

POTTSVILLE, Pa. Saturday Morning, Feb. 29.

Democrat Whig Administration. FOR PRESIDENT. GEN. WM. H. HARRISON, OF OHIO. FOR VICE PRESIDENT. JOHN TYLER, OF VIRGINIA.

It is a long while, since we have had occasion to apologize to our friends for editorial matter, and therefore feel confident that our friends will forgive us this week.

The Log Cabin. It is intended to commence in the first week of April, the publication of a new weekly paper in our Borough, under the Presidential election, to be entitled "The Log Cabin."

We are authorized by the "Miner's Friendly Association," to offer a reward of one hundred dollars for the conviction of those who originated the slander that any of its members had been engaged in injuring or breaking down mines in this vicinity.

The Hon. Charles Frealey has again made his debut, by attention in forwarding legislative documents.

Borough Ward. A bill has passed the Legislature, dividing our Borough into two wards, North and South, with Newburg Street for the division line.

We shall next week endeavor to publish Mr. Clay's speech on the Sub-Treasury Bill. It is above all others, as an able production emanating from him.

Iron Rails. We visited Mr. Lyman's works on the "Island" this week, to see the Iron Rails which are being cast for the Greencastle continuation of the West-Canton Rail Road.

We seriously advise all those who intend to lay roads, to examine this, which will soon be finished, before resolving on the material to be used.

Birth Night Bill. In remembrance with a time honored custom, the natal day of our Nation's Founder, was celebrated by a ball.

We delight to see the crowded ball-room, when the sunny side of life's picture is presented to the view; when the cares, anxieties and troubles of the world are laid aside; when the merry laugh quashes from its fountains of the heart, and wells around the eyes in the desert of life.

That we do not see the crowded ball-room, when the sunny side of life's picture is presented to the view; when the cares, anxieties and troubles of the world are laid aside; when the merry laugh quashes from its fountains of the heart, and wells around the eyes in the desert of life.

That we do not see the crowded ball-room, when the sunny side of life's picture is presented to the view; when the cares, anxieties and troubles of the world are laid aside; when the merry laugh quashes from its fountains of the heart, and wells around the eyes in the desert of life.

That we do not see the crowded ball-room, when the sunny side of life's picture is presented to the view; when the cares, anxieties and troubles of the world are laid aside; when the merry laugh quashes from its fountains of the heart, and wells around the eyes in the desert of life.

That we do not see the crowded ball-room, when the sunny side of life's picture is presented to the view; when the cares, anxieties and troubles of the world are laid aside; when the merry laugh quashes from its fountains of the heart, and wells around the eyes in the desert of life.

Columbia, Pa., has suffered severely from recent fires, supposed to be work of incendiarism.

For Day. Another vein of this valuable substance, has been found on the Broad Mountain. Mr. Lyman has tested it, and says it is equal to that which is imported from Wales, for the use of the Furnace.

We were recently led into error by copying a toast from the Philadelphia Courier and Inquirer, which was given here at Pottsville, on the occasion of Mr. Lyman's festival. The sentiment there offered by our estimable friend, and former fellow citizen Mr. Joseph Lyman, was in these words:

"The proud products of Pennsylvania, Man and Iron; in peace, the farmer and his ploughshare; in war, the soldier and his sword!"

As this admirable toast was given by a Pennsylvania, and an old and valued friend of Schuylkill County, we are confident that he is not prepared for this divorce of the Keystone from the occupants of its beds.

Although this month, February, is the shortest in the year, still it has had for Saturdays in it.

Miner's Bank. The following is the statement of the Miner's Bank made to the Legislature on the 1st of October last:

Table with 2 columns: Description and Amount. Includes Capital stock paid in, Notes in circulation, Due to other banks, etc.

Table with 2 columns: Description and Amount. Includes Bills discounted, Judgements, Mortgages, Real estate at cost, etc.

The Bank Bill is still being knocked about in our Legislature; that eminent body seems perfectly agreed to disapprove an almost every provision, brought before them for consideration.

The title of Gen. Harrison, with a full account of his civil and military services, can be obtained at our office. We challenge any liberal man, to rise from the perusal of this work, filled with the record of brave deeds, disinterested patriotism, and statesman-like qualities, and not feel that Gen. Harrison has done more for his country, with less reward, than any other prominent individual now living.

More Corruption. We are sick at heart, on account of the continual record of acts of flagrant injustice and robbery on the part of our rulers at Washington. It has been ascertained, that a Clerk of the Post Office Department, who was receiving twelve hundred dollars annual salary, for duties to be performed at Washington, has been in Kentucky editing a political paper. The stamp of Mr. Graves to investigate the matter failed, as the locus opposed a motion to suspend the rules.

If the Sub-Treasury should become the law of the land, and all the money be under the control of Departments, we may expect, every one of our Clerks to be our Editors. Glorious Van Buren!

We are waiting upon our friend of the Reading Democratic Press: he has the federal loco loco editor no word for the "federal whig" editor! Let's have some more funiments—you do, write such pretty, poetical prose, and have such a peculiar and happy knack at twistification, that to read what you write, is a life of pleasure.

Tell us who the federal whigs are, and we will give you a list of the federal whigs, as long as the Reading Rail Road, beginning at Van Buren, the bosom friend of black cocked Rufus King, and descending even down to tory Ingalls.

Backing Out. When Gen. Harrison was first nominated the locus contemptuously styled him a "poor man;" they soon found that would not answer, so they have shifted their ground, and are now seeking to prove that he is receiving \$20,000 a year as Clerk of Hamilton County. This is not the fact either; the principal business of the County is done at Cincinnati, where an exclusive civil jurisdiction is granted for the city, and the fees pertaining to the County Clerk are all absorbed in expenses.

Gentleman opponents! you cannot make out William Henry Harrison, a poor man, or one holding a lucrative office. He is rich in friends and virtues, and the office which those friends intend to give him next year, is not a lucrative one, as no honest incumbent has ever been able to lay up any of the \$25,000 annual salary.

Bills of Credit. Maine is about to issue gold notes to pay the current expenses of her government. Is that Constitutional?—Phil Stoddard.

The New York Legislature have passed resolutions opposed to the Sub-Treasury scheme. In the Senate they were passed by a vote of 18 to 9, and in the House by a vote of 98 to 7.

A casual observer would be led to suppose, judging from the noise kept up by the press, that Harrison would stand a good chance of being elected to the Presidency.

Yes, we think we have some chance; he has been elected by the people, and not by the party holders, and the records of Columbia County will show that the former sometimes triumph over the latter, even when their best candidate is in the field.

There are, we believe, but two sons of the signers of the Declaration of Independence now living: John Quincy Adams and William Henry Harrison. One has already been President of these United States, and the other the people intend to make President.

The Germans for Harrison?—Our adopted German citizens, who are the best farmers in the world, and whose farms comprise the richest and most fertile parts of the western states, are coming out unanimously for Harrison. They remember, it is through his former exertions, they now hold those farms; that when their fathers emigrated here, none but rich men could buy the large sections of land, but that Harrison, the father of the West, by procuring the divisions of these sections, opened them to poor but honest industry.

The Philadelphia papers say that the "New Lady's Book" is to surpass all previous ones.

The Exchange at New Orleans has been destroyed by fire; it was built about eighteen months ago, and cost one million dollars.

The Rev. Dr. C. E. Giddens, of Charleston, has been elected Bishop of South Carolina.

Retrenchment!—President Van Buren and Secretary Woodbury want Congress to grant them the privilege of issuing five millions of Treasury Notes! Rags for the people—a million for the office holders!

The bones of the Mastodon, have been found and distributed in Texas.

General Tullier, the Canadian Patriot, has been appointed Printer to the Senate of Michigan.

Amos Kendall had quite a wind-fall at the New York Post office on Valentine's Day: upward of eleven hundred sweetly scented and delicately tinged love letters alias, "Valentines," passed through the post on that occasion.

Our brother Editors of Philadelphia, must persuade Amos Kendall to rectify the mails, or they will lose many of their daily subscribers in our Borough. It seems to be the general opinion, that they may as well subscribe to the weekly paper only, as to receive but one regular daily paper a week.

We have the most cheering signs, in our immediate vicinity, as to the success of the cause of Harrison and Tyler. Many of the former supporters of Van Buren, have become disgusted and disheartened at the destructive tendency of his policy, and are leaving the ranks of the office holders; to side with the People's Candidates. The work of reform has commenced in earnest, and the harvest will be a glorious one for our country.

The Sub-Treasury.—The best view we have yet seen of this scheme, is that given by Mr. Merrick, in the U. S. Senate: he calls it "a Bill to separate as far as possible, the interest of the Government and the Government officers from the interest of the People, and to reduce the value of property and the works of labor, in the United States."

The Blood Hounds.—Matthew L. Davis, the able Washington Correspondent of the N. Y. Courier, after showing conclusively that the Government have conspired at the introduction of the blood hounds, concludes: "I shall make no comment upon this plain statement of facts. To talk to full grown men of muzzling these dogs in battle, is too ridiculous to merit notice. No; they are to be let loose, not to worry the Red warrior, for he would laugh them to scorn; but to tear in pieces the defenceless and unprotected mother, and the infant babe begging and clinging to her breast—a system of warfare yet more inhuman, more merciless, than even the scalping knife or the tomahawk!"

From England.—A recent arrival at New York, has brought London papers of the 23d ult. and Liverpool of the 4th. The political intelligence they contain is not of much interest, but taken on the whole, the commercial accounts are more favorable than was anticipated.

Harrisburg Loco Convention.—The Van Buren men held a convention at Harrisburg on Monday the 17th inst., to appoint delegates to the 4th March Convention. The Keynotes and Reporter men quarrelled a good deal, but the star of Gov. Porter was eventually in the ascendant, and friends of his course were appointed as delegates.

Tariff Meeting.—An immense meeting of the friends of a Protective Tariff without distinction of party, has been held in the State House yard at Philadelphia, and a resolution passed recommending a State Convention to be held in that city on the 10th May next.

There are, we believe, but two sons of the signers of the Declaration of Independence now living: John Quincy Adams and William Henry Harrison. One has already been President of these United States, and the other the people intend to make President.
