A RCHER'S LARD LAMPS.—A supply of these superior Lard Lamps, just received and for sale by T. & J. BEATTY. Extracts from English Testimonia's. I have great pleasure in giving you an account of Wire Ropes' now in use at the Leghill Colliery I have great pleasure in giving you at account of the "Wire Ropes" now in use, at the Leghalt Colliery:

That which has been longest at work, and which is 1 believe, which wis the first mased in the Counties of Durham and Lunderland, has given the greatest satisfiction. The bank upon win bit works, rises I in 37, and the weight of train, exclosive of fucinon, it St tons. The size of the Rope 1821 in the 2, weighing of Pes, and fathom, and its length II make. This Rope was gut to work on the 12th of Jure, 1831, and in my opin, a, will continue to work for some time to come; whereas, a 6 inch Hempen Rope, never lasted bonder than 9 or 10 mentles. On the same Ruleay, there is, another of your Wire Ropes at work, which was laid on in July, 1812, and appears to work well—18 length is 21 miles, and size 21 inches, weighing 1 ib, and fathers, I e-idea others on the line all of which have given great satisfaction. So convinced an L for the safety and corremy of the wire ropes, that in a chort time, I shall not have a Hempen Rope is use.

TENHESE Ropes are row almost exclusively used in the Collieries, and on the Railways in Great Britain, and are found to be greatly superior to Hemponous, as regards selety, durability and economy.

The "Patent Wire Ropes," have proved after three years service, to be still in good condution, where Hemponous, of double the size and weight, never lasted longer than 9 or 10 months.

Testimonials can be shown, from the best authorities in England, as to their efficiency, and every intermation respecting the different descriptions, and application will be given by

I have great pleasure in hearing testimony, to the chickency of the "Patent Wire Ropes." The Hetten Coal Company, have your ropes in use, upon nearly the whole of the self-acting Incline and Engine Planes, or their Railway—Some of them, have been at work for upwards of a year, and appear to be very bitle affected by wear. upwards of a year, and appear to be very that a meeted by wear. Signed JAMES GAN, Engineer.

Coal Office Stage. A feb. 20th, 1814.

In December, we put to work, one of your Patent Wire Ropes, in a draining Shaft. The rope has been at regular work since that time, and does not as yet show the least symptom of wear. The web it of the Rope was 54 lb, and fathom, and it is working in a situation, where we had been accustemed to work II temper topes of about 10 lb, and fathom, which on an average have not worked more than 12 manths. We have had another of the Ropes at work since the 2d of March, 1813-4t is working exceedingly well, and-does not show the elightest degree of wear.

Our opinion is that 'Wire Ropes,' well, made, and properly used, will be found for Colliery purposes, decidedly superior to Hempen ones.

New Castle, upon Tine, Feb. 23d, 1311.
I find the Patent Wire Rope, 'now in use on the Incline at the Casson Colliery, to be greatly superior to the Heinpen Ropes previously used. The Heinpen Ropes when in use for four months, were so far worn, as frequently to break with the bonded wagrons attached, whereas your wire rope, has been in use, since the 25th of April, 1812, and up to this time, there is no appearance of Anyl Silver in it. appearance of any failure in it bigued H. Testining, 20th Feb. 1844.

I beg to state for your information, that our machine with your rope on, has this last year made, one hundred and twenty one thousand trips, hing a load of four tous, one hundred and ten feet high, and as far as I can see, the rope is as good as the day that it was purp.

We are exceedingly gratified to have it in our power to give you a satisfactory report of the Patent Wire, Rope," you supplied us with. It has now been in regular operation, litting a considerable quantity of ceals daily, in one of our collicties upwards of 18 months, without the slightest appearance of defect in any part of it. In fact its durability has been a mark of axion-ishment to our foreman and others, connected with the management of the Colliery. Simed
