Pottsville, Sept. 23, 1613, 29—

E. Y.

THIRTEENTH ANNUAL REPORT,

Made by the Board of Trade to the Coal Mining Association of Schuylkill County, January, 1845. The period has now arrived when it becomes the duty of the Board of Trade to submit to the Coal Mining Association their an-

nual Report. In the performance of this duty, they will bring into review the Coal operations of this year, the improvements immediately connected with the business, as well as those in progress and in expectation; and also the routes of transportation to tide water. The amount of Anthracite Coal sent from the mining districts

during the year ending on the 1st inst., will be seen by the following table:

From Schuylkill, 398.443 By Canal " Philadelphia & Reading R. R. 441,491 839,934 377,821 From Lehigh 251.005 Lackawana 114,906 Wilkesbarre 34,916 Pinegrove -13,087 Shamokin 1,631,669 50,000 Add remaining on hand 1st of April last

1,681,669 Deduct am't sent by Railroad from Jan. 1, to April 1, 52,240

1,629,429 In making up the above table in the usual manner, including we lately came across, torturing tadpoles in a the first place all the coal sent down from January to January, and spring upon a road-side in New Jersey-altogeth- adding the amount on hand on the 1st of April, it then becomes necessary to deduct the quantity sent by Railroad from January 1st to April 1st, insorder to show the correct amount in the market.

There appears to be 90,000 tons of coal distributed along the line of our Canal and Railroad; and from Wilkesbarre, Pinegrove and Shamokin, there appears to have been about 70,000 tons disposed of on the lines of canal through which the coal passes. And from the most reliable accounts that we can get possession of, we believe the quantity sold on the lines of transit from the Lehigh and Lackawana mines, may be set down at 90,000 tons, which will make a gross amount of 250,000 tons sold on the lines of transportation; eaving 1,381,669 tens of Anthracite coal, that was sent the past year to the terminations of the canals and Railroad over which it

was transported, there to be consumed or shipped to other points. The amount of coal sent from this region the past year in boats, through the Schnylkill, and Delaware & Ratitan canals, direct to the city of New York and its vicinity, appears to be 111,521 tons, which is 8,451 tons less than in the year 1843, and is owing to the large emount carried by Railroad to Richmond, thence through the

Delaware & Raritan canal to New York. The following table exhibits the quantity of coal sent from all the Anthracite coal basins of Pennsylvania since the commencement of the trade; together with the annual increased supply, consumption, and quantity remaining unsold, and also that dispused of on the line of our canal and Railroad.

The number of Steam engines and amount of machinery at the Collieries, is steadily and rapidly increasing, and we now have 22 collieries under water level, at which there is erected 28 engines for raising the coal and draining the mines; the aggregate power of them being equal to 1100 horses. And there has been erected within the past year 13 smaller engines equal to 178 horse power for breaking coal; making the whole number of engines in the region, employed in pumping, and in raising and breaking coal 41, with an aggregate power of 1278 horses.

In addition to the 41 engines employed about the mines, there are 15 others rated at 186 horse power, employed in other business in the county, making a total of 56 steam engines with an aggregate power of 1464 horses, employed in the county; all of which excepting 4 have been built by our own Machinists, and these Machinists have now 15 engines in the course of construction for our

The introduction into this county within the past year of machinery for breaking coal, may justly be considered as an acquisition of vast importance, to the already extensive means and appliances for economising manual labor.

tons of coal per day, which is fully equal to the work of from 40 | Susquehanna. o 50 men. Port Carbon is now connected with the Railroad to Philadelphia through the Mount Carbon-and Port Carbon Railfond, which was opened on the 1st of December last, by the unyielding perseverance of the Engineers, who were actively engaged in urging the by having specified anthracite.

work to its completion within the time required by the Charter.

One of the arguments used

The Schuylkill Valley Navigation and Railroad Company, have a large force employed under A. W. Craven, Engineer, in straightening and grading the route for laying down a new road from the is the case, and the public works do accommodate the coal trade, terminus of the Mount Carbon and Port Carbon Railroad at Port we cannot see the necessity of imposing a direct tax separate and Carbon, to Tuscarora, a distance of 9 miles. This road is to be distinct from the tolls; because if the tolls are increased there will laid with heavy iron rails, and of the same width as the principal be an equal probability of an increased revenue, which can be more roads in the United States; which is 4 feet 81 inches between the rails, and it is expected to be equal to any road in the country.

Judging from the forward state of the work, and the determined energy of the men who are interested in it, there can be little or no doubt of its being ready for the transportation of coal by the 1st of lated to increase the annual revenue flowing into the public coffers, May next; and a part of it will probably be in use before that time. | we are perfectly satisfied that such a course should be pursued, be-The work for grading, and relaying the Mill Creek and Mine cause it would operate equally and impartially. Hill Railroad, with a wide track, and iron rail, and connecting it

with the Mount Carbon and Port Carbon road, has also been com- coal, without at the same time imposing it upon all the other promenced, with the intention of having it ready early in the coming duce of the State, in proportion to its value.

shall see all the rail roads of the coal region, that discharge their immense freight through the Valley of the Schuylkill, connected rates and heavily taxed; and but few counwith the main artery, that leads to the tide waters of the Delaware

rome to the manuse manuscription and the contract of the manuscription of the contract of the

River at Richmond. The Railroad to Philadelphia has been in steady and successful operation during the past year; and in October last the laying down of the second tract was completed, presenting now two tracks of iron rails throughout the whole distance of 94 miles, which is not to be seen on any other road in this country.

The late improvement in the construction of Locomotive Engines by which they are enabled to draw two or three times as much as formerly; is calculated to cheapen the cost of transportation on Railroads to an extent that few, if any, of us had ever imagined. The improvements by Baldwin & Whitney, in connecting 6

wheels and using them all as drivers, with the weight of the Engine bearing equally on them, has increased the power of the Engine immensely, as was clearly shown by a trial in October last, when 750 tons of coal was drawn by one of these Engines, and since that time, they have been making regular trips with from 4 to 500 tons.

Those engaged in mining and transporting coal have preferred the Railroad to the Canal at the rates charged upon each; and the advantages by Railroad were considered so far superior to those by Canal, that the Cars on the road were in constant demand, while the Boats were lying at our wharves awaiting for cargoes; and were principally loaded at Port Carbon from whence the coal

ould not be sent in any other way than by canal: But the quiet of the Boats has been surpassed by the inertness of the Canal Company for some time past, by which they are like- T. C. Williams, to lose a large part of the coal trade for a time; at least until they improve the canal, and put it in a condition to admit of transortation on it being done as cheaply as on the Railroad.

We believe the Canal Company have come to the same conclusion; and learn that they have decided on making the canal sufficiently large to pass Boats carrying from 150 to 200 tons; and further, that some individuals, are so thoroughly convinced of the advantages of steam power on Canals, that they have determined

upon trying it the coming season. We are fully satisfied that the enlargement of the Canal and the pplication of steam, is the true and undoubted plan for cheapening he transportation on this line of improvement, and in perusing the Report of the President of that Company, we have been much gratified with the clear business style of the document, and the abil-

ty with which these advantages are set forth. When such a navigation is completed, that boats or vessels carying from 150 to 200 tons can load at our wharves and proceed firectly to New York and other distant ports without transhipment of the coal, and be propelled by Steam, we think the cost of transporting must be reduced to one half, or perhaps, one third of the ost in the present boats drawn by horses.

When this enlargement of the canal is completed, we shall have line of canal and a Railroad, extending from this place to tide water, not surpassed by any in the country; but it must necessarily require some time to place the canal in this position; and in the meantime the tonnage of the Valley of the Schuylkill, which in the past year exceeded 1,000,000 of tons, will be steadily increasing, and in a very few years will number 2,000,000 tons of

coal and merchandize. Thus it does appear that the large amount of capital expended on the Canal and Boats, Railroad and cars, is intended to meet the requirements of a business already very large, and which will in all human probability, be sufficient in a few years, to give active and profitable employment to the millions of dollars expended for

Five years since, the manufacturing of good Iron with Anthracite Coal was believed and asserted by some to be practicable, doubted by many, and positively denied by a majority of the Iron masters of this State. And now there are 13 Blast Furnaces in operation, using this fuel and producing the best quality of foundry metal. The furnaces are of different dimensions, producing from 30 to 100 tons each, of metal per week, and making in the aggregate about 700 tons per week. These 13 Furnaces cannot consume less than 70,000 tons of coal per anuum; and the additional number that is expected will be put into operation within a year, will increase the consumption of coal to at least 100,000 tons per

annum for this purpose only. Another means of consuming a large quantity of our coal is, in its application on boats and vessels, traversing canals and rivers and

There are now 35 Steam Boats and Vessels plying from the city of Philadelphia, to different points on the Delaware and its ributaries, and to New-York; which consume annually 45,000 tons of anthracite coal. From the best information we can get, the Steam Boats and

Vessels returning from the city of New York in various directions, consume annually considerably more than 100,000 tons of Anthraeite coal, making the whole amount at these two points not less than from 150 to 160,000 tons consumed annually, for generating steam for the propulsion of vessels. From the decided economy and advantages according to the

present experience, arising from the use of steam in vessels running through our large canals and along the coast; we are led to the conclusion that in a few years a very large portion of the coast-

The canal was open and ready for the shipment of coal on the 23d of March, and notwithstanding the unprecedented dry weather, there was no interruption in business until it was closed by ice on

the 19th of December.

The amount of coal imported into the United States for the year ending the 30th of June 1844, is as follows:

In American Vessels, 49,909 In Foreign do 37,164

Total. If we add to the products of 1844, the increase in that year of Inthracite coal over 1843 as a guide, for the probable amount re-

quired to be produced the coming season, we shall find it to amount to nearly 2,000,000 of tons; and some of our operators are making calculations that about this amount must be sent into the market to meet the demand; but we think this estimate may be somewhat too high, and trust that those engaged in mining will carefully watch the state of the market, in order to guard against aid grindstones, while great excess or deficiency in the smooth and grindstones. Nails grikes, bar troy, either great excess or deficiency in the supply, and thereby prevent heavy losses to the producer, or great increased cost to the

for economising manual labor.

The machine in general use was invented by Messrs J. & S.

Battin of Philadelphia, and was first put in their Coal Yard in that city about I year ago.

The first in this county was erected by Mr. Gideon Bast on Wolf creek, near Minersville, and since that time they have been put up in various places, and are found to answer the fondest hopes of ington, ou many specimens of Anthracite and Bituminous coal, ont, bark, raw tobacco, salt, provisions, potatoes, tum ber, stoves, &c., Flour per barrel, wheat, corn, rye, clover sirable to the Collier.

In the report of the experiments made by Professor W. R. Johnson, under the authority of Congress at the Navy Yard in Washington, ou many specimens of Anthracite and Bituminous coal, only we find in the table exhibiting the quantity of steam produced by we find in the table exhibiting the quantity of steam produced by up in various places, and are found to answer the fondest hopes of ington, ou many specimens of Anthracite and Bituminous coal, the inventor, and meet most fully the wishes of the coal operators, in we find in the table exhibiting the quantity of steam produced by performing the work at a very reduced cost and less waste of the coal. one pound of fuel, that the coal sent from this region stands before This machinery with the circular screens attached, and driven all the other Anthracites experimented upon; and second only to by a 12 Horse Engine, is capable of breaking and screening 200 two specimens of bituminus coal sent from the west branch of the

We deem it necessary to call your attention to the movements again made in our Legislature to impose a tax on coal, as an expedient for increasing the public revenue; and in this last movement they seem to have forgotten, or purposely avoided bituminous coal,

One of the arguments used in favor of this measure is. that a large part of the debt of the state was incurred for the purpose of constructing canals for the accommodation of this trade; and if this readily collected than a separate direct tax, and done too without any additional officers.

If our Legislature think that an increased charge per ton on coal and all other merchandize, passing over the public works, is calcu-But we cannot see the justice of laying a direct tax on anthracite

The heaviest portion of this tax would fall upon the coal sent A bridge is in progress of construction at Port Clinton, that will from this region, for which the Commonwealth has never expended connect the Little Schuylkill Railroad with the Philadelphia and one dollar, to construct a canal or Railroad by which it could be E. y. Pottsville Railroad, and in less than six months from this time, we carried to market.

The coal lands here are valued at high ties in the state pay more tax than the county of Schuylkill.

If, however, it is necessary to raise

more revenue, the landholders and colliers of this county are always ready to bear their proportion of any tax that is laid with a due regard to even-handed justice, but we must be watchful, and constant in protesting against this system of unequal taxation, than which there is nothing more certainly calculated to break down and destroy this branch of industry, which has been fostered into its present gigantic size, by much individual enterprise and very heavy pecuniary losses.

All of which is respectfully submitted, G. G. PALMER, President

GLENN'S INDIAN HAIR OIL.—This elegant preparation is compounded of various oils, forming fogether a compound of great value, for promoting the growth and preserving the hair, it nourishes the roots, thereby causing it for grow with vigor, and preventing it from falling out, or turning grey, removing at the same time, the dandruff which canses the hair to fall out. To those who have lost their hair by sickness or any other cause, except old age, it is confidently recommended, it gives a glossy softness to the locks, and has the singular property of making the bair dark, and is therefore recommended to those who are beginning to turn grey—it is also an excellent curling fluid and being pleasantly perfumed it is much esteemed for dressing the hair in general, and for the heads of children, price 50 cents her bottle.

GLENN'S AROMATIC ROSE TOOTH PASTE. This very pleasant and truly efficacious dentrifice, i prepared from ingredients perfectly harmless it give a pearly whiteness to the teeth, firmness to the gums a pearly whiteness to the feeth, firmness to the gums, and fragancy, to the breath, removing spots or incipient decay, and preserving the teeth effectually. It has been used and reccommended by dentists in their practice, and is believed to be equal to any article of the kind in use. It is put in neat China boxes, and having a folid form, is not liable to waste or spill, and is free from the grit of Tooth Powders in general, price 25 cts. ner box.

GLENN'S INDIAN HAIR DYE, is warranof LENN'S INDIAN TIAIR DYE, IS Warfalled to change grey, or red hair to a handsome brown or et black, without injury to the hair, or even staining to the skin, and may be used with perfect safety. To hose who have become prematurely grey, it, is invaluable, and to gentlemen who are troubled with grey whiskers it is strongly recommended, the color produced is natural, and will not rub off, or soil the whistest muslin. Price 50 cents.

MICHAUX'S FRECKLE WASH .- A com MICHAUX'S F'RECKLE WASH.—A COMplete remedy for Freckles. This remedy, was invented by Dr. Chs Michaux, of Lombardy, a distinguished Physician of the last century. The proprietor has every confidence in it; as a superior preparation for the purpose designed, it may be used without the least caution, and for pimples and other affections of the skin, it is a certain cure. Price 374 cents per bottle.

The above named articles have, been sold very extensively by the subscriber for many years, and are conscientiously recommended to the public, as preparations of real value; and not to be ranked with the humbugs of the day, a single trial will convince the most skeptical, that their good qualities are not over rated.

14 A Good Shopes and Vet to Shopes.

" A Good Shave and Yel no Shave." GLENN'S UNRIVALLED SAPONACEOUS COM-POUND FOR SHAPING.

To Gentlemen who shave themselves, this article offered with the greatest confidence as equal, if the shape to any other shaping Source to any other shaping Source to any other shaping Source.

A. Offered with the greatest connence as equal, it not superior to any other Shaving Soap in use. For a delightful and consistent lather, which will not dry upon the face or irritate the most delicate skin, for the ease and comfort it gives to the often troublesome operation of shaving, rendering it, surpassingly easy, this compound can be safely rectommended. It is equally effectual in warm or cold water, and after using it, the face is left softand pleasant, and entirely free from the irritation and roughness often caused by the use of strong alkaline Soaps and Shaving Creams. The compound is pleasantly perfumed and put up in a neat chinabox, answering all the purposes of a shaving hox, and on trial will be found very economical and convenient, during the few years this article has been before the public, the proprietor has sold 35,000 boxes of it, and the demand is constantly increasing as its merits become known. The agents are authorized to return the purchase money, where it does not give editire satisfaction.

The Saponaceous Compound is composed of incre-

the conclusion that in a few years a very large portion of the coasting trade, as well as that to the more contigious foreign ports, will be done by steam vessels, and will necessarily use a large amount of coat.

The rate of toll on the Canal for the past year was reduced to 36 cents per ton, on coal, with an allowance of 5 per cent, for waste, and we are not aware that any change in the charge is consumplated for the coming season.

The average freight for the whole boating season, was 77 cents to Philadelphia, and \$2.66 per ton to New York.

The whole charge per ton of coal by the Railroad was \$1.10 in the Winter, and \$1.25 from the 1st of July until the 1st of December last.

The canal was open and ready for the Shapment of coal on the

It cannot be Denied (For Truth is mighty) that DR LEIDY'S SARSAPARILLA CO

Is the purest, strongest, and most efficacious of any other preparation of Sarsoparilla that is made

It is warranted to be stronger than 6 bottles of MOST I other preparation of Sarsoparilla that is made.

It is warranted to be stronger than 6 bottles of MOST I others—stronger than four of SOME, and stronger than three of the STRONGEST prepared by any other in the United States.

Dr. Leidy's Sarsaparilla is recommended by all respectable physicians in preference to any other. All who have ever used it, have derived MORE BENEFIT from one bottle than three to ten of others; and those who, after having used other's preparations, without benefit, will use Br. Leidy's, will soon be convinced (as thousands have already been) of the foregoing assertion.

The apparatus with which Dr. Leidy's extracts used in his preparation of Sarsaparilla as prepared, is the only one in the United States, imported by Dr. Leidy is inself, from the celebrated house of Pelleter & Cavenon, in Paris, at a great expense, and is capable of extending the medical virtues of Sarsaparilla and other roots, more effectually than by any other process.

As SEVERAL HUNDRED CERTIFICATES of remarkable cures and recommendations from cleraymen and physicians have been from time to time published it is only thought necessary to keep the public acquesiated as so where Dr. Leidy's Sarsaparilla can by obtained gensine, namely, at Dr. LEIDY'S HEALTH EMPONIUM, 33 North SECOND Street, near Vine St., (sign of the Golden Eagle and Serpents;), Fred. Brown's and Fred. Klett's Drug Stores, Philadelphia.

Prize ONE DOLLAR per bottle; 3 bottle's for \$2.50, and 6 bottles for \$4.50. and 6 bottles for \$4 50.

Also by J. F. Long, Laneaster; and at J. G. BROWN'S Drug Store, formerly W. T. Epting's, Centre Street,

wife was
nfflicted with
pain in the breast,
and a severe Cough,
for the period of five years.
About the first of May last, sho
became so reduced, that she was confined to her bed for several weeks, entirely unable to move. I called in our famiphysician, who after some inquiry, &c., left
her a few pills. The next day the Doctor paid
her another visit, and then told me that
medicine was entirely useless as

medicine was entirely useless, as leacting was entirely agences.

I then procured a bottle of Dr. Swayne's Compound Syrup of Wild Cherry, which

commenced using according to the directions, and from which she derived considerable benefit. I continued the use of the Syrup until she had used 10 but-ties. By this time she had recovered perfectly. She now enjoys good health, and attends to her household duties as usual. I would most cheerfully recommend this medicine to all similarly afficied. What is the price of 10 or 15 bottles, compared to good health?

Yours respectfully.

Montgomery Township, Franklin Co., Pa., February 2, 1643.

DEAFNESS CURED. Scarpa's Compound Kreosole Acquetic Oil.

FOR the cure of DEAFNESS, pairs, and the is charge of matter from the cars; also all tiese disagreeable noises like the buzzing of insects, billing of water, buzzing of steam, &c., &c. which are kymptoms of approaching deafness and also attendants with the

CETIFICATES.

with interest as they speak facts, which are salubborn things."

Most Extraondixary Curis!—If, any have doubts they may now dismiss them, and the most insteadlous may consider Deafnéss as curable. Numerons-cases of cures, and many of them very remarkable—by the use of 'Scarpa's Oil,' have been published, but shis 'caps the climax.' Young or old may yet recover hearing. A lady in Smithfield, Pennsylvania, and now about 80 years of age bad been gradually getting deaf; for more than 40 years, so that it was next to impossible so make her hear conversation in the loudest tones of volce; Last winter she was induced to try 'Scarpa' Oil for Deafnéss.' It is only necessary to add that she has used two bottles, and that her hearing is perfectly restored—she is cured.

ed two bottles, and that her hearing is perfectly restored—she is cured.

Dearness Curen.—The following extract from a
letter written by Mr. Johnson of Baston, to a friend inthis city, is important.

The bottle of Scarpa's Oil for Deafness, that you
sent pic, with the wish that my daughter would try it,
has been used, and in its effects, have astonished all;
you know how very deaf she has been since she was
three years old—she inow hears quite well, but as the
medicine has all been used, I wish you to serie me an
other bottle, which I have every reason to believe wi
cure her entirely.—Times cure her entirely. Times.

COMSTOCK & CO'S Concentrated Compound Fluid Extract of

- SARS APARILLA. FOR the cure of Scrofula, Chronic Rhoumatism, Gencral Debility, Cutaneous Diseases, Scaly Equations
of the Skin, Tetter, Pimples or Pustules on the Face,
Liver Affections, Mercurial and Syphilied Diseases,
Biles, from an impure habit of body, Ulcerations of the
Throat and Leg. Pains and Swelling of the Bobes, and
all Diseases arising from an impure state of the Blood,
Exposures and imprudences in Life, Excessive use of
Mercury, &c.

An immense effort has been lately made to introduce
various compounds dalled "Extracts of Sarsaparilla,"
as positive and specific cure-alls. If we were to believe
the extravarant assertions of the adventurers who are
pushing them, all disease that "first is lieir to," can be
governed and removed by these wonderful "extracts."
Now, we want no customers to our articles but persons
of common-sense-artileast; and those who hive that
will find it impossible to believe these extravagant and
ridiculous assertions. Depend upon it then, if you get
COMSTOCK'S true-extract of the real Sarsaparilla, every disease that cambe cured by this and various other
roots that form the compound, will be cured by it. Such,
particularly, as Scrofula, Rhemastism, and all tidesease
of the blood, and particularly disease and suffering from
the abuse of mercury. Constrock's Sansanastica is
warranted as good as any in the city, and at flist hal,
the price of others, and in as large bottless viz:—50
cents per lottle, or §1 per dozen. Sut yourselves.—
To be found only af Comstok's Branch House, No. 2,

JOYFUL NEWS.

A lmost every disease that fiesh is here to may be cured by the timely use of OAKELEY COM-POUND LEPURATIVE YRUP. This may be proved satisfactorily to those who will call at any of the stores where this invaluable medicine is sold, by certificates (properly authenticated) of cures performed on individuals who had her all hopes of relief-certificates of Physicians who had the most severe certificates of Physicians who had the most severe cases under treatment, their patients having taken the medicine by their advice and been cured—certificates from the Prothonotary, Clerk of Orphans Court, Nofrom the Prothonotary, Clerk of Orphans' Ceart, Notary, &c., stating their acquaintance with persons of respectability and standing, who having the good of their fellow men at heart, have voluntarily come forward and given a statement of their case and its cure, for publication, &c. &c. The number of these certificates being too great for newspaper publication, the subscriber has deemed it advisable to have comp of the most important certificares properly authenticated, under seal, to be placed at the stores of agents, who have the medicine for sale, where persons afflicted with Scrofula or Kale evil White Swelling, Chronic Rheumatism, Teliti, Morcurial diseases Eruptions of the kin, Coupt of long standing or in cipient Consumption, size Head-ache &c. &c. may have an apportunity of ascertaining the names and residences of those who have been cured by its use, and who will be willing, if called upon, to give every information required. and who will be willing, it called apon, to give every information required.

As a more general evidence that this is no quack medicine. I would refer to the rames of the following well known physiciams, who have attested to its efficacy.—Dr. J. P. Hiester; Dr. J. G. Birch; Dr. Jno. Otto, Dr. H. H. Muhlenberg, Dr. J. E. orbor.
