With a loud yell, run eight hours, and the flood at neap tides was I threw open the lantern and leaped into the room. scarcely perceptible. He shricked once-once only. In an instant I

"The appearance of the ship created a great ensation ; and the natives were apparently busy browing up fortifications, which, being examined by the telescope, proved nothing but mats extenled on poles, with painted ports, to give them the appearance of forts ; these poor ignorant people not having the least idea that their real character could be so easily distinguished. During the time the dispute was going on between the late Lord Napier and the Chinese authorities, our countrymen at Canton were one morning astonished at seeing the shore apparently bristling with a hun. dred cannon ; but on examining them with their

glasses, they had up in the front of a mat fort a range of earthen jars, with their open ends pointed toward the river. We found that it was a constant practice to stick a large round peice of wood inte the muzzle of a three-pounder, painted white,

the chamber, and deposited all between the scath- two pounder, and as the white muzzle was continued along the line of guns, it became very diffi

We left Liverpool about noon of the 4th inst During the first week we had delightfol weather indeed it was too good to be exactly seasonable. During that time our progress was ropid, and we began to hope that we should even arrive at Boston by the end of a fortnight from the time of oue leaving Laver, ool. But about eleven o'clock on Sunday night, (the 11th,) the wind became strong from the West, and thanging sflermatds to the Northeast and North, increased to a terrific gale. About five o'clock on Monday morning, a tremendone sea struck us and carried away a large portion of the bulwarks on the starboard. So vast was the mountain-wave which beat upon our ship; that it not only carried away the bulwarks on that side, but actually drove them over the saloon which you know is on the derk; and descending upon the larboard side, carried away the bulwarks there also. So vast and so high was the sea that passed over us, that it carried away one of the lower sails of the mizenmast; and stripped the ing which encompassed it. The boat also, bei hind the starboard wheel, was staved in by the same sea, and shorily afterward was carried wholly away by another. The quantity of water which was for a fow minutes upon the ship was immense, and the first idea we had was that she would never rise upon the waters. But rise abe did, and most lustily did she shake from her the billows which accumulated upon her. Soon after anoths er sea carried away our starboard bulwarks : ad that we were exposed to the sex let it come fram almost any quarter. Of course every precaution was taken to prevent the water from getting down into the cabine, but as the storm lasted, with more or less violence, five days, but few berthe escaped being thoroughly wet, and our comfort was not a little diminished. Through the guodness of God, we passed safely

through this season of deep anglety, without the loss of life, but the hezard was imminent." Our excellent Captain Hewitt-who is really one of the best officers and most agreeable men with whom I have ever sailed-was very near being last. The sea that carried away our bulwarks on both sides of the vessel, behind the wheels, caught him and the third mate as they were on the starboard deck. and carried them along the side of the saloon with great violence against the bulwarks on the sterns There the confluence of the waters was so great that the captain was carried over the top, and while his legs were caught by a rope which is sttached to the spanker boom (called the spankerboom-guy,) he caught hold of the iron railing which runs round the bulwarks on that part of the ship, and there held fast, in the meanwhile submerged in the waves which continued to roll over. him. At length he dragged himself over, and getting hold of a pin and afterwards of a rope, held on, and was safe. The third mate, on the contrary, was carried round toward the wheel attached to the helm, and catching hold, in his progress, of the ladder which leads to the roof of the saloon. held on till the sea was past over !

Gen. Cass and his Letter.

And Coleridge, too, has lately taken wing, But like a hawk encumber'd with his hood-Explaining metaphysics to the nation-I wish he would explain his explanation."

Pardon me for the quotation; but on reading a late letter in your paper, purporting to be an answer of Gen. Cass to Mahlon Dickerson, Esq. giving his political principles, and his views in relation to a National Bank, its applicability in the present instance struck me as being somewhat a-

Mr. Case, in his reply, says that his pinciples are purely democratic, and that he belongs to the Jefferson school. Well, we will let him pass, for most of us are good staunch democrate in our country's cause.

But it is to the latter of the last two passages of this epistle that I would direct your attention and solicit, (if in your power) information and expla-

cult, by merely looking at them, to discover the deception."

. With respect to a National Bank. says Gen. C. I think the feelings and experience of the country have decided against it, and that no such institution should be chartered by the General Government.

"I will add, that my residence in France and a careful observation of the state of the pation, have satisfied me that, while due degras of credit is highly useful in the business concerns of a conotry, a sound specie basis is essential to its permanent prosperity.

Now what is the impression that Mr. Case would leave upon the public mind 1 One ignorant of the institutions of France, and possibly amidst the diffusion of general knowledge in our beloved country there may be some, after reading these passages, particularly the last, would naturally infer that there was neither a National Bank nor a paper currency of any kind in France ; but every one acquainted with the country, knows that both do exist notwithstanding "a sound specia

basis." The Bank of France does not, to be sure, issue any notes less than 500 france, as for private bankers, carrying on an extensive legitimate banking business, there are any number of them.

There are many wealthy people in the colony .-I dislike to see any thing indistinct, and which may leave a false impression on the public mind, Numbers, of the convicts, becoming industrious particularly when a want of actual information and prudent, smass riches. There have been inmay exist. Mr. C. when he spoke of a specie batances of strange contrasts in this way. Individuals transported for stealing sheep have become sis, should enter more fully into the matter, and the owners of large flocks; foot-pads have made a let the public know what he actually means. It show in their own carriages; the violators of laws appears to me, that any one ignorant of the fact that there is a National Bank of France, issuing notes of the denomination of 500 france and up-But it is the great principle which works out wards, would, from the letter of Gen. Cass, sup-

hese results that deserves to be expecially noted. pose that the currency was purely metalliz, and There is a proverb which says "there is honor that no bank existed in that country at all. AN AMERICAN. among thieves"-the interpretation of which may

POPULITION OF ANCIENT ROME .-- Dr. Loudon, of Paris, in his late work on population, asserts that ancient Rome, in her greatest splendor. contained 8,000,000 scule, M. de la Maille, and the modern French academicians generally, will scarcely admit that there ever were more than from 400,000 to 500,000 inhabitants within the walls of the Eternal City. Other antiquarians are equally contradictory. Gibbon and Hume supposed the numbers to have been 1,000,000. Mr. Jacob, in his history of the precions metals, has calculated them at 1,200,000 ; so did Brottier, the celebrated commentator on Tacitus. The late professor Nibby, in his Roma Antiqua, conjectared that the citizens, strangers, and slaves, with their children, must have reached 2.000.000 ---Chateaubriand reckons 3,000,000, Juarus Listi-They had been the victims of society ; it was no sus and Mengoth computed them at 4,000,000 .-matter of wonder that they had sought to mo- Isaac Vossius allowed the possibility of 8,000,000, perhaps, said be, 14.000,000. There are still. more extravagant calculations on this observsoluted atoms-that had held no part nor lot in

point of archiology. Relegachlins and several other writers have actually declared their belief that in the time of the early Emparets there were. conglomerated on the seven bills and on the banks of the Tiber, ground the seven hills, upwards of them. They could feel their participation in the 27,000;000 of human beings. Amidst this discrepancy of opinions it is probable that the notion common prosperity each could recognize the secu- of 8,000,000 of souls in ancient Rome, as maine thined by Dr. Loudon, is that which is the most correct ; being founded on 10 different statistical facts drawn from the ancient authors, such leading reformations of the eriminal with the punishment to the same conclusion. In the yest 1837, when of his offence, they can judge for themselves. In Gregory XI. was pontiff, the city of Rome contained no more than 17,000 peoples. At present the entire numbers do not exceed 160,000. How mutable are human events ! Albion, the Botany Bay of Rome, is now the mistress of the world.
