

POTTSVILLE.

SATURDAY MORNING, SEPTEMBER 25

THE COUNTY TICKET .- In another column will be found the proceedings of the meeting held at. Schuvlkill Haven on Saturday last, for the purpose of forming a county ticket. That ticket has been formed, and is now presented with confidence to the democracy of Schuylkill county for its support. The persons who compose that ticket are men of tried honesty, are capable, and are eminently qualified to discharge the duties of the responsible offices which they have been nominated for.

We cannot too strongly urgo upon the consideration of our fellow citizens, the many claims which GEORGE N. ECKERT has upon them for their unanimous support. A long residence in this county has made him intimately acquainted with the wants, wishes and interests of a region which he would so ably represent. His arinciples are the same as those of the democratic party, and his public or private

life is without stain or reproach. Can we ask more! Mr. Eckert is emphatically the friend of the farmer, the mechanic, and the workingman. His professions and acts have proved the lively interest he takes in whatever will conduce to their welfare and prosperity. He has ever proved himself the bitter opponent of an irredeemable shinplaster currency. and the warm advocate of such a circulating medium as is not liable to ruinous fluctuations, which is of equal value in all parts of the Union, and which can be converted at all times into specie. He is in favor of a prodent and economical expenditure of the public money and is opposed to the system of grinding taxation which Governor Porter has been obliged to resort to in order to replehish a plunderell treasury. He is opposed to that wanton, corrupt and shameful outlay of the people's money that has increased the state debt, under Porter's administration, from twerty-four to nearly FORY MILL-IONS OF DOLLARS. He is opposed to that gross and notorious abeso of the pardoning power which Governor Porter has always shown when the use of it was likely to promote his political advancement. He is opposed to the exercise of the veto power in order to defeat the expressed and not to be mistaken wishes of the people. He is opposed to the use ciary department in order to reward favorites and political partizans. He is in favor of placing our PER.MINUTE!!! great chain of internal improvements on such a sound and economical footing as will make them a source of revenue and not on expense to the commonwealth. He is opposed to that system of bribery and corruption-open and covert-which has marked the course of the present administration. He is in favor of economy, retrenchment and reform in every department of our state government. And last, but not least, he is in favor of our federal government affording a just and necessary protection to American industry and enterprise.

Mr. Eckert is preuliarly entitled to the suffrages of the citizens of Schuylkill county as the warm, consistent and unwavering advocate of a Protective Tariff. All classes of our community are equally interested in the establishment of such a Tariff-the employer as well as the employed. High prices for agproductions. Remove all the restrictions and duties imposed on foreign importations, and you reduce the working classes of the United States, to the came pitfable state as those of monarchical Europe.

As the originator of the late Business Men's Co. vention at Harrisburg, Mr. Eckert has shown that in his endeavors to promote and protect the true interests of Pennsylvania, he is not influenced by selfish or political considerations. With such a man as our candidate, entertaining and acting up to such pure for one moment of success?

To Subscribens .- The amount of arrearages due this office, from distant subscribers, has been duly enclosed with the present number of the Journal to delinquents. Many subscribers are in arrears for two, three, four, five and even six years subscription ; and we therefore trust that they will now see the necessity, the common justice, of promptly settling their accounts. The weekly cash expenses of our establishment are by no incans light, and as we are about making a considerable outlay of money for the purpose of making our paper still more acceptable to the public, we hope our demands will be responded to at an early day.

FIRST PAGE .- Quite a variety on the first page this week. Read attentively the article headed " astounding developments." They are indeed wastounding," and sliquid open the eyes of every honest and reflecting man in this State, no matter to what the charge appears susceptible of the strongest proofs, with. and that hitherto they have not been contradicted or controverted by a single poper in this State.

Foneign News -- The foreign news on the first gree of willingness that is any thing but agreeable the United States. to her quondam while friends. The peaceful relations between John Bull and Uncle Sun are not likely, to be interrupted. There was every prospect of the quantity and quality of our iron ore can easily a fair harvest at the last accounts. This will have have them removed by paying a visit to the above the effect of preventing an exhabitant advance in the price of flour on this side of the Atlantic.

To Cornespondents .- "X. Y. Z." is wrong in his allusions to the article in question. We had no intention of wounding the feelings of any in the slightest degree. "Ada's" effusions have been received and will be found on the first page. If she would trust more to her own powers, and not follow in the wake of others, she would succeed much better. We should be pleased to hear from her frequently.

Mn. Banden.-The Ex Secretary of the Navy is out against John Tyler, and fully corroborates Mr. Ewing's statements respecting the rise, progress, decline and death of the second bank bill. We have fallen upon strange times, indeed, when the " Godlike Daniel" is suspected of treason, and President Tyler is per se to all intents and purposes. We have yet hopes that the squall will blow over without doing much damage.

A SMALL BUSINESS .- An attempt is now making in New York to cruth the Sunday papers of that city by municipal effectments. It is a small business, and altogether unworthy of the age and the country we live in. The locofoco corporation of Gotham should remember the fate of the originators of the one gallon law of Mussachusetts.

THE " HANDSOME" MR. EFFINGHAM. In a libel suit against Park Benjamin, the editor of the New World, Jumes Founimore Cooper has been successful to the tune of \$375.

A FEW WORDS TO FARMERS, MECHANICS AND Worktnomen:-Few can be found who will have the hardshood or recklessness to deny that the present posture of affairs in this state is of the most critical character. When the prosperity of a commonwealth is at stake, when its institutions are even threatened with destruction, a people pretending to be free and enlightened, should not suffer themselves to be divided and distracted by political differences. Such a crisis we believe has arrived. We address ourselves to your understanding and not to your passions or prejudices; and we trust our sincerity will not be questioned when we say, that your interests imperatively demand that a thorough reformation shall immediately take place in our state administration. Party has nothing to do in the political contest in which you will shortly be engaged; for President Tyler has, either fortunately or unfortuhis lamented predecessor into office by such an over-

ceptible of proof and cannot be controverted. You cannot blind yourselves to the present condition of Pennsylvania. Can there be a sight more humiliating to her citizens? Let us examine into the details of the picture. Our banking institutions were once our pride and boast. To what a state are they reduced now! Refusing to pay their lawful obligations, their stock greatly below par, and issuing an irredcemable shin plaster currency. Their credit greatly impaired at home and abroad. Wewill not allude to the recent bankruptcy of one institution whereby upwards of THIRTY MILLIONS

whelming majority. These are facts which are sus-

OF DOLLARS have been lost in one fell swoop. Our public works are in a still worse condition han our banks. The Commissioners whose duties are to superintend those works, are the creatures and partizans of Governor Porter; and by employing ontheir favorites and political adherents, and squandering the public treasure upon them for services never rendered, they have succeeded in making our railroads and canals a tax in the place of a fruitful source of revenue to the state. The canal commissioners' last annual report corroborates the truth of this statement.

The alarming increase of the state debt should are er's administration, of not quite three years duration, it has increased upwards of FIFTEEN MILL-IONS OF DOLLARS. Think of that, fellow citizens. FIVE MILLIONS, per annuin, or about THIRTEEN THOUSAND SIX HUNDRED AND NINETY EIGHT DOLLARS A DAY, which the present executive would make of the judi- FIVE HUNDRED AND SIXTY, SIX DOLLARS

The profuse extravagance of Governor Porter's adninistration has swelled the state debt up to nearly FORTY MILLIONS OF DOLLARS; and to meet the interest of that immense sum, you will be shortly called upon to pay your portion of a state tax immounting to TWO MILLIONS OF DOL-LARS per annum.

Let us turn your attention from finances to matters of equal importance. The highest office in the State has been prostituted to the basest purposes. We use strong language, but we are justified by the enormity of the offence. Your governor has been accused of receiving a BRIBE-a bribe for the purpose of upholding the falling fortunes of the U. S. Bank. The charge has again and again been reiterated. Not in a mysterious or indefinite form; but in such a plain and intelligible manner, that " those ricultural products, and high prices for labor can be who run may read." The particulars are all given obtained so long as our citizens are not placed on a __the time, the place, the sum, and all the essential par with the pauter population of Europe-so long circumstances attending this unheard of transaction. as the products of that pauper population are not | The Governor himself is as silent as the grave on the brought into successful competition with American subject. Not one of his partizan newspapers can be

> Our limits will not permit us to allude to the gross abuse of both the veto and the pardoning power; of the system pursued by our State officers, it would seem from the highest to the lowest, whereby they have suddenly amassed great wealth, while the State has become more and more in debt and difficulties.

Most of you are already aware of these facts and have deeply felt the consequences. And we now seand patriotic principles, can we doubt, fellow citizens, riously ask you - no matter to what party you belong -can you consistently with your own interests, and the interest of your families, give your support to an administration that has been productive of so much misery, rain, profligacy and corruption.

> THE VALLEY FURNACE .-- The new Anthracite Furnace, on the Valley Furnace tract, about seven miles from our borough, was blown in on Friday, the 17th inst., under the superintendence of Mr. Ralston, with complete success, and has continued to work in the most admirable manner ever since. On the first topping, we understand, grey from was produced of the best quality. The furnace is 83 feet across the boshes and has run out about an average of five tons every twenty-four hours. This quantity might be materially increased, but the proprietors, Messrs. Taylor & Co., very properly prefer producing a good iron, in the place of overworking the furnace at the expense of the quality of the article.

This is the fourteenth furnace which has been party he may be attached. VALUABLE PROPERTY .- A | fine opportunity will be afforded for investment in town property by the assign es' sale of Jacob Alter's property. We understand that the sale will be positive.

ASTOUNDING DEVELOPMENTS!-The Bribe!!-On the first page will be found an article with the above caption, copied from the "Berks and Schuylkill Journal," The charges contained in that article may be summed up in a few words:

Governor Porter first takes a stand in favor of ar early resumption of specie payments by the banksa resolution is introduced into the House of Representatives and passed, embodying the views of the Governor on the subject-a committee of Porter's friends then confer with officers of the U. S. Bank-Porter then sends in a message to the Senate and arrests the passage of the above resolution—the suspension of specie payments is legalised by legislative enactment for nearly one year-on the 25th of March, 1840, the Governor's brother has a conference with the President of the U.S. Bank-the next morning a committee, accompanied by Mr. George nately, succeeded in destroying the unity and even | Handy, a Director of the U. Mr. Handy will give no account of the disposition of this immense sum, and Gov. Porter stands charged with having received this \$99,200 as his price for signing the suspension bill

George Handy is the personal friend of Governor Porter's. The Harrisburg papers-under the very nose of his excellency-accuse the Governor of receiving this BRIBE of \$99,200 for services rendered to the Bank. If the charge is false is wholly destitute of foundation-why is it not denied, why is it not particularly denied by George Handy? His friend'is accused of having received a BRIBE, and he himself is pointed out as the instrument who corrupted the Chief Magistrate of Pennsylvania; and vet he is silent. TRUSTEES. CHARLES WITMAN, of Orwigsburg. JOSEPH HAMMER, of Orwigsburg,

On motion, it was RESOLVED, That the above ticket be unanimously recommended to the people as men in whom they have implicit confidence, and are every way worthy of their support.

On motion, the following persons were appointed committee by the chair, to draft a preamble and resolutions, viz : Capt. Daniel B. Kershner, James H. Graeff, Joseph Fertig, John Pott, George Broom, Jacob Minnich, Peter Laubenstine, who after retiring a short time, reported the following, which was unanimou-ly adopted:

WHEREAS, we are firmly convinced that the present contest in which we are now engaged will decide the destiny of Pennsylvania-whether for weal or woe-for a number of years to come; decide the question whether our state government for the future will be distinguished for a pure, wise and enlightened administration of public affairs, for the most rigid economy in the expenditure of the public treasure, and for a proper regard for the voice of the people, as expressed through their representatives; or whether it will be characterized by the same wanton extravagance, the same notorious corruption, and the same crying abuses which have marked the present administration of Governor Porter. And, WHEREAS, we believe that the vital interests of every farmer, mechanic, and workingman in this State are inseparably connected with the establishment of a Tariff by the Federal Government, that shall protect their enterprise and industry from the pauper labor of Great Britain and Continental Europe. And, WHEBEAS, we believe that an effort will be made at the next session of Congress to revive the exploded doctrines of Free Trade-to abolish the Tariff-and to put the American workingman on a par with the seris of Europe or the slaves of our Southern States. And, whereas, it is all important that we should have a Governor, a Legislature, and more particularly a representative from this region, pledged to sup-

port and protect American Industry. Therefore, RESOLVED, that we shall give our honest, hearty and undivided support to John Banks for governor of this State. Because he has shown himself the uncompromising advocate of a Protective Tariff. Because he is in favor of high prices for produce and high wages for labor. Because we believe through his agency our good old Commonwealth will be extricated from the load of debt and difficulties under which she is now laboring, through the mal-administration of Governor Porter: Because he is opposed to an irredeemable shinplaster currency. Because under his administration we have every assurance that the fountain of justice will cease to be corrupt, and the laws administered without fear or favor. Because he is in favor of the one term inprinciple. Because he is opposed to the indiscriminate use of the veto power-of setting up one man's opinion against the expressed will of a whole people. And, lastly, because we know him to be a consistent politician, an upright judge, and an honest

Schuylkill Coal Trade

REMARKS A scar city of boats was again experienced las week, which will partially account for the falling of in the amount of shipments and the advance in the prices of freight. Including the Little Schuylkill, the shipments last week amounted to 21,558 tons. Total this season, 376,109 tons. To the same penod last year, 294,339. Excess in favor of 1841

We quote freights to Philadelphia at \$1 85 To New York at \$3 60.

We have had a slight fall of rain during the last week, but the canal is far from being in good beating order.

The advance prices for every description of. An. hracite coal, are maintained with firmners by the holders in the Philadelphia and New York markets. At Philadelphia, we quote red ash lump coal, by the bost, at \$5 75 a \$6 per ton. White ash lung. \$5 50 a \$5 75; 50 cents higher for broken and screened. From the yards, for red ash, lacking screened, and egg, \$7 per ton; white ash, \$6 50.

The receipts up to the 15th inst., at Philadelphia from the Lebigh mines, were 36,875 tons, We notice several sales of Lebigh coal in that city, by the boat, at \$5 50 to \$5 75. Sales from the yards, \$6 50. Sugar Loaf, 25 cents a ton higher.

Coal vessels are in great demand in the Schuyl. kill, at Philadelphia, and at the present time over a hundred could readily be freighted. The wharves are filled with coal. In consequence of the great scarcity of vessels, freights have advanced considerably. We quote to New York, \$1 374 a \$1 40; to Boston, \$2; to Providence, \$1 621. The present demand for vessels we have no doubt will continue for the balance of the scason.

The full capacity of the Schuylkill Canal for transportation, we do not think has been fully tested before this season. The shipments of coal from this region have lately averaged about 25,000 tors, per week; which would give for a season of 34 weeks, 850,000 tons; and if we should give the other articles of produce transported over the canal, say at 5000 tons, per week, it would give a total, in round numbers, of 1,000,000 tons. From what we can gather from persons who are engaged in the boating business, we do not think it possible to find vent for more than 30,000 tons of produce, per week, through the medium of the Schurlkill Canal. This fact alone shows the vital importance of the Reading Railroad: for with the mines now opened and opening, it would be impossible next season to transport all the doal to William B. Reed for Congress, is the place of John | market which could be mined, if our sole dependence was to be placed on the canal.
