Lebigh Water Powers, FOR MANUFACTURING ANTHRACITE IRON AND OTHER PURPOSES.

THIHE Lehigh Coal and Navigation Company offer for sale, or let on an annual ground rent, with the right to purchase at any time by paying the principal of the rent, very extensive Water Powers along the line of the Lehigh Navigation, between South Easton, and White Haven, affording in a distance of seventy-one miles, every variety of location and abundance of power at each for extensive iron works or other purposes. These powers may be relied on as constant, and being on a large navigation abounding in every variety of iron ore, and in limestone and coal, contiguous to the Lehigh, and ex-tending on each side of the Canal many miles, present the means and materials for manufacturing iron in all its various branches-and a great variety of iron ores of the richest quality are also found along the line of the Morris Canal, (by which the Lehigh Navigation communicates with New York) which

can be brought to the works as back loading. It is believed that no section of country possesses greater advantages than the Lehigh, for the manuacture of iron, either in the amount of power ap plied, the abundance and variety of coal, ore, lime stone, and other necessary materials, the ease and shortness of communication with all the markets, the salubrity of the location, and the chespness of iving, and of all the raw materials.

ter, with locks 22 feet by 100 feet in the clear, communicates from its eastern extremity with Philadelphia by the Delaware divisions of the Pennsylvania Canal in 78 miles, and with New York by the Morris Canal in 102 miles, and the Delaware and Raritan Ganal 126 miles. At its western extremity the Lehigh Navigation will in a few months have a nunication with Wilkesbarre, on the North Branch of the Susquehanna by a rail road of only twenty miles, made with a favorable grade, and in the most approved manner-fifteen miles of this road being already passable for cars. By this route the distance from the North Branch Canal at Wilkesbarre, to Philadelphia, is one hundred miles less, and to New York one hundred and sixtyeight miles less than by any other route. From Northumberland, at the West Branch of the Susquehanna, the Lehigh route is nearly as short as any other Canal Line to Philadelphia, and shorter than any other to New York. And from the mouth of the Inniata to New York, the Lehigh route is about as

short as any other. The Company being desirous of having the manafacture of iron with Anthracite Cool extensively established along their line, have reduced the price for water power to be applied to this object, so much, that it is believed the water to make a ton of pig iron, will not cost more than from sixteen to twenty cents. They will also furnish coal for this purpose at much below their usual rates. For further information, apply to William H. Knowles, the Company's Superintendent, at Mauch Chunk; William Zane, Agent at South Easton, John Brown, Agent, at White Haven; or to the

Company's office in Philadelphia. JOSEPH WATSON, President. P. S. The Furnace of the Lehigh Crane Iron Company, whose works are situated on the Lehigh Canal, near Allentown, is now making first rate iron from the ore, exclusively with Anthracite coal, with the most entire success-and is open to the in spection of all who may choose to visit it.

Farm for Sale.

THE subscriber offers for sale the Farm on which he formerly resided, known as THE CLARENDON FARM, tuated on the river Schoylkill in Manheim township Schuylkill County, six miles below Pottaville and one mile below Schuvlkill Haven. It contains about 375 acres, 150 of which are cleared and in a good state of cultivation, the balance in young timber. The Schuylkill Canal and Reading Rail Road both pass through the property. There is about 70 acres of meadow land and a good spring house with a never failing spring, which would make it a desirea le property for a Dairy Farm. The improvements are two good log houses weatherboarded, and a log barn 35 by 70 feet. The terms will be made very easy. Property in the city of Phila-delphia or in the Borough of Pottsville will be taken in payment; for further information apply to the sub scriber in Mahantango street, Pottavi

NEWS TO THE AFFLICTED.

Yeager's & Albright's 🕝 Celebrated Botanic Health & Life Preserver. 💭 HIS Medicine known for many years as Yea-ger's medicine has never been offered to the public for sale until of late, the proprietors have been prevailed upon to offer it for the benefit of those who are laboring under any of the diseases here enumerated, viz: "Cancers, Ulcers of the throat and body, Liver complaint, Spitting of Blood, Whooping Cough, Rheumatic affections in the head and body, Colds of long standing attended with severe pain upon the breast. Consumption in many cases, where the patient had been abandoned by the Physician, and pronounced an incurable case, this medicine has had the most wonderful effect." The proprietors are well aware of the numerou

medicines that are already offered to the public for the cure of some of the above diseases, many of which have not the slightest effect of performing at any time a cure—but the numerous testimonials which have of late been given to them, by some of the most respectable citizens, shows that there can no longer be any doubt as regards the inedicine which they now offer, and would say to those afflicted-give it a trial-adhere to its directions, and we will warrant a permanent cure.

Certificates of some of the most remarkable cares can be seen by calling upon any of the Agents. Directions for using the medicine will be found to ac company each bottle.

HE Valley Furnace, some time ago arranged for smelting Iron Ore with Anthracite Coal, with an excellent and powerful Steam Engine attached to it. The furnace is situate four miles from Port Carbon, up the Schuylkill Valley Rail Road.

on the Valley Furnace land.
These lands crossing the whole of the Schuylkill
Coal range, contain all the different coal veins or strata of coal of that celebrated Coal region, a number of which have been opened, and some of them are now worked. There is also plenty of Iron Ore upon the land, some of the Veins of which have been opened; the favorable location and facilities already created inspire the hope of making from at the very cheapest rate.
