for the period of five years.
About the first of May last, she
became so reduced, that she was confined to her bed for several we'rs, entirely unable tongse. I called in sur fainiphysician, who after some inquire, &c., left
her a few pills | The next day the Doctor paid
her arother visit, and then told methat
and line was entirely useless, as midi ine was entirely useless, as her recovery was impossible. I then procured a bottle of Dr. Swayne's Com-pound Syrup of Wild Cherry, which

commenced using according to the directions, and from which she derived considerable benefit. I continued the use of the Syrup until she had used 10 bottles. By this time she had recovered perfectly. Shenow enjoys good health, and attends to her, household duties as usual. I would most cherrfully recommend this medicine to all, similarly affilied. What is the price of 10 or 15 bottles, compared to good health?

Patent Wire Ropes.

For the use of Incline Planes in Mines, Railways &c., for sale or imported to order, by the subscriber. or der, by the subscriber.

The HESE Ropes are now almost exclusively used in the Collieries, and on the Railways in Great Britian, and are found to be greatly superior to Hempen ones, as recards safety, durability and economy. The "Patent Wire Ropes," have proved after three years service, to be still in good condition, where Hempen ones, of double the size and weight, never lasted longer than 9 or 10 months.

Testimonials can be shown, from the best authorities in England, as to their efficiency, and every information respecting the different descriptions, and application will be given by

Leghill Colliers, May 1st 1814 I have great pleasure in giving you an account of the 'Wire Ropes' now in use at the Leghill Colliery: That which has begin longest at work, and which is That which has beginnesses at labelieve, which was the first used in the Counties of Durham and Lunderland, has given the greatest satisfaction. The bank upon winch it works, rises I in 47, and the weight of train, exclusive of friction, is 84 tons. The size of the Rope is 22 inches, weighing 64 hs and fathoin, and its length 14 miles. This Rope was plut to work on the 12lf of June, 1811, and in my opinion, will continue to work for some time to come; whereas, a 6 inch Hempen Rope, never lasted longer than 9 or 10 months. On the same Railway, there-is another of your Wire Ropes at work, which was laid on, in July, 1812 and appears to work well—Its length is 22 miles, and size 22 inches, weighing 4 lb, and fathoin, 1 o ides others on the line, all of which have given great satisfaction. So convinced ain 1, of the safety and economy of the wire ropes, that in a short time, I shall not have a Hempen Rope in use. CHAS, CARR.

In December, we put to work one of your. Putent Wire Ropes, in a draining Shaft. The rope has before regular work since that time, and does not as yet show the least symptom of wear. The weight of the Rege was 54 lb, and futhom, and it is working in a situation, where, we had been accustomed to work Hempen ropes of affout 10 lb, and fathom, which on an average have not worked, more than 12 months. We have had another of the Ropes at work since the 21 of March, 1843-dit is working exceedingly well, and does not show the shightest degree of weat.

Four opinion is that (Wire Ropes, well made, and properly used, will be found for Colliery purposes, decidedly superior to Hemmen ones.
