FITHE subscribers have made arrangements to AND ESPECIALLY THE TOUNGER PORTION OF IT, under the above title. The design of the work is to do good: to aid in the formation of character; to estabsh good principles : to cultivate right feelings : to furnish innocent amosement: to promote correct habits of thought and sentiment. Nor is the plan confined to these limits; it is the purpose of the Editor to make the work useful in storing the mind with knowledge: in teaching the rules of behavior, and in pointing out the highways and by ways to success in life. In such a design, the religious and

moral duties will not be overlooked. To carry out the plan, it is deemed essential that the work should be interesting—that it should be a favorite with those for whose benefit it is designed. Accordingly, it will embrace a great variety of topics—as History, Geography, Geology, Naturel History, Travels, Biography, &c. It will be enlivened with Tales, Sketches, Adventures, Incidents, Nar ratives, Anecdotes, Fables, and Allegories-nor will Poetry or Music be forgotten. Every available means of rendering the work useful, lively, and entertaining will be resorted to, and numerous em-bellishments and illustrations will, be inserted.

As a specimen of the work will be offered to the public in the first number, it is needless to say more than ample arrangements are made to bring out the work with punctuality, and in the best mechanical style. The editorial charge of it is to be committed to the Author of Peter Parley's Tales, whose reputation is a sufficient pledge to the public that the prevent undertaking will be conducted in a manner to claim a share of patronage, especially at the hands of parents, teachers, guardians, and all

who feel interested in the young.
One number of the work will appear on the first day of each month, containing 32 pages royal 8vo: the price to subscribers being One dollar and fifty

cents, payable in udvance.

George F. Nesbitt would particularly invite the attention of Printers to the fact, that through the iteness of the proprietors of the Liverpool and layre line of packets, he has been favored with the latest French and English specimens, that many of the new styles in them are very handsome, and have been got up by him: they were exhibited by him at the Mechanic's Fair in this city, now just closed, and pronounced by the Committee of Printers, appointed to examine Types and Specimens, to be superior to any Wood Types ever before exhibited, and having a decided advantage over large met-

Rheumatism, Ulcerous Sores, White Swellings, Diseases of the Liver and Skin General Debilly, &c. and all Diseases arising from Impurity of Blood.

THIS Medicine is particularly recommended at this season of the year, as an alterative and a purifier of the blood. It gives a tone and vigor to debilitated constitutions, which invalids are unconscious of until they have experienced its effects. It is also recommended in Diseases where the lungs and breast are supposed to be affected, and also

where the constitution is broken down by the use of Mercury or Quinine: THIS MEDICINE has the singular fortune a just tribute to its great merit, of being reccommended by the most calebrated Practitioners of Medicine in the United States and Europe; whereas not one of the spurious mixtures, made in imitation of it, has the least support from the Medical Faculty. This fact offers an argument so plain and conclusive, that it needs only to be mentioned to enforce conviction.

SAMUEL A. BRADY. Danville, Feb'y. 6, Mosat's Lise Pills, and Phœ-

nix Bitters. THE perfectly safe, unerring, and successful treat ment of almost every species of disease by the use of MOFFAT'S LIFE MEDICINES, is no longer a matter of doubt, as a reference to the exper ience of many thousand patients will satisfactorily prove. During the present month alone nearly one hundred cases have come to the knowledge of Mr. Moffat, where the patient has, to all appearance, effected a permaneat cure by the exclusive and judicious use of the Life Medicines—some eight or ten of these had been considered beyond all hope by their medical attendants. Such

ed beyond all hope by their medical attendants. Such happy results are a source of great pleasure to Mr. M. and inspire him with new confidence to recommend the use of his medicines to his fellow-citizens.

The LIFE MEDICINES are a purely VEGETABLE preparation. They are mild and pleasant in their operation, and at the same time thorough—acting rapidly ration, and at the same time thorough—acting rapidly upon the secretions of the system—carrying off all acrimonious humors, and assimilaring with and purifying the blood. For this reason, in aggravated cases of Dyspepsia, the Life Medicines will give relief in a shorter space of time than any other prescription. In fover and-Ague, Inflammatory Rheumatism, Fevers of every description, Sick Headache, Heart-burn, Dizziness in the head, Pairs in the Chest, Flatulency, impaired appetite, and in every disease arising from an impurity of the blood, or a disordered state of the stomach, the use of these Medicines has always proved to be beyond doubt, greatly superior to any other mode of tréatdoubt, greatly superior to any other mode of treat-

menr.
- All that Mr. Moffat asks of his patients is to be particular in taking them strictly according to the directions. It is not by a newspaper notice, or by any thing that he him self may say in their favor, that he hopes to gain credit. It is alone by the results of a fair trial. Is the reader an invalid, and does he wish to know whether the Life Medicines will suit his own case? If so, let him call or send to Mr. Moffat's agent in this place, and procure a copy of the medical Manual, designed as a Domestic Guide to Health, published gratuitously. He will there find enumerated very many extraordinary cases of cure; and perhaps some exactly similar to his own. Moffat's Medical Office in New York, 375 Broadway. This Medicine can also be obtained of cular in taking them strictly according to the directions.
