The celebrated substitute for CALOMEL.

THE propretors of this article, having devoted nearly seven years, and expended a large anothing of money, in experimenting upon the various species for the Tomato, (Solanum Lyconecretum) have at last since ceeded in obtaining from thit vegetable a principle which as a medicine possesses all the beneficial properties of calouxed, and yet incapible of producing the nel eterious effects sometimes resulting from the use of that drug. This principle (he atthews a middle and efficient catharite, and, as compounded, a so acts as a torde discretic, and draphortic. (See directions accompanying the medicine)

Its particular action and use. Fis action upon the system is very general, no part escaping its affuence; it is, however, non the secretaries and exceptiones, that its great power is particularly manifested; from this it will be seen to have a fire effect upon the biliary organs, and to be particularly adapted to the treatment of bilines freezes and other discapted to the treatment of believes freezes and other diseases where a torpidally or conjection of the herr and portal circle prevail; hence the great success that has attended its administration in liner affections, dyspeps, and diseases of the stonich and lewels generally. Being diffusible in its operation, it produces a free circular toron in the vessels on the surface of tion in the descris on the surface of the budy, agreempaned by a gentle perspiration.
