Particular Notice.

WE are busily engaged in making out our bills up to the present time, and will be ready in a few days to submitthem to the inspection of those interested. All indebted will be called on shortly; but we would esteen it a particular favor if they would anticipate our visit by calling upon us. As a large portion of our time is necessarily occupied with our business, it is to be hoped that second and third calls, which are always more or legisuppleasant to both parties, with the always more or less unpleasant to some always more or less unpleasant to some personal rendered totally uncessary.

SERIOUS ACCIDENT .- On Thursday, while the first train was passing over the new road from Spayd and Luther's mines, Dr. Luther, who was standing on one of the cars, was thrown violently off. His head was severely cut and bruised by the fall, and for a time concursion of the brain was apprehended, but we have since been gratified to learn that that danger has passed away.

ACCIDENT AND DEATH IN THE MINES: -Of Wednesday, Henry Nimbleton, a miner, working in Mr. Ronaldson's mines, was killed by a full of coal in one of the breasts. He has left four children dependent upon the charity of the world.

DISTRESSING CARTALTY. -On Monday afterterneon, a horse attached to a wagon, in which were several persons, took fright on the Port Carbon road and ran; the men were thrown out with great violence, and one of them, Thomas Walton has since died from the injuries he received. He has left a wife and three small children entirely destitute of the means of support.

. SCHUTLELL HAVEN BANK .- The Commis suners met at Schuylkill Haven on Thursday Evening last, for the purpose of taking such steps as are rendered necessary for the opening of the Books to receive subscriptions to the stock of the Institution. The proceedings will be found in another column.

The Collector for the Borough is Mr. Henry Geisse.

Cutrcurs. In passing up and down Mahan atongo street, we have been frequently struck with the improved appearance of the Roman Catholic Church. It has been thoroughly altered, the front, the roof and the tower; and the old windows have given place to new windows of colored glass. This is a handsome gothic building, and at present much the largest church in the borough. The niterior alterations are more beautiful in design and finish than the exterior, and Mr. Monchessi (who painted the Philadelphia Exchange,) is now doing the cealing in freeco.

THE METHODIST DENGMINATION contemplate erecting a new church in the barough, which it is expected will be a handsome and substantial building.

THE CONGREGATION OF THINITE (EPISCOPAL) Chunch, also, have it in view to erect a new buil--ding on their lot in Centro street. If the plan upon which they propose to build it, is carried out it will be truly an elegant edifice. The dimensions are to be 65 by 100 feet, and the building will be in the middle style of gothic architecture.

THE POTTSVILLE SACRED MUSIC SOCIETY

will give a Vocal and Instrumental Concert, in the Methodist Church, on the 4th of July. This amateurs of the borough, and combines an unusual amount of superior talent. In addition to their own force, they will be sided, upon the occasion, by Mrs. and Miss Taylor, and Mr. Jacobs, of Philadelphfa, and Mr. Crosier, (the instrumental leader,) is, we believe, also from Philadelphia. Mr. Bedford, the vocal leader, is well known as a superior and scientific singer; he is distinguished for his expressive execution and correct taste. The Society have selected music from Handel, Hayda, Mozart, and other composers of equally eminent ment. Some of the sublime and unsurpassed passages from Handel's Messiah will be given.

and some passages which belong to the very highest order of composition from the Oratorio of Creation. They have exercised a judicious and discriminating judgment in making their principal selections from these three great masters, who seem almost to have exhausted all the musical wariety of nature in their efforts. Handel has aingular beauty and a charm of taste and sweetness. Haydn has a power and austained dignity, that irresistably engrosses the faculties and commands the attention. Mozart seems formed of the other two and combines the peculiarities of both-novely, sweetness, grace, power, beauty and intensity of expression; his music enchants and beguiles men. Our ewn knowledge of the skill and talent that belongs to the society, and the characters of the music in rehearsal, justifies us in promising the public a rich treat. We hope for the sake of the society, that the attendance will be large. We could hardly suggest a more pleasant and profitable way of passing a part of the great National Holiday, than will be afforded Kline, Esq., of Lebanon, committed spicide or by this Concert, and certainly the Society giving Monday. This is painful intelligence. Mr. Kline it, is laudable in its object and design, and merits liberal public encouragement. They have, we and ability. MINERSVILLE.—This enterprising borough is greatly improving, and perhaps no town in the ounty is increasing more rapidly in size and business. The great prosperity of the place is denoted by the unusual stir and activity which prevails, avery employment is busy, and all trades are thriving. The population has been vastly augmented, perhaps doubled, within the last two years, and rom present appearances. Minersville must soon within the coal region. The Coal shipments from week, and it is really curious in passing up the Wolf creek, to notice how closely the numerous collieries lie together, and the great activity of business at all of them. There are seven engines connected with breaking machines and draining numps now in operation on Wolf creek, just above the town, and two more are in process of erection, one by Mr. J. Taylor, who is sinking a new slope in a red ash vein; the other by Messrs. M. & P. Heilner, who are sinking a slope in a white ash vein. Mr. William Payne is also sinking a slope, and will erect an engine of sixty horse power on the Forest Improvement Company's tract, and Mr. Robert Adams is sinking a slope and erecting a sixty house power engine on the Lang tract, on the West Branch at the head of the Mine Hill Railroad. The Mine Hill Railroad Company are now engaged in relaying their road on the West Branch above Minersville, with iron rails, one track of the road, heretofore having been laid with wooden rails only.

About forty substantial houses have been built in Minersville this season, and numerous others are now in process of construction. Among the notable improvements is the new Foundry of Messrs. S. & W. Dellaven, now building. The Messrs. DeHaven are superior machinists, and so rapidly has their business increased since their location there, that they have found it necessary this year very considerably to enlarge their establishment. The numerous stores at Minersville are all doing a brisk and profitable business, and the evidencesof thrifty industry, and successful enterprise are visible in all parts of the borough.

We observe that the Whige in some of the counties of the State, are already making their bold industry among our friends in the different Senatorial districts. Let a strong effort be made.

We are informed that the County Comnissioners contemplate enlarging the Court house by extending it back about forty feet to the public buildings. This is objected to by a large number of the citizens of the county, as an expense altogether useless at the present time; they say that it would be extremely injudicious to tax the county with the cost of an enlargement, while the expediency of a removal is agitating the people, and the permanent location of the Court house is so uncertain. The enlargement is proposed, we understand, upon the basis of a report of the Grand Jury at the late term wherein they recommend that a safety vault be built in the Treasurer's office-and that the jail be made more secure. We are informed from a reliable source, in fact we have been told by members of the Grand Jury themselves, that the question of enlargement was not before the Grand Jury at all; nor did they once conceive that from their report it could be inferred that they deemed an oblargement necessa ry or desirable.

The Commissioners are only empowered to make alterations in the public buildings after they have received the sanction of the Grand Jury of the county, ratified by the Court of Quarter Sea sions-if without this authority they proceed to enlarge the Court house, it is believed by many hat they themselves can be held personally re sponsible for the cost of such enlargement. We have heard this opinion frequently expressed by those who deem the enlargement unnecessary.-But whether this is so or not, it would certainly be unwise to put the county to a heavy expense for improvements which are not required and which may prove useless. > THE BIG CHINESE LETTER .- The Washington Union announces the arrival at that city, of this singular document, addressed by the Emperor of Chine to the President of the United States. Its dimensions and particulars of composition, exceed any State paper that was averaddressed to our government. It is said to consist of a roll 7 feet I inch long, by 2 feet II inches wide. The writing is on a field of plain yellow silk, with a margin of silk of the same colour, embroidered in gold thread. The letter is in two languages, (Chinese and Manchu Tartar,) in characters of large size, and in perpendicular columns, which are separated in the middle by the imperial scalwhich is composed of Chineso characters, enclosed in a cartouche about 3 inches square. . A trial of the monster cun, which has been manufactured in Liverpool for the steam-frgiate Princeton, was recently made on the sands, between the Croshy and Formby. The firing commenced about eleven in the morning and continued with some slight intermission until three in the afternoon. During this time unwards of three tons of shot were discharged,—each shot weighing 219hs. The report was distinctly heard eight or nine miles distant. The experiments proved highly, satisfactory.

The Liverpool Albion, says that the gun was drawn by nine horses. On arriving at its rempo-rary destination, it was firmly embedded in the sand, and the muzzle, which was pointed out to sea. was slightly elevated in a line above the surface of the water. The first ball, weighing 219lbs. was then "driven home," the gun being charged with 30lbs. of powder, and the first shot was fired at 10 o'clock, in the presence of about five hundred

spectators.
The second was the trial shot. Two balls, each weighing 219lbs. were "driven home:" 45lbs. powder being the charge. This shot was equal satisfactory: The report, of course, was terrific, but the gun withstood the shock, and thereby proved that it had been manufactured on a princio'e and with a material which resider "bursting durost, if not altogether an impossibility.

The project of uniting the Atlantic and Pacific Oceans is in a fair way of being carried out. Little has been said during the last fort night,

in the Parisian journals, on American affairs; buin the few articles that have appeared, a very decided opinion is expressed, that however menacing the Oregon question may appear it will be settled amicably, the United States and Great Britan, both having an immense interest in the preservation of peace.
