pany. The above mentioned proposals are made by the government, and it is a matter of surprise and wonder to us that our State, in the face of econowell known fact that the Baltimore Railroad com- court. pany have purchased coal from Schuvikill couniv at a cost of Eight Dollars per ton in preference to using wood. Besides this we have the case of the Sugar Loaf Coal Company in Lezerne county, which company use nothing but anthracite upon their locomotives, although they pass for fifdeen miles over the Hiz'eton and Beaver Meadow Railload, through a thickly wooded country, where it could be procured for comparatively nothing. These then are evidences to prove that the use of authracite is possible and practicable, nay more, that it is preferable to any other fuel for steam generating purposes, and yet notwithstanding all this, we find the Pottsville and Philada. Railroad company continuing to use wood. This is the more resprehensible because that company depends 'eatirely upon this region for its support and encouragement. If anything should occur to decrease the sales of coal-or check its present con- yond question, that eleven inches more of water. sumption, this company would be one of the heaviest sufferers, and it is therefore an inconsistent

and unreciprocal policy on their part. We close this subject abrubtly at present, with a promise that we will recur to it more fully in a succeeding number.

THIEVES DEFECTED. - We witnessed quite an smusing scene in the streets of our Borough, on Sunday last, which was as follows : A puty of aur citizens hal started in o the woods for the purpose of ca'ching two notorious pilterers, who burrowed under a tree somewhere between this place and Port Carbon. Circumstances had tended to fix strong suspicion up in them, and the la ideas of the sortio were determined to detide the question. We saw the party on theirsteturn, the prisoners, strong y guarded, were in the centre, and a more comical looking twain we never laid our eyes en. The spoils, discovered in their son. stronghold, were hung around them in the most fantastical style of arrangement, kettlie, pans. chickens, coats, hais, boots, nearly everything that could be conveniently cribbed and carried off chance of the election of a Whig liovernor, Lieu were the e gentry in possession of. OUTHIGE AND MUNDER -- We have the par ticulars of a quarrel and murder, which occurred last week, in the neighborhood of Sunbury. Northumberland county. A party of young men went out raccoon hanting, and while passing the residence of three Irishmen on Shamakin creek, three miles Esst of Sunbury (vz; Wm. Hubter, Robert Hunter, and a man named Delany, ) they were stack d by them -- a quarrel ensued which resulted shortly after in the death of young Vand. ling, by frecturing his scull with a gun wrested from him. We tearn that the Irishmen were the aggressors-they have been arrested and are now confined in chains in the Sunbury jail to await their trial, which will most probably take place nert week. A coroner's inquest was held over the body. Verdict in accordance with the facts.

I AM CHOKING!-I-AM CHO-KING! said a sick friend whom we visited the other day. He lay on what he supposed to be his death bed. A neglected cold had supposed to be his death bed. A neglected cold had terminated in violent sore throat, the glands of his neck werd swelled almost to suppuration, his pulse was quick and irregular, his face flushed with fever, and his flesh like burning coal. | A mass of coagulat-ed mucus had gathered in his throat, and the noise of his breathing resembled what is called the death rattle, for which his medical advisers had undoubtedly mis-took it. We hide him not denain and builty before

took it. We bade him not despair, and having before witnessed the extraordinary effects of Dr. Jayne's Ex-pectorant in pulmonary affections, we procured a bot-lle of it, which we administered as fast as the almost trangled sufferer was able to swallow it. In an heu

filer taking the first dose our friend could breath free-y. The phlegm and mucus was dislodged from he mucus membrance to which it had adhered and was expectorated in large masses, leaving the trachia perfectly free. Within two weeks the patient was well.
