Surprising Cure of Consumption. Mr. R. Gladdin of Delhi New York, of a natural W. Which floats around thy beauty. [From "the Village Record."] Letter from C. M., of Wyoming,

> To Da. I. T., or WEST CHESTER. In reply to some observations on the Coal Region

Mr. R. Gladdin of Delhi New York, of a natural consumptions constitution, has been saved from an intimely end by the use of Dr. Taylor's Balsam of Liverwort. A severe cold brought on an attack of Pleurisy, and thus ended in general debility and con-sumption. A constant cough, hectic fush, restless nights, quick pulse, and continued loss of flesh, augu-Ru a speedy death; but as soon, as he commenced the use of this Balsam, he grew better, and is now fully restored to health. AGENT-WILKES-BARRE, JANUARY 4, 1843.

My Dear Friend: The Constituti and doubt of the right to tax Coal, is unquestionably well founded, if it were laid on the exportation. In common with wheat, iron, hay and other articles, the right to tax all Coal within the State, exists. It is a concurrent right, existing both in the Gen-

sours in this negation not any take is beared; it is the stance but its benefits have been fully realized. Per sours afflicted with Coughs, Colds, Asthma, Coughs, Colds, Ashma, difficulty of breathing, pains in the side or breast, spit-ting of blood catarrhs, palpitation of the heart, oppres-sion and soreness of the chest, whooping cough, pleu-risy, hectic fever, night sweats, difficulty or profuse expectoration, and all other affections of the chest, lungs and liver, should not fail of procuring a bottle of this Medicine. J. WRIGHT, Sand's Hill, Wishington county, N. Y. The composition of Dr. Taylor's Balsam of Liver-wort is only known by the Proprietor, therefore it is dangerous using any but that from 375 Bowery. eral Government, and in that of the Commonwealth. Its expediency is another, and important matter. The proposition of Mr. N. Biddle to lay a tex of fifty cents a ton on coal surprised me. A policy more suicidal could, in my poor judgment, hardly have been suggested. Let us consider the subject

with candour. That full and ample provision should be made to pay the state debt, I shall never cease to maintain. In défence of the crèdit and

honor of Pennsylvania. "I go with him who goes farthest." Spot nor blemish, with my consent, should never rest on her integrity. Her plighted is the sentiment of Luzerne, ably set forth by Col.

two sessions ago.

is contenting its way in every market against the competition of wood and foreign coal. Raise the price of Coal beyond its necessary price, fixed by the well known laws of trade, half a dollar a ton, and you extinguish ten thousand Anthracite grates in the Union, for which wood stoves would be substituted. In steamboats and locomotives, Anthracite is just beginning to be used, reluctantly by the men 'accustomed' to wood for fuel. The proposed tax, if it did not exclude the Coal from every boat now using it, would certainly prevent

its introduction into others. This argument it appears to me, should have great weight. Mauufsciures flourish in a good legree, in proportion to the cheapness of fuel; so, as Coal is reduced in price, manufactures extend, and the demand for the article is increased. Enhance the price of Coal by s tex and manufactures diminish, and the demand for Coal is of course reduced. The interest of Pennsylvania is, most clearly, to yield every possible facility to the ex-

and Iron. The tribute, then, from other states would flow in, not only cheerfully, but abundanty, and the State, in the prosperous labour of her nhabitants, the appreciation of property, and directly and emphatically, in the Tolls on her Canals, would find her Treasury enriched.

her citizens. Would it not be wise for her to lay a tax of a cent a pound on all the fish caught ?---What'an income to her Treasury ! Other States and Nations buy, says the argument. and the tax would come out of them ! Argue thus to. Massachusetts statesmen and they would hear with feverish impatience ; listen, they would not. Sup pose some financier in South Carolina and Georgia, when first the Cotton gin opened to them a fair prospect for the cultivation of the plant, by the facility of cleaning sway the seed, should have said, "O ! this Cotton business ! How lucrative it can be made. The other States must and will have it. Let us lay a tax of \$50 on each Gin, and a penny a pound on Cotton. We shall thus make them tributary to us." To say the least of

thened. And the Cotton culture, left free to devel-

to the South, but to the Nation, and of comfort' and luxury to the world. Equally politic would of encouragement, to sid the development and extension of her coal trade.

NO 5. ery morning; and nothing less than three hours will do. I'm sure I wish the piano on the fire ! But what's the use of wishing I other peuple practice, she says, so must L.

- Smith is a merchant, and deals in currants, and raisins, and matters of that sort. Smith's life is very mercantile and stupid .- He leaves his house at Brixton every morning by a quarter past eight, and arrives at his counting-house in the city a little after nine. Here he toils till evening, and then, riding home again, he cais a hearty dinner, and tries to digest it till bed time. Of course no constitution can stand this irrationality, and Smith is often very ill, and never at all well .---But then,' he says, how is it to be avoided ! The physician tells me to attend less to the cares of business, to take more exercise, to indulge in relaxation of mind : sir. it can't be done. I must be at my desk by nine, and remain there till six ; and it would never do to lose my time by walking. If I flagged for an instant my connexions

would go. Other people over-work themselves, and so must I.' One night last week I was returning from a ecture, when I was startled by a groan close to me. I directed my eyes towards the spot from whence the sound appeared to proceed, and discerned, by the light of a neighboring gas lamp, a man lying at full length in the gutter. He put his hat under his head for a pillow, and was snoring with such vehemence as to endanger the repose of every inhabitant of the street. I was willing to give him the chance of securing a better resting place, and therefore shook him by the shoulder. This only succeeded in rousing him partially. He drew a long sigh, rolled over on his other side, and muttered drowsily, More gia!' It would have been inhuman in the extreme to allow him to lie there. I once more, therefore, applied mycelf to the pleasing task of benevolence, and administered a kind but smart kick, which was so far defective that the inebrated individual opening his eyes, sat up in the gutter and stared around him with an air of bewilder

ment. "Come get up,' said I, "or you'll find this bed rather too damp for your rheumatism! You'll kill yourself?

"What's the matter ? Who are you ?' exclaim ed the inebriated in lividual rubbing his eyes, and not yet capable of appreciating the exact condition of affairs.

Never mind who I am,' said I. Get up, unless you want to end your days in a gutter. How come you to be in this case, you dissipated character.

"Why, master," exclaimed the man, what's the olds of getting up ! It's a good enough place to sleep in. You an't one of those temperance set, s'pose, as wants us to live on bread and water. A drop of gin won't hurt anybody. But, besides, you should do as the rest of the world does -that's what I always say ! Other people drinks,

and in course I may.' kind made up of Jamies; and may not Jamie's parably better understood than they are at present. Now tell me, reader, is not the mass of menown represent the world ! ur far less frequently than they now do; and will not many idiots in other towns, northern, southern, eastern and western, who would despise the THE TABLES POLICE IN VIBOUNIA .- The simplicity of Jamie, and yet who do the very same Whige of Westmoreland county, Virginia, held a thing themselves; who psy as much deference to convention recently, at which LAWRENCE WASHfoolish doings of "other people," who, like bim, inoros presided, and a set of uncommonly sen keep a dog merely because their friends and neighsible resolutions were adopted. We make from bors keep dogs; and who, like him, get well bit the preamble the following extract, the, sound ten for their pains. We are convinced Ah !' exclaimed he, noticing me in the throng. that if all the nations of the earth would be govhot work ; isn't it ? I'm as tired as if I had been erned by them in their commercial relations, they would confer upon all the greatest possible amount It is very kind of you, taking so much trouble of attainable prosperity. But we should regard it an account of your friends,' said I, feeling that I as the height of folly to throw open our ports ought to say something, and not knowing exactly "Ah !' said Potts, bending towards me in a confidential manner; I hate these crowds, my dear young friend-I hate them! Nothing like a abstract philosophy on the shelf and work out his problems upon the sciual theatre of human affairs. To buy in the chespest market is a very plausible doctrine: but to him who is forced to sell in the chespest market, in order to reach it, the delusion is at once made manifest. The great problem to solve is, what constitutes, under all circumstances -of selling as well as buying-in time to come as well as in time present-the most advantageour market to the consumer." HENRY CLAY IN GEORGIA .- The following

A seronon on the Milmanum was recently preach od by Dr. Tomineson, of Augusta College. It has since been published. Dr. T. meintake the opinton that the commencement of the Millenium will take place 155 years hauce. He defines the Millenium as a period in which the Christian religion shall be universally triumphant ust maly pervading, but actually extending its relation and purifying influence throughout every purifor of the habitable globe. President lonkin, however, according to the Cincinnal Chronicles, says that the Millenium will commence in 1806, 24 years from this time, and the ednor of, the paper just named says that if the world were to go ou for 155 years, just as it has done for 155 pest, source thing very like the Millenium would be produced. He argues thus to the bas, for 160 years, doub-

The litentitius.

led its inhabitants each 25 years. In 150 years, more then, we must have on the continent of North America, NURB INHABITANTS THAN THE RAUTE BOW HAS, provided the soil can mointain them.-But, the Arts of Agriculture, as well as all others, have so increased that it is perfectly reasonable to suppose they can be maintained. It Schools, Colleges, Churches, the Press, and the il a mination of the Hible, go on as they have done, they will be the clost enlightened and Unsistian propie, by far, that have over lived.

2. Within 160 years 100,000,000 of Bladood have been conquered by British Arms, slid the Press and the College been planted in the millat. It is, therefore, almost, pay gone inevitable, that in 150 years every fuot of Asia will be under the domision of the Anglo-Saton tace. In the mean time, the Press, the Cullors, and the Bible will there produce their natural and benign effects apon the Asiatic mind. Long cafore that period, tuon, we may expect, upon compon historical grounds, by a process of more arithmetical calculation, to see Idulatry loss gits hold of the human mind, and the nations of Asia, as these of Roma did, forsake their beathen gods, and march under

the banner of Curistianity. 3. Mahamedaulsun is already expiring, and scon Constantinoplo will be a Christian city. Jarliestem with be re-inhabited by its ancient people, and the Zion of the Jew and Christian re-illumined with holy light. .

4. The last fact, to which we shall advert, is the yest discoveries made within recent years, in the islands of the Sea, and the effect of those discoveries on the civilization and advancement of mankind. The Island of New Holland, is of itself equivalent in magnitude to a continent. New Zealand is shother vast acquisition. The course of the Niger has been turned, and the interior of Africa lies exposed to the approaches of civilized man. In connection with this we see colonies in New Holland and New Zealand, began as places of exilo for convicts, now become extensive marts of commerce, with a rapidly increasing population. The Sandwich Islands are filled with professing Christians.

These are a part of the extraordinary transacliques of the LAST 150 years. They are entirely independent, 100, of the great progress in Science, of the vast improvements in Steam power, and of the still greater power of the Press- If then, without any miraculous interposition, so much has been accomplished in 150 years, we say, that should this progress be continued 150 years longer, something very like the MILLENIUM must be produced."

By the way, if we mistake not, Mr. Locks. whuse astronomical lectures have excited conriderable attention, has also expressed his opinion thet the commencement of the Millenium is at hand. Dr. Tomlinson, thinks that the Millenial inhabitants of the earth will live to as great an age, as the Patriarchs of old. But there is every reason to believe that the constitutions and functions of the human body, and the nature, causes, preventatives, and cures of diseases will be incomid the consequence will be, th

tensive exportation and widest demand for her Coal story: The Cod and Mackerel fisherics of Massachuactts are sources of productive isbour to many of wards, and every gesture evincing that he had

One million seven only to supply the Home Market, but for export; undred thousand. It would follow that the liaas well as Rhode Island and Massachusetts ! To bility of each person was but 20 lollars; and with this end the efficient inducement of cheap fuel, the trifling debt due by us, in our Federative ca. would greatly contribute: Nothing would more pacity, will still leave us less burdened than we certainly counteract the desirable object, than a were in 1790.

LINES. Can I efer cease to love thee I Forget thee I Ab, no! I thick of thy beauties, Wherever I go. The sky's dewy azure Shall speak of thine eves : The evening's soft zenhyr Shall murmur thy sighs.

When the calm of the twilight Shall lap me in bliss. I will think of thy voice, love, I'll think of thy kiss. I may roam 'mong the daughters Of beautiful Span; Or the darkly-eyed maids of The gay State of Maine.

But in hall or in greenwood, Afar from my home, My footsteps may stray, but My heart cannot roam.

In a certain northern town lived a wealthy may who had an only son. This son was universally

set down by the townfolks as an idiot: the father called him weak. One morning as his father satin his study busily employed, Jamis rushed in and stood with his face glowing, his hands working, his feet uneasily moving backwards and forcomething important to communicate, and was too nervous to communicate it.

Well. Jamin," said his father encouragingly what is it?'

-I want something, futher,' enswered Jamis. "Well, Jamie, and what is it you want?" I want a dog, father,' answered Jamic." A dog?' exclaimed the astonished father ; what can you want with a dog?' "I just want it,' said Jamio,' twirling his thumbs

and looking down. But what for ?' again asked his father. Well, I don't exactly know,' replied Jamie, still twirling his thumbs ; but I want it." 'Tell me what you want with a dog and you shall have one," said the father; that I certainly

should not like to trust you, unless you show that you have some object in view." .Everybody in our town keeps a dog, but me! cried Jamie, indignantly, and beginning to whimper. There's Sandy Donaldson ; and Willie Allison, and Bob Gordon, and Waitis Campbell, all keep dogs! Other people keep dogs, and

It was impossible to resist laughing at, or granting a request backed by so exquisite a reason --The very proposition to lay this tax is fraught | The father had his joke, and Jamie had his dog ; with mischief. Persons of capital, so much nee- | but within a week Jamie was laid up with a lacerated leg, and began to doubt whether the please lands, or to enter into the trade in Cosl, may be use of keeping a dog compensated for the pain in-

esent the world.

## TAKE NOTE!! NEW AND GREAT INVENTION.

FRANCISS HIGHLY IMPROVED MAN-IFOLD WRITER. BY this wonderful invention a letter and du-

plicate can be written in the operation with our difficulties. The Debt is large and pressing. nore case and greater facility han a single letand ought not to be increased. We must meet er with an ordinary pen and in!. the crisis like men of integrity, jealous of the pub-

To the merchantile, professional and travelling lic, as sensitive to individual honor. But I see no part of the comunity this truly geat invention as cause for despondence, Economy, prudence, and finfinite value as it is a great saving of time, a carefully considered system of taxation will soon trouble and expense. The principle advantage to be derived from the manifold witer is, that a copy of any document may be kent without any additional trouble to the writer, ald without any necessity of using either an inKind or a pen. The instrument used for writing is an agate point, consequently it never wearby use. For banks, insurance offices, merchant men of busi-ness generally, lawyers, pustmasere, editors, reporters, public officers, and all whimay be desirous of preserving copies of their litters, docu-ments, & c. with an immense saving of time and prolific source of the enormous debts owing by foreign nations, make up no part of the amount. the satisfaction of baving an exact opy of what they have written, this will be found invaluable. Francis's Manifold Writer has now een in suc-Peaceful, productive, and beneficent, are the char. cessful operation two years, during which time the proprieter has had the pleasure freceiving the unfeigned approbation of all whee observa tion it has come under. At the lateair of the American Institute the merits of the mich were examined into by three of the most ablichemisti in the country, who pronounced it topes very ingenious and useful contrivance, and to liable to change color by exposure to air, misture, or chemical agents. Consequently a medi was a-

warded by the Institute. warded by the Institute. The propriotor has lately made great borrove-ments in this article. The paper is of he best quality manufactured in the United States being made for the Manifold writer expressly this or variety of forms and sizes, varying in price om 50 cents upwards. Stationers and Country Merchants in genral

will had it to their advantage to procure the it. cle, as they meet with a ready sale. A libial duction made to those who buy by wholesald Newspapersor magazines throughout the cod, iry copying the above entire without alteration pridgement (including this notice) and giving) welve inside insertions, shall receive a copy st

SWAIM'S VERMIFUGE. -- This valuable Medicine, which has gained a greater celeb-rity than any other Worm Medicine to the country, always on hand, wholesale and retail, at Philadelphia prices. No family, after once using Philadelphia prices. 110 Medicine. 111 Philadelphia prices. 11 Will be without this Medicine. B. BANNAN, Agenit for Schuylkill county, Oct. 22;

Tax on Coal. Still stronger is the argument. When the vastly increased resources of Pennwhen we advert to manufactures of Iron, in which sylvania, are taken into the account, the actual Coal is more extensively used. burden upon us diminishes materially in aspect, and in fact. I would not, certainly, underrate

A tax on Pennsylvania Coal, be it remembered, would operate as a bounty to that amount, in favor of British and Nova Scotia Coal, holding now a spirited competition with our Anthracite. No-

hanoured " Victor,"-Kent Herald. Dec. 6.

Learning is like mercury, one of the most pow

erful and excellent things in the world in skilful

stones, and containing abcautiful medallion por. but the fact is, she plays but tolerably-misses trait, in bas-relief, of Her Majesty and his Royal half the notes, and dudges' the other half. Still, Highness Prince Albert entwined with the Garshe insists on playing Thalberg, and her friends ter. The Princess rose from her chair (being at are expected to listen. breakfast at the time) and addressing Mr. Hulke,

I assure you I cure nothing for music," she resaid, "I have something to present to you, Mr. Hulke (handing the pencil-case). I beg you will give this to Victor as a present from me." This ciously at the poor instrument. gratifying mark of the Royal favour is, of course,

I wonder you practice so hard then," I replied duly appreciated by the parents of the highly innocently. Mamma makes me!' said Isabella with great

animation -- mamma makes me, or I never would | people trouble themselves more about the payment | es cound as before. Every one knows that chartouch it from year's end to year's end. Oh, you of the debte of the siste then they do about their | coal is an antiputresorati It thus trade to prethat the consumer will pay. I think not. Cost hands in unskillful hands, the most mis hievous. can't think how cross she is if I don't practice ev. own.

s from the Washington letter of the United States Gazette :

I have been permitted to take the following exizen of Georgia, formerty a Nullifier, and an opponent of Mr. Clay, politically, to a Member of Congress, which I think will be interesting to the readers of the Gazette. The letter bears date but a few dava ago:

"As to the Presidential contest of 1844. I have only to give my opinion that it is uspless to think of any one but Mr. Clay as the Whig candidate. Some think Mr. Clay will be put aside egain if we hold a Convention. It is my deliberate opinion first mysterious whisper to the final spirit stirring | that Mr. CLAT is the ONLY man in the Union who bang. I heard it without wincing, and at the has popularity and force of character enough to adconclusion was profuse in compliments and minister the Government for the wHOLE Union thanks, as in duty bound; the only qualification | and according to his own ideas of the Constitution. to my pleasure being a fear that the fatigue had He can and will atamp, his genius and principles pleasant thing, she says that a careful removal of on the administration, which will be felt for good

rants will be but the cat's-paw of a party, and usdon't like music. Of all things on earth I detest | ed for party purposes. You know I differ in some degree from Mr. Clay-on some questions, but this difference does not blind me to his virtues. I think

great deal, but it is my honest opinion."? Another letter states that several prominent to leave their party, on account of its reckleasness, dishonesty, and utter disregard of the wishes of beated : and as for the plane, I hate it-I hate the People-because they have torn down and de twenty years of age, a front tooth that threed the very sight of its'-and abe looked quite vi- stroyed business, credit, and every thing else, and black gredually, crumbled and broke off biecedepend upon it. ويتشار وسيار

ie much more easily managed and controlled when they occur. There is another circumstance, which, we may readily suppose, will contribute not a little to longevity of milleniel inhabitants; and that, is, that they will be entirely free from all the corrading solicitude shout the means of subsistence. and confort; and almost all will constantly enjoy a must refreshing sonso of the presence and approbation of their Maker; producing that calmness and scientify of soul, which conduce greatly to the health of the body; as well as the happiness

of the mind. A notion somewhat similar, is inculcated by Bulwer, in his Zanoni. His doctrine is, that sufficient attention has not been paid to the means of prolonging life, that men are too much engaged in the pursnit of money, sud that by a proper study of the secrets of nature, the process of chemistry, and the subilities of the elements, the means of protracting existence, to a considerable extent at east, might be discovered. Dr. Tomlinson quotes Isaiah, when he says: "there shall be no more thence, or an old man that has not filled his days." He also expresses the opinion, that during the dewithout restriction to other nations so long as lightful period alluded to there shall be an entire their's are shut in our faces, and they continue to cessation of all national and individual hostility act upon a wholly opposite policy. The practical between man and man; that the people shall beat statesman, under such circumstances, must fay his their swords into ploughaberes, and their spears into pruning books; that nation shall not lift up sword against nation, neither learn war any more, That the great and paramount law of love to God, and love to man, shall be so generally acted upon, that the practical influence of every contrary sentiment, shall be utterly banished from the earth.

Without expressing any opinion as to the various view-one thing is clear, so far as Christians ere concerned; namely, that it is the duty of every !. individual to act, in the immediate circle of which he forms a member, so as to improve the mental

and moral condition of those around him, and thus to assist, in however humble a degree, the arrival of the period to which all having faith in the

scriptures and prophecies, look forward with hope tract from a private letter from a distinguished cit-i and confidence. The Temperance Reform, of tue present time, by which millious have been rescued from error and crime, may justly be regarded sa one of the lights of the age, which points to a more general moral regeneration of the family of man. When we remember, moreover, that in the course

of a single contury, the whole face of the earth is changed, as relates to its inhabitants, and il at the millions of the present became the millions of the pest-what moral revolutions may no be anticipated in the course of one or two centuries !

A RENEDY .--- Mrs. Child has published in communication in the Newark Advortiser, in which, after describing an offensive breath as a most unsubstant of between the teeth, rinsing the month after invalue and but of charcoal held in the mouth, will always cure a bad breath. Charcoal und as s dentifrice, ( that is, rubbed on in powder with a brush ) is spi to injure the ensmel; but a lump of it held in the mouth two or three times a weck he has more self-szerificing patriotism then ALL and slowly chewed, has a wonderful power to the other aspirants put together. This is siging a preserve the teeth and purify the teeth The ac-

tion is putely chemical. It counteracts the soid srising from & disordered stomsch. or food decay. Locos of that State have declared their intention ing about the gums, and it is this seid which destroys the Leeth. She addente A friends of ours had, when about rofuse to build up, egain. Georgia is regenerated meal. By frequently chewing charcoal abe progress was not only atrested, but netnie abt rigors ously to work to restore the breach, and the crime It is well said by an exchange paper, that some bled portion grew sgain, till the whole tooth whe

serve the testh and sweeten the breath."

ate as a complete prohibition. Struggling now

year, and so in proportion for any quantity

actoristics of our expenditures. But to the Coul tax. The Coal trade is yet in tender infancy. What are ten years in the development of a busi ness, destined, if nursed, to be so vast and bane ficial. Instead of being checked by taxes or retarded by burdens, policy and justice conspire, to demand for it the utmost indulgence and fostering care. It is a Hercules in the cradle; but not immortal. Like the early formed fruit, promising an abundant harvest; as a slight frost would destroy the husbandman's hope, so, at this early stage, while struggling into existence, a tax would pros-

trate the Coal trade and wither the cherished hopes of its vast enlargement, and utility. It der. The ruling of them, which has for soft time been thought impossible, has at length been brought to perfection for which a copyrigh has been secured. The copying books are boungin a been secured. The copying books are boungin a cend from these generalities to a more particular view of the case. Coal leave, throughout the Anthracite District, may be estimated as averaging 25 cents a ton-so that a tax of half a dollar

> value. All the value it has beyond its position in the mine, is imparted by labour, so that, in effect, after taking the half of every man's Coal mine, labour, most essential to the public, would be sorely burdened; and that in one branch of busi.

Demand of the miners in Luzerne 50 cents a on for all the Coal they raise, and it would ope-

tith want of Capital and an irregular market, who Luzerne, that raise 2000 tons of Coal could or build even attempt to pay the State 1000 dollars

read Monstrousl But the argument comes

restore confidence and put every thing "to rights." I deprecate all rashness-all bold experiments as equally opposed to the soundest principles of political economy,-as equally adverse to the present or permament interests of the Commonwealth: Let it be borne in mind that our state debt has been contracted neither for ambitious conquests, faimers in the interior as well as the seaboardnor desolating revenge. War and its borrors, the prove a valuable nursery for our navy-stimulate
