The effects of these pills are not only perceived in an increase of appetite and general strength, but in a restoration of the body to that universal vigor in all its functions, which indicates the return to perfectly sound health.—The face, and general complexion, speak volumes in their favor, and thousands of females can testify how much they have contributed to their comfort, their complexion, and their strength, when warm other remedy had groved worse than unea every other remedy had proved worse than a ess. Bit be it disdiretly understood that these medicines are not offered instead of these natural organs of the body which other medicines dispense with, in a very surmary manner. They are founded upon medical knowledge, and not quackery, and do not take all the 1 dispenses of the human blood under the prefence of ourifying it. In proof of which difference of effect, let the faces and forms of patients bear testificany. They constitute a useful, effectual, and generally applicable class of medicines for every family, and being both tonic and apperent, and of the best preparations known, no person or family should be preparations known, no person or family should be without them. A WORD TO PARENTS.

How often is youth cut down when least expected by the consumption, and followed to their graves by parents who are in a measure the cause of their premature death, in neglicting to remedy colds when existing in childhood, looking upon them as trifling affections, and not attracting their notice until the destroyer has commenced its work and made, sure of its victum. This is not a fanciful representation, for daily numerous instances occur which prove the fact.

In manhood coldsterminate in the same way, but, do not progress so rapidly as in youth; they should however, in both youth and manhood be early intended to, and not regarded as trifling affections, for it is a delusive idea that has no doubt shortened the love of thousands.
