Br William Evans' SOOTHING SYRUP, FOR CHILDREN.

To Mothers and Nurses THE passage of the teeth through the gums produces troublesome r il dangerous symptoms. It is known by mothers that there is a great irritation in the mouth and gums during this process. with extreme violence, and thrusts its fingers into its mouth. If these precursary symptoms are not speedily alleviated, spasmodic convulsions universally supervents and soon cause the dissolution of the infant. If mothers who have their little babes afflicted with these distressing symptoms, would apply the celebrated American Soothing Syrup, which has preceived hundrede of infants when thought past recovery, from being suddenly attacked with that fatal malady convulsions.

This infallible remedy has preserved hundreds when thought past recovery, from convisions. As soon as the Syrup is rabbed on the gums, the child will recover. This preparation is so innocent, so efficacious, and so pleasant, that no child will refuse to lettis gums be rubbed with tt. When infants are at the age of four months, pleasant, that no child will refuse to let its gams be rubbed with it. When infants are at the age of four months, though there is no appearance of teeth, one bottle of the Syrap should be used on the gams to open the porces. Parents should never be without the Syrap in the nuttery where there are young children, for if a child wakes in the night with the pain in the gains, the Syrap immediately gives ease, by opening the porces and healing the game; thereby preventing Convulsions, Fevers, &c.
