SCHUYLKILL BARGES.

THE work of enlarging the Schuylkill Navigation from Philadelphia to Port Carbon, Schuylkill co., is now in active operation; and by the terms of the contracts, the enlarged Locks will be nompleted throughout the whole line, by the let of April, 1816.

This enlargement will change the old system of Boat Building entirely; Vessels of 150 to 200 tons burthen, cannot be althoun together as sucessfully as boats of 60 tons have been herelotore; and the experience of the understigned obtained by the closest scruliny while working on ressels of different discriptions—enables him to promise more efficient workinanship, combining the requisite qualities of Salting and Dbutther, to perfection of model, than any of his competitors on the Schuylkill River.

Persons wishing Barges, Steam or Sailing Vessels, under 105 feet in length, 18 feet in width, and 10 feet in depth, will find it to their advantage to patronise the subscriber—whose work will at all times be warranted to give satisfaction—under a forfeiture of ONE FOCETH the Contract price.
