis,
Benjamin T. Taylor.
High Constable
Daniel Hill.
Town Clerk

Public Notice.

AS it appears, that because Mr. Crane obtained no patent for smelting Iron Ore with Anthracite Coal in this country, many suppose that they are now at liberty to adopt the method of smelting Iron ore with Anthracite by the use of a heated air blast; although I gave notice last year that I had a patent for smelting Iron ore with Anthracite Coal, both by the use of a cold atmospheric and a heated air blast, I would now inform the public again, that on the 14th of January, 1838, I received a letter from the Commissioner of Patents at Washington, stating: "Sir, upon examining the case of Mr. Crane's application for a patent for smelting Iron by means of anthracite, I have viewed his claim as interfering with your patent of Dec. 1833, and have given notice to his attorney of this decision."—Every attempt to smelt Iron ore with anthracite by the use of a heated air blast, is an infringement upon my patent, against which I caution and warn all men; as I shall prosecute every one infringing upon my rights, according to law.—And I further offer to dispose of patent rights for the erecting of furnaces, according to my patent, upon very moderate terms.

FREDERICK W. GEISSENHAINER.
