Davy's Safety Lamps,

TES Compound Extractor

The celebrated' substitute for CALOMEL.

THE proprietors of this article, having devoted nearly seven years, and expended a large amount of money, in experimenting upon the various species of the Tomato, (Solahum Lycopercicum) have at last succeeded in obtaining from that vegetable a principle which as a medicine possesses all the beneficial properties of calomed, and yet incipable of producing the deterious effects sometimes resulting from the use of that drug. If his principle (hepatine) is a mild and efficient cathartic, and, as compounded, also acts as a tonic district, and disaphortic. (See directions accompanying the medicine)

Its particular action and use. Its action upon the system is very general, no part escaping its influence; it is, however, upon the secretories and exerctories, that its great power is particularly manifested; from this it will be seen to have a directification of the beliarly organs, and to be particularly adapted to the treatment of bilious fevers and other diseases where a torpidity or conjection of the liver and portal crede prevail; hence the great success that has attended its administration in liver affections, dyspepsiand diseases of the stomach and boxels generally. Being diffusible in its operation, it produces a free circular and diseases of the stomach and boucks generally. Boting diffusible in its operation, it produces a free circular
tion in the vessels on the surface of the body, accompanied by a gendle perspiration. It does not exhaust,
like drastic purges; still its action is more universal,
and it may be often repeated, not merely with safety,
but with great benefit; this becomes indispensably ne
cessary in cases of long standing, for in them intense
temporary impressions made by strong medicines seldom, if ever, do good, and tend to injure the stamina of
the constitution.

Its claims The proprietors do not claim for it universality ithat it will cure all diseases; nor, on its introduction into a family, should the physician be dismissed; no, they would advise all to have a family physician, and the more experienced and scientific the better: they do claim, however, that a timely resort to this medicine claim, however, that a timety resort to this medicine may in a great many instances save the expense and trouble of calling the aid of such physician, it being capable of producing the effect desired in the primary stages of a majority of diseases incident to this country, lin tiany long standing, or chronic diseases, such as ill. conditioned ulcers, and the various diseases of the skin, it may be taken by persons of common judgement withdical advice.

Persons advised to give it a trial. Persons advised to give it a trial.

Not only are families, advised to adopt it as a family medicine, but those who are labouring under disease that calomed has failed to remove; those who have seen and felt the deleterious effects of, as well as those who estieum calomed to be the best of all medicines; and those tod, who have tried "every thing," (from the boasted cure all nostrians purporting to have emanated from great foreign colleges or societies, down to humble quack medicine of Dr. A. B. C. to Z) all are invited to try this simple America's article. It is not the intention of the simple Americals article. It is not the intention of the proprietors to sustain this medicine by certificates and puffing, but by way of introduction in those places whore it has not been known, it is deemed proper to show what is said of it where it has been known the past year. The following editorial articles and extracts from leters by physicians, and others are given for that purpose.

The following is an editorial from the Cincinnati Telegraph, edited by Bishop Purcell:

*Extract of Tomato, a substitute for Calomel."—The injurious and frequently destructive consequences that have often resulted to the human frame from the necessity of having recourse to a drug of so powerful, and at the same time, of so deleterious a nature, as calomed. at the same time, of so deleterious a nature, as calomed, induce us to welcome the announcement of a safe, and what is confidently stated to be, in most cases an effectual substitute for it, which, while it possesses, if not all, at least a great portion of its good qualities, is free from its most objectionable ones. Every discovery in the virtues of the vegetable kingdom must have its infancy, and its period of probation. We are inclined to think this will stand the test of scrutiny, and be a most desirable acquisition to the world, and particularly to the people of this country. We have heard it highly shoken of, and we believe the result of every investigation of its usefulness, yet made, has been favorable.

The proprietors of the Compound Extract of Tomato nake no secret, of its composition, but reveal it to every nedidal man who desires to know it."

Dr. Milks:

Dear Sir.— * * * * * * I have used your Compound

Extract of Tomato during the past summer and fall, and

have no hesitation in believing it has saved me several have no hesitation in believing it has saved me several medical bills. Four of my family during that period were indisposed, and exhibited the usual symptoms of a bilious attack. They were in every instance relieved by the use of your Tanato pills. I consider them a valuable medicine. They are perfectly safe, and I believe as efficacious as calomel in correcting a bilious habit—I have used them myself with great benefit.

I have BRANKETT.

The following is from Robert Punchon, Esq., who has made the science of medicine his particular study.

Cincumpatiti, February, 1st. 1838.

Dr. Miles: Dear Sir.-It is with much pleasure that I bear testimony to the efficacy of the Tomato pills in affections of the fiver: from its operation which I have witnessed in my own case. I am ready to conclude that you have discovered the long looked for desideratum, a substitute for calomel in diseases of the liver. Accept, sir, my grateful acknowledgments. Your obedient servant.

Robert Punchon. ROBERT PUNCHON

The fullowing is extracted from a letter of a highly respectable physician to friends of his in Cincinnstit, who had solicited his opinion as to the virtues of this medicine:

Laurenceburgh.Junuary 25th, 1838.

**Messar Peck & Co.

Gentlemen. * * I have used the article (Miles Compound Extractor Tomato) somewhat extensively in prescription for some months past, an many of the almost numberless manifestations of hepatic derangement particularly in infantile cases, and although I cannot say, that it is, in \$1. cases a substitute for mercuring medicines, yet the striking adalogy in its theraputic effects is such as to recommend it favorably to my mind sa an adjuctant in most instances to the exhibition of calas an adjuvant in most instances to the exhib as an adjutant in most instances to the exhibition of calomel, and where an immediate or speedy alternative effect is not indispensible, it may supersedetts use altogether. In several instances in which an antipathy or prejudice against mercurial remedies existed, I have prescribed it with very good-effect.

I am, gentlemen, respectfully yours, &c.

J. H. Brower, M. D.

The following, is a voluntary statement made by a highly respectable and scientific Physician, and appeared in the "Jeffresonville Coorier," last winter,—
MILES' EXTRACT OF TOMATO—A SUBSTITUTE FOR CALOUEL.—Having made a trial of the above article, I feel was ranted in recommending: as a useful medicine. The pills possess all the purgative and anti-bilious properties of caldimel, without any of its injurious tendencies. Persons who are addicted to habitual torpor of the liver, and consequent accumulations of bile, and who have been compelled to have resourse to the different preparations of mercury for relief, will find Miles' Pills, a safe and convenient substitute.
