

POTTSTVILLE. Saturday Morning, Aug. 3. NOTICE. The Subscriber is now engaged in making out...

DEMOCRATIC WHIG COMMITTEE FOR SCHUYLKILL COUNTY. Appointed at the Chambersburg Convention...

DEMOCRATIC WHIG COUNTY MEETING. The Democratic Whigs and other opponents of Martin Van Buren...

Our Streets.—The Borough officers have commenced the cleaning of our streets...

Raising Bars.—We are not behind the age in the receipt of the dedications of the season...

During the session of the Court at Orwigsburg the past week, several criminal trials have been disposed of...

We trust the latest measures, which limit the limits of our Borough, and have a salutary influence on checking vice...

Franklin Institute.—We have received an intimation from the Academy of this Society...

Accidental Drowning.—A young man, named John Schenck, by occupation a boat builder...

Patience Invited.—On Thursday and Friday of next week, there will be a public examination of the pupils of the Institute...

Female equipment.—Major Noah recently said with his usual gallantry, that an American female could accomplish any thing...

Female equipment.—Major Noah recently said with his usual gallantry, that an American female could accomplish any thing...

Fancy tableaux.—Byron one morning woke up and found himself immortal! We wish as much success upon his last Saturday...

The ladies may place their little bodies in picture-frames as often as they choose, and peruse Queen Victoria, Grace Darling, Yvona, Hebe, or any other character they list...

Now, the writer of these rebellious paragraphs had not the happiness of seeing these tableaux, or perhaps his imagination might have led him to say something more worthy of the delightful pasture...

But, would our friends believe that this harmless article, emanating from a sincere wish to gratify our female readers, dictated by a heart, which is ever beat in unison to all the charms of domestic life...

Such is the intention against us, and the verdict is forthwith rendered in the following words: "The ladies in question can entertain but one sentiment on the subject—a sentiment that will naturally suggest itself to every reflecting mind...

It is deemed to be a violation of the rights and the rights of society, and that society too, composed of respectable females, dragging an innocent and unobtrusive recreation of ladies to public notice...

It is deemed to be a violation of the rights and the rights of society, and that society too, composed of respectable females, dragging an innocent and unobtrusive recreation of ladies to public notice...

Turkey, Egypt and Syria.—While the Ottoman Porte and the Pacha of Egypt are quarrelling as to the Pashalic of Syria, Russia and England are each standing ready to jump in and wrest from the belligerents...

The first expedition which brought Ibrahim Pacha, before the eyes of the world, was his expedition against the Wahabees of Arabia, who in 1831 and 1832, threatened the Mahomedan faith...

England is better prepared to do this, than any other country; France, Russia, and Mohamed Ali, would it were true, dissent. France however with her African possessions at Algeria, held without hindrance, should make no objection—Russia, if she has the wish, has not probably the power to oppose it...

That Syria, under these views, must become a bone of European contention, no one can doubt; England would wish it as a high-road to her Indian possessions; Russia, wishes to hold it as a check on England; and France has long looked on Egypt with a longing eye...

Russia is not so powerless as English journalists imagine. The introduction of her grain into England, has drawn a vast amount of bullion, and filled the treasury of the autocrat, while her proximity to the scene of action will give him a decided advantage in case of actual war...

Steam.—A new line of steam vessels between New York and Havre, is talked of. When will our state have her own vessels.

The President says, that "the mass of the people, the laboring classes, have heretofore been comparatively listless upon the subject of the management of public affairs."

Chopped Hands and Lips.—Many ladies, says the New Era, complain latterly at this season of the year, of chopped lips and hands, &c. As far as hands are concerned, it is all natural; but the fact is when we see chaps frequently about a lady's lips, we say nothing, but we can't help thinking so.

Inspector's Elections.—The Harrisburg Intelligence in announcing the new Election Law, remarks that the Inspector's Election for 1839, will be held on Friday the 10th of October next...

The greatest publicity should be given to the provisions of this bill, and as soon as we have received it from the Secretary of the Commonwealth, or any other source, we shall lay a digest before our readers. In the mean time we agree with the Intelligence, that all Editors and County Commissioners should notice the matter, and that it should be published by authority of the latter, in their respective counties.

A Good Toast.—The general rule of toasts offered on the 4th July, is flat, stale and unprofitable. If the wine in which they were pledged, were as old as the sentiments, it would be magnum bonum. The following from P. W. Gardner, Esq. of St. Joseph, Florida, is far beyond the common run.

The glorious Thirteenth States of '76—Like the faithful servant in Holy writ, can render an account of their talents—Lord, thou deliverest us as thirteen talents. Behold we have gained beside them thirteen talents more.

The New York Era, a paper edited by foreign refugees and domestic speculators, is engaged in the infamous endeavor of creating a spurious paper.

Something Strange.—A man stole a box of doubloons in New York, and started for Baltimore, where he was arrested under the suspicious circumstances of ordering a suit of clothes and paying for them in advance!

The papers in Rochester are urging the signing of petitions to the President for the release of Mackenzie from Rappinment, and remitting his fine.

We think under all circumstances that the President should pardon him. The British Government are discharging the Americans who were engaged in the same Quixotic attempt, and the dignity of our laws is preserved as much by the verdict itself, as by carrying it out to its fullest extent.

Bolivia.—Late news from Santiago, gives information that the province of Potosi, in the Republic of Bolivia, has pronounced against the Confederation with Peru, and the following declarations have been adopted by the Legislature.

1. The Peru-Bolivia Confederation shall be abandoned, because we lose by our independence, and become a colony of Peru.

2. We repudiate the authority of General Santa Cruz, because he has used his power in a most tyrannical and arbitrary manner, and has arrogated power not granted to him.

3. We nominate General Jose Miguel de Velasco as President of Bolivia.

4. We declare that Bolivia has not had the slightest part in the crimes of Gen. Santa Cruz, committed at home and abroad.

The fate of the Hornet.—A Washington correspondent of the Baltimore Chronicle, says that a new and startling light has been cast on the end of this ill-fated vessel, by the offer of an individual to exhibit proofs that she outlived the gale, in which it was believed that she perished, and met her destruction from enemies more cruel than the elements.

The Globe says, its whole columns might be given to the exposure of the deceptions of the Whig press, and yet unnumbered falsehoods escape it.

A Toast.—On board the Great Western, during her last trip, the following toast was pledged:—"Here's to the ladies who are now half seas over!"

The Hon. Charles Naylor, has been suggested as the next Whig Candidate for Governor. All very good, but we have other business on hand before that, let us take it up in order, and sweep the board clean.

Another discovery in the Arts.—Cicero, the celebrated decorative painter, in France, has discovered a means of fixing colors in stone; he can imitate marble, or paint subjects on the natural stone. The colors become so engrained into the pores of the stone, that it may be ground or polished without injuring them.

The People pay all!—When Mr. Van Buren was in New York, his tavern Bill at Washington Hall was paid by the Committee of the Loco Foco Common Council. It amounted to the interesting sum of about \$700—Champaigne, hock, soda and imperial cigars included. Oh these aristocratic demerits!

A pretty fair bill for the city of New York to pay for Martin's glorification, and reminds us of the old anecdote of King William, when travelling through Hanover. He was charged very exorbitantly for every thing, and among other items, eggs were put down in his bill at five shillings sterling each.

Mr. Benton, in his Springfield letter last year, said that "Hard money payments to and from the Federal Government, and the keeping of its own money by its own agents, (which are two essential features of the Independent Treasury,) are indispensably necessary to save the Federal Government from bankruptcy."

The revival of the specie circular, and the pleasing fact that the government's "own agents," Price, Swartwout, &c. have kept its money, lead us to hope the Treasury may be saved from bankruptcy.

The Last Legislature.—This body has been proudly called "Democratic." The principles of this political family, are retrenchment, reform, opposition to monopolies, and the guardian care of their dear, very dear people! Now the number of acts and resolutions passed by that august and dignified body, were 55, and we want to see how far they carried out their creed.

Not a score of public acts were passed! nearly all of the two sessions was spent in personal denunciation, and political speech making, ranting, expostulation on the treasury, disgrace on the Commonwealth, and contempt on the whole body, which was born in a riot, and lived worthy only of its birth!

Historians.—Charles Kean, Vandenhoff, and thirteen others of the British Corps dramaticque, will arrive in this country during the fall. Maywood and his talented family are also about to return.

Centenary of Methodism.—We learn from the Louisville Journal that a meeting was held in that place on the 21st July, and that the sum of \$3,000 was subscribed on the spot, after an appropriate discourse from the Rev. Mr. Marritt on the rise and progress of Methodism, as a memorial of attachment to the Methodist cause, and to promote the following objects:

1. Fund for Superannuated Preachers. 2. Education. 3. Missions. 4. A church in Louisville to be called the "Centenary Methodist Church."

Texas has paid the indemnity due for the seizure of two merchant vessels sometime since, amounting to over \$12,000.

An anti-duelling society has been established in Natchez. We fear that like the man who joined the temperance society, they will have to treat resolution once in a while.

Col. Mudge and other gentlemen appointed by the British Government as commissioners on the Boundary question, have arrived in this country.

Virginia Tobacco Crop.—The Petersburg Intelligence says:—The Tobacco crop promises as large a yield as was ever known in the State. The only danger is that it may be injured in quality by being too forward.

Henry Clay.—Compromise, concession, and union! is the motto of this distinguished statesman, and he is determined that no attitude of his, shall be a bar in its being carried out to the full!

FOR THE MINER'S JOURNAL. RELIGION, THAT HE WHO RUNS MAY UNDERSTAND. "Do unto others, as you would have them to do unto you."

FOR THE MINER'S JOURNAL. TO. I met thee in the hall Lady, where met the grey and fair, I met thee and thy winning smile was the most winning there...

FOR THE MINER'S JOURNAL. TO. I've often wish'd to have a friend, With whom my choicest thoughts to spend, To whom I safely might impart Each wish and weakness of my heart...
