The Despairing.

SATURDAY MORNING, MARCH 25, 1843. VOL XIX

From the Knickerbocker for March. The Pine Tree.

STEAN dweller of the mountain ! with thy feet Grasping the crag, and lifting to the sky

The haughty crest!—stern warrior-king! the form Scarce deigns to shake, when e'en the mighty blast, Which the strong eagle fears to stem, swoops down And breaks upon thec. O'er the glimmering

As lean'st thou, with one glant limb outspread, Thy sceptre, and seamed armor on thy breast, What is more grand, more glorious than thee! The headlong torrent pitching at thy base Sends forth but vassal cumblings, when the storm Awakes thy thunder, and the puny woods Seem like bent soplings when thy towering shape Swings in its majesty. The lightning's dart Hath streaked, but not consumed thee; opward

As the black chariot of the fiend o'cz rolls, Upward still, warrior-king! thy cre-t doth point, And in sublime defiance dost thou fling
Thy emerald robe from off thy wounded breast,
For other blows to fall, fierce hissing forth Thy scorn as flies the tempest. On the rock, Thy throne impregnable, thou hast not reigned To break thee, or a lightning shaft to cleave Thy plumed head to the earth. The hurricane And showers of blazing levin-bolts alono Can hurl thee from thy post of centuries.

Yet art thou gentle, monarch of the crug ! When all is gentle round thee-when the sky is soft with summer, and the sunshine basks In love upon thy branches, bright-winged birds Flutter within thy plumes, and make thee gay With their sweet songs; the downy-pinion

breeze Soothes thee, until thou murmurest in a voice Of blandest music, that upon the ear. Steal sad, but oh, how winning! As the head

Bears the wild tempest when the rains are lannched
In slanted phalanx so when from the west The wind tans lightly, and the parted clouds Let the fresh sunshine lear, thy branches drop Their sprinklings on the blossom hung beneath, Till its blue eye is deeper in its blur,

And floats it sweet breath sweeter ; while the moss
That plump and green o'erspreads thy iron roots, Fringed delicate sandals, scems some trysting-

place, Where fairy shapes of gold and ebony Glance o'er in mazy dances. Winter stern, tiance over in many dances. Winter stern, thowing through forests changed to skelctons At the first mimicking breath of Autumn, sent As the mere courier of his dread approach, Though hurling all his blasts, from thee recoils, His fary spent in vain : not one slight plume No, not the tiniest fibre of thy sprays, Blanches or falls; but as thou stood'st when earth eaped living at the blue bird call of Spring Unchanged wilt thou again her carol bail. And tell where passed her timid stops from prints And tell where passes.

Of violets and of cowslips.

Let us mark,

Proud pine !—thou one of myriad instruments, Through which mysterious, solemn Nature breathes The music of her wisdom in our souls-Oh, let us mark thy likeness in the world, The wondrous world of men. True Greatnes

lowers A glotious monarch throned on craggy thought. Decked in its proud regalia. When the blast It spreads its sceptered arm, and weaker souls Bow, when occasion wakes its energies in all their native glory. Earth's wild storms May sweep across it, and their lightnings touch Its lifted crest; but haughtily it dares The scathing wrath, and casts its deepest score At the endeavor laffled. Glorious gifts Are not bestowed for every passing cloud Of life to law them darkened in the dust.

And it is gentle too, when gentle hearts Are round it; love for love it freely gives; And while it bears the storm upon its head. It yields a cherishing care to those that cling Unto it for protection. In life's change It changes not; but as it smiled in joy, It wears its 'customed look, and welcomes back The sunshine of tenewed prosperity.

Why have not our canal commissioners brought it before the Legislature long ago? Or are our engineers afraid of speaking? Is the wind thus strongly blowing from England as to drown their voices? Is their knowledge only to serve for their study or barren disputes and learned discussions in the halls of Institutes, when facts like the above have been, and are still starting in their very eyes? Is there none so bold as to attack the monsters "prejudice and interest?" Will there be none to bring the whole subject before our Legislature! Something mest be done, thepublic stands in want of it, and we confidently expect that we shall finally be permitted the use of our own mineral riches to relieve this county from her present distress,, notwithstanding the outcry, which may be expected from the English owners of iron

eagerness to serve their foreign masters.

To the Editor of the Miners' Journal,

POTTSVILLE, PA. Mu. Entron:-I em right glad to find that He said I could not love him, that my words were you have given us poor folks a chance to put in He said I kept him of said on, in hopes of higher this most useful of all metals,) I was ustonished, I say, that cast iron has not yet found its way to iron at very little extra cost. I have no doubt that we shall be able to produce rails of an infinitely superior quality to the common rolled rails, that I wish to see burn off our railways, as coming from the other side of the water. The fibrous tecture of these wrought iron rails has never appeared to me the right sort of thing. In the process of rolling the piles, the oxyds will and must always remain between the component parts of the store said piles, stretched and flattened into laminm .--Well, I should think that they give percussion a fair chance to separate the lamine. That this actually takes place, I would witness from my window, under which the care were passing every day, when I resided at Wilmington. I have seen rails first get logee inside, if I may say so, then open and exfoliate, and finally crush off .-The Philadelphia, Wilmington and Baltimore Railroad offers many more illustrations of this occurrence, than the Stockholders will be pleased to meet with, or our Engineers, who have been over to England, to order rails there, be willing to admit of

Things of this kind can never take place with cast fron. Make a soft casting of a beam, support it thoroughly, and it will bear any weight, and stand pretty smart blows. It is only the vibration and its reaction on the granular texture of cast iron that kills it. This, however is stopped, when laid flat and in close contact with wood.-Cast tron, in my opinion, for railroads has many other advantages. Not to mention the facility of casting rails according to the radii of the different curves, I will but say, that it can be run in any mould, and therefore can be given a shape so as to cover entirely the stringpiece. This is an essential advantage, as it preserves for a much longer space of time the most perishable part of the wooden superstructure, which all know must be renewed every 5 or 6 years, whilst the sleepers, generally made of oak or some other hard wood, will last 10 or 12 years. In such a way we shall be able to make stringpieces and sleepors equal in duration, and renewing both only every 10 or 12 years, we save one set of stringpieces, amounting. I should say, to a couple of hundred dellars, or \$ 20 per annum in one mile.

Whenever I have anything to make, I slways ask myself, can't I make it of cast Iron, I being convenced from thousand fold experience that its use can be extended to nearly every article serving for use or comfort. I am glad that our Engimatter, and that our people are beginning to open their eyes. It is true that I had my doubts with regard to wrought from tires running noon 'casi fron rails. But thank God' also these are about to be banished from our railroads, and since I see many of our Engines, I think the "Lafayette," William Penn" and others, do as well without wrought iron tires, I have no doubt, that in running cast iron upon cast iron we shall have more adhesion than we want, and thus enable our Engines to draw heavier loads.

"A ROLLER AND CASTER."

The Outrage Consummated. The following iniquitous bill, districting the State for members of Congress, has at length, by the force of party drill, being pushed through both Houses of the Legislature, and only needs the Governor's signature to become a law. By this bill the Whigs of Pennsylvania are graciously allowed about FOUR! Members of Congress cer-

tain, and three or four doubtful districts! The Year and Nave on this monstrons Gerry mander, on its final passage in the Senate yester day, will be found in our synopsis of the proceedecedings in another column. ; It will be seen that Mr. CHAMPNEYS, notwithstanding his loud professions of honesty, and his disposition to do justice to the Whig party, and his avowal on the floor of the Senate that the Whig party were justly entitled to at least ten members of Congress, VOTED FOR THE BILL! Away with such empty professions—such hollow hearted hypocrisy. We trust the Democratic whige of the "Old Guard" will remember this vote, and will reward this faithful and honest public servant accordingly,

should the day of reckoning ever arrive. Washington-the home of our noble McKannow, it will be seen, is saved from the general wreck. There is some small consolation in the fact, that this district has not also been swallowed up in the voracious jaws of the monster Locoloco Gerrymander. Considering the extraordinary efforts of a certain nerveless gentleman to place her in a Loco district, it is indeed marvellous that she

escaped. Huntingdon-faithful, honest, persecuted Huntingdon-she has fallen a sacrifice! This favorite object being accomplished, His Excellency will no doubt sign the bill with alscrity.

From the N. York Correspondence of the National Intelligencer. A Visit to the Five Points.

BY B. P. WILLIS. As I presume you are interested in the one portion of New York made classic by a foreign pen. let me jot vou down a mem. of two from my first visit to Dicken's Hole at the Five Points, made one evening last week with a distinguished party under charge of the Boz officer.

I had an idea that this celebrated enat wee on

the castern limit of the city, at the end of one of the omnibus routes, and was surprised to find that it was not more than three minutes" walk from Broadway, and in full view from one of the fashionable corners. It lies, indeed, in a lap between Broadway and the Bowery, in what was once a secluded valley of the I-land of Manhattan, though to believe it ever to have been green or clean requires a powerful effort of imagination. "We turn. ed into Anthony street at half past ten, passed the Tombs," and took the downward road, as did. Orpheus and Dickens before us. It was a cold night, but women stood at every door with bare heads and shoulders, most of them with somecomplete insensibility to cold. In every thing they said, they contrived to bring in the word abilling. - There were very few men to be seen, and those whom we met skulked past as if avoiding observation -possibly ashamed to be there, possibly shrinking from any further acquaintance with officer Stevens, though neither of these feelings seemed to be shared by the females of the communi y. A little turn to the left brought us up against what looked to me a blind, tumble-down board fence; but the officer pulled a latch and opened a door, and a flight of steps was disclosed. He went down first and threw open a door at the cheerful. It was a spacious room with a low ceiling, excessively white-washed, nicely sanded. Our next dive was into a cellar crowded with

Sorry, sir, plication-table; but it was of no use. Bleep was of all my agony - a suicide-waltering in a pool then proposed that we should see some of the dormitories of this Alsalia. And at this point must betaken himself to bed. The roon was as dark moist and alimy. Oh Heavens, the horror of that end all the checifulness of my description. This as midnight could make it, and I heard a sigh, plashy gore! I fell forwards on the floor, smitand the curtains drawn closely round in front of ten as by a thunderbolt into insensibility.

But this comfortable view which the spicide had effected his purpose was covered with human beings asleep in their rags, of the matter soon faded away as the remembrance found within my grosp, This was deemed proof and when called by the officer to look in at a low of his appearance pressed upon my vision. The sight was too. sickening to endure, but there was no egress without following close to the lantern. Another door was opened to the right. It disclosed a low and gloomy apartment, perhaps eight feet square, Six or seven black women lay together in a heap, all sleeping except the one who opened the door. Something stirred in a heap of rags, and one of the party removing a dirty piece of carped with his cane, discovered a new born child. It belonged to one of the sleepers in the rags, and had had an hour's experience of the tender mercies of this world! But these details are disgusting, and have gone far enough when they have shown those who have the common comforts of life, how inestimably, by compa ison, they are blessed ! For one; had never before any adequate idea of poverty in cities. I did not dream that human beings, within reach of human aid, could be abandoned to the wretchedness which I there saw and I have not described the balf of it, for the delicary of your readers would not bear it, even in descripion. And all these horrors of want and abandonment lie almost within sound of your voice, as you pass in Broadway! The officers sometimes. make a descent and carry off swarms to Blackwell's Island-for all the inbabitants of the Five. Points are supposed to be criminal and viciousbut still thousands are there, subjects for tears and pity, starving, like rats and dogs, with the sensibilities of human beings. As we returned we heard screams and fighting

on every side, and the officers of the watch were carrying off a party to the lock-up linese. We descended once more to the grand ball room, and found the dance going on very merily. Several very bandsome mulatio women were in the crowd. and a kw ' young men about town, mixed up with the blacks; and altogether it was a picture of "amelgamation" such as I had never before seen. I was very glad to get out of the haid bourhood, leaving behind me, I am free to the fees, all disconfeet with my carrier allotment. something of more value, having Lees obbed at Almack's of his keys, pencil case, so is a few dols spring of benevolence in prirate socities or in the
