Type Founders.

JAMES CONYER & SON, TYPE FOUNDERS respectfully inform their old patrons and the public generally, that they continue to manufacture and supply every article useful in the Printing business, as well as to stereotype all jobs that may offer. They embrace this opportunity to return thanks to those whose patronage they have enjoyed for so many years, and to say that they are to be found at the old established STAND, corner of Ann and Nassau streets, fully prepared to execute any order that they may be honored with; and that the Type manufactured by them is from the old specimens, together with a number of newly invented sorts, as well as the best of the old sorts, such as the FOUNTS, of the most beautiful of his old faces, and of a greatly improved quality of metal. They are also engaged in getting up, by a newly discovered process, an extensive series of new and highly ORNAMENTAL ARTICLES. Arrangements are made with the manufacturers of Press and other Printing Materials, that will enable them to execute orders as expeditiously as any other Founder in the Union, and on as favorable terms.

Wood Type.

CUT by Machinery, and warranted superior to any heretofore manufactured. George F. Nesbitt, Tontine building, corner of Wall and Water streets, New York, respectfully informs the Printers of the United States, that he has now in full operation his machine for cutting Wood Types, which being an entire new invention, has produced an entirely new style of type, far superior to any heretofore exhibited to the public; and in proof of the assertion, informs the public that he has obtained Diplomas and Medals from both the American and Mechanical Institutes of the City of New York, at their Fairs of 1836, 1838, and 1839, as the best of the Institute will show.

George F. Nesbitt will particularly invite the attention of Printers to the fact, that through the politeness of the proprietors of the Liverpool and Have line of packets, he has been favored with the latest French and English specimens, that many of the new styles in them are very handsome, and have been got up by him; they were exhibited by him at the Mechanics' Fair in this city, now just closed, and pronounced by the Committee of Printers, appointed to examine Types and Specimens, to be superior to any ever before manufactured, and having a decided advantage over large metal Types.

George F. Nesbitt, would also inform the Printers of the United States, that he is ready to cut Types on Wood of any size, from 5 lines Pica, up to 24 lines, and in all the various sizes, and Types contained in the extensive specimen of Messrs G. Bruce & Co., or from any new pattern that he is suggested.

George F. Nesbitt is desirous that Printers, and those becoming Agents, should be acquainted with the fact, that his prices are much reduced from those heretofore charged by other manufacturers; that he allows his Agents thirty or ten per cent discount for cash.

Agents are wanted for the following cities, viz: Charleston, Albany, Detroit, Rochester, and Buffalo.

Printers of Newspapers, who will publish the above list six times, within three months from this date, and will send me a copy of their paper, shall be entitled to \$3 in Types; and should the Types not prove superior to any ever before manufactured, they can be returned, and the money will be placed in their hands.
