In setting forth the virtues of this truly great medicine, we have no desire to deceive those who are labouring under affliction, nor do we wish to enlogize it more than it justly deserves. Yet when we look around and see the vast a-mount of suffering and distress occasioned by many of the diseases in which this medicine has proved so highly successful, we feel that we canot urge its claims too strongly, or say too much

n its favour. . Various remedies it is true have been offered and puffed into notice for the cure of diseases of the Lungs, and some have no doubt been found very useful, but of all that have yet been discovered, it is admitted by physicians and all who have witnessed its effects, that none has proved as succes.ful as this. Such indeed, are the

SURPRISING VIRTUES Of this Balsam, that even in the advanced stages of Concumertion, after all the most exteemed remedies of physicians have failed to effect any hange, the use of this medicine has been no had been despaired of.

In the first stages of the disease, termed "Ca.

tarrhal Consumption," originating from neglect-ed COLD, it has been used with undeviating success, and hundreds acknowledge they ow the restoration of their health to this invaluable medicine alone. In that form of Consumption so provalent amongst delicate young females commonly termed debility, or

"GOING INTO A DECLINE," complaint with which thousands are linger ing. it has also proved highly successful, and not only possesses the power of checking the progress of this alarming complaint, but also strengh ens and invigorates the system more effectually

than any medicine we have ever possessed.

Besides its surprising efficacy in Consumption, it is equally efficacious in Liver Complaints, Authma, Bronchitis, and all affections of the Lungs, and has cured many of the most obstinate cases, after every other remedy had failed For particlars see Dr. Wistar's Treatise on Consumution, to be had of the agents. .

The Extraordinary Success Attending the use of this medicine in diseases of the Lungs, and the many singular cures it has effected, having fully catablished its efficacy, and as we have already published numerous cer-tificates from the highest authority, which prove its virtues beyond all doubt, we consider it unnecessary to exhibit a long list of them in this place, and will only mention a few cases, to show what it has done

In a few days she expectorated freely, the cough was gradually suppressed, and every day appeared to add tresh vigour to her looks, and now, in the place of that emaciated form withering to decay, she is seen taingling in society, in better health than she
