"Astonishing as it may appear, all the 51 year were votes of Democratic members, whilst the Coons skuthed the vote, and thus tacitly acknowledged their opposition to the Tariff of 1812, upon which they have besition to the Tariff of 1812, upon which they have be-stowed the strongest approbation. Such is Coonery— such the duplicity with which they attempt to deceive, the people! Who, now, we ask, can credit their pro-fessed friendship for the Tariff! Who can view that party in any other light than that of hypercritical pro-fessors, whose only aim is to effect their own selfish purgoes by blind and unjustifiable opposition to the measures of the Democratic party! Destitute as the Coon party is of all settled political principles, it is hardly to be expected that the leaders of the party should remain any length of time in the advocacy of a particular measure. Therefore, after all their hollow professions of attachment to the Tariff it is not surpriparticular measure. Therefore, ther all their hollow professions of attachment to the Tariff it is not surprising that their party members of the Legislature are now found in opposition to that which they not long since boastingly claimed as their own darling measure. This is but a fair specimen of Bhiggery, and seems as a case in point' to prove one of repeated declarations with regard to the hypocritical devices of that party."

THE TABLES AND OBESON,-The Foreign ews by the Cambria, an abstract of which will e found in another column, is of an extraordinary and astounding character. It confirms the suspicions entertained, that an intrigue has been going on and probably consummated by the American and British Cabinet, by which the Oregon question is to be unicably settled at the 49th degree, under the consideration that our Protective policy is to be destroyed. Our Secretary of the Treasucy, "Sir Robert Walker, Earl of Mississii pi," as he has been styled in Congress, by one of his own party, a Tariff man, absolutely transmitted his Anti-Pariff report, a document of upwards of 950 pages, to England, where it was introduced into the House of Lords, by Lord Monteagle, and or derest to be printed, and that too before the printed copies of the document had been sent to Congirss, for the use of the Members. This is a most extraordinary proceeding-one that could grarcely have been credited if the fact had not been disclused by the proceedings of Parliament; Every high-minded and honorable American ought to blush with shame at such a proceeding, but according to the following extract from the Washing-

ton correspondence of the U. S. Gazette, Mr.

Walker rejoices at his success: "I understand that "Sir Robert Walker" is highly elater by the honor conferred upon him by the printing of his Report for the use of Parliament. I cannot see that he has any reason for self-glorification on this account; it is customary to print all important British reports for the use of members of Parliament, and I do not see why Sir Robert Walker's should have been an exception. Probably the reason why no report of any degree of enthusiasm throughout the whole country. American Secretary of the Treasury was ever printed by the British government, was because it did not advocate British interests. Irony aside, Mr. Pulk, Mr. Walker & Co., have now fairly started a BRITISH PARTY, the party which advocates British interests, and placed themselves at its head. Opposed to this party and to them, is the AMERICAN PARTY, which advocates the fostering of Amétican interests and the prolection of American labor. Their motto is Congress take care of labor, and capital will take care of itself." The policy of the Burtisu Paurr is to reduce the wages of labor down to the standard of the half-fed, half-clothed and halfhoused labor of Europe; for such will be the inev-We regret being called upon this week to stable effect of unrestricted trade and commerce ennounce the death of our lamented follow citizen; between this country and Europe. ARRIVAL OF THE CAMBRIA. Great Changes in the Commercial Policy of England-Repeal of the Corn Law-Tri-umph of Free Trade. PACIFIC NEWS!!!

The Cambria arrived at Boston, on Thursday morning, last, and brings dates to the 4th inst. The news is gratifying in its nature, and peaceful in its aspect. Our selections will show what has been done in Europe since last advices, and the general bearing of all the great movements. Parliament has assembled. The Queen's mes-

sage is entirely pacific. Expressions of regret are made that the difficulties between that country and the United States, relative to Oregon, are ye unsettled. The steamship Cambria, commanded by our

execulent and esteemed friend. Captain Judkins. takes out to-day the most important and gratifying intelligence that ever left the shores of Great Britain: -Sir Rotert Peel-England's powerful and brilliant Minister-has developed his future commercial policy. It is at once simple and compre-bensive; and under its operation tho exchange of commodities between this country (England) and the United States will be carried to an extent, and will be mutually productive of advantages, greater, volume-"than the eye hath yet seen, or the heart derson, Sullivan, Williamson, Sherwood, Speaker hath conceived." The new scheme embraces, with a full sense of their importance, the principles of free trade-repudiates all protection for commerce, manufactures, and agriculture ;admits corn duty free, at the end of three years, with a scale, in the interim, which will probably oscillate between four and six shiltings per quarter, and at petitions of certain citizens of Schuylkill county ence admits Indian corn and buckwheat free of all asking for a Commission to inquire whether the duty whatever. To the details of this great measure we earnestly entreat the attention of our commercial readers. We beg to refer them to the speech itself, and to our remarks upon it. Great Britain, at the present moment, is in a blaze of excitement; men talk and think of nothing-else; they have set their hearts upon securing the great fiscal scheme, for the regeneration of the country, which the sire to curtail the period fixed for the total extinotion of the Corn laws. The friends of peace and progression, on this side of the water, hope-earnestly and sincerely hope-that the new policy will bind America and us by the ties of amity, brother hood, and interest, and that the miserable squabbling about a barren waste will give way to more liberal, civilized, and comprehensive views.

We can do little more than indicate in this place, currente calamo, the primary heads of the scheme. Sugar,-that great varticle of Colonial produce, which next to the corn laws, has been most viru-lently assailed on account of the tenancity to which the Minister has clung in screening it from' competition-is still to be more or less protected. Slave grown sugar he still regarded as an abomination; but the duty on foreign free labor sugar is to be reduced 3s 6d. per cent. The Corn laws he proposes to abolish totally and unconditionally, on the first of February, 1849, and in the mean time a modified sliding scale is to be substituted

for the time at present in existence. 484 and under 494, nine shillings and so on, the duty declining Is, with a rise in the price of Isi, the German Governments than the German Ca-

The members continued arriving in rapid succession until half past four o'clock, when the House presented a striking and exciting scene-980 not only the body of the House, but the side galleries also, being completely crowded. Indeed, there has not been so full an attendance of mem-6.000 bers for many years, even during the debates of 21,000 Sir Robert Peel's Corn-law Bill, in 1842, or the no less important discussions on the Twiff. Sir Robert rose at a quarter to five o'clock, and the hum of conversation which had resounded through the house was instantly husbed. The right Hon Baronel spoke in his firm and manly tone; but his statement was received with coolness by the majority of members on his own side, and he was indebted almost entirely, to the oppositionists for the cheers with which some of his sentiments and declarations were greeted. At the conclusion of Sir Robert's statement; many of the members left the House; and those who remained relapsed into their usual listless indifference during the brief

Sir Robert, Peel and Lord John Russel, have both censured the conduct of their Minister, Mr. Packenham, in rejecting the offer of settling the Oregon question, by fixing the boundry at the 49th degree, without first communicating the same to the British Government.

The following are the articles on which it proposed to make free and reduce the duty:

cated in the report of the American Secretary of State, has commanded much attention in the Britich Parliament. Sir Robert Peel spoke highly would be the only species of advance freights to introduced the new Tariff; and subsequently, at the request of Lord Monteagle, the Government consented to reprint the document, and place it on the tables of both Houses of Parliament-an honor which was probably never awarded to any similar

document before. All these facts prove the desire which the British Government has to make our future relations with the United States as amicabl and business-like as possible.

DRELDFUL SHIPWRECKS .- Recent accounts bring tidings of dreadful shipwrecks. The Montreal a trader between London and Quebec, was lost on the 14th of January, near Cape Chat, and every soul on board perished. The Saxon an Ameri can packet bound to London from Boston, is believed to have foundered on the 17th, on a reef of ocks called the Ledges, near Read Head. The Laurel, of Quebec, was lost off the coast of New foundland, by coming in contact with a field of ice; happily, the crew were saved. The ship Cambridge, from Liverpool, took off the crew, thirly-two persons, from the Lord Lynedock, in a inking state. Lloyd's books record the loss of the City of Shiras, in the Mindora Sea, with forty persons drowned; the wreck of an East Indiaon, and other calamities.

FRANCE. M. Guizol has noticed the remarks of Mr. Polk' essage relative to War and Texas.

M. Guizot had accordingly felt surprised at the anguage use I by the President in his message, and he had considered it his duty to claim in reply for France an entire independence of action. next examined the commercial reasons which had induced France to recognize the independence of Texas, in 1838, and rendered her anxious to mair to quote not irreverently, the words of the sacted | tain it in 18,15 | The political considerations had been of a still greater weight. There were at pres ent, he said, three powerful nations intent on ag grandizing beyond measure, their territories-England, Russia, and the United States.

France was not extending her dominions. In Africa she had made a conquest it was her hono and interest to preserve, but the bounds of which she would not overstep. It was of the highes importance to France that those three nation should balance each other's power, and that non of them should obtain a preponderating influence She was consequently interested in protecting th independence of the American States.

In the discussion on the address in the Cham-ber of Deputies, the United States and Texas have like vise came in for a good deal of observa-Hon. They were first brought forward by no less Premier has laid before Parliament, and they de a personage than M. Thier, chief of one of the opposition sections of the Chamber-one of the mos cloquent prators and most eminent statesmen o ne country, and formerly minister of foreign affairs He observed that it appeared to him, from the remarks in the Piesident's message, that the United States were dissatisfied with the Texas affair, and thoreby offended the United States. By the attitude they had taken, they had rendered it impossible for the United States to consent to allow them to arbitrate on the Oregon question. They had thereby committed a great fault-a great in justice to the United States, and had even cudan gered the peace of the world. This speech, which was remarkable for its eloquence, created an immense sensation in the Chamber. M. Guizot replied to it at considerable length. GERMANY.
