Valuable Coal Tracts to Rent.

TO THE PUBLIC!! IN PRESENTING this valuable medicine to the pub-lice as a remedy for Consumption, and Pulinonary. Discasses in general, I have been actuated solely by the prest succes attending its use in my own immediate melphonismed, and a desire to benefit, the afflected. I shall simply endeavor to give a brief statement of its usefulness, and driver myself that its suprising effica-ey will enable me to furnish such proofs of its virtues as will satisfy the most incredulous, that CONSUMP-TION may and "CAN.BE CURED," if this medicine is resorted to in time. As Consumption, however is a disease which differs much in the severity of its symp-oms, and the stipidity of its progress, and has long baf-died the skill of physicians it cannot be supposed (flat this or any other remedy is capable of effecting a cure in every case and in every singe of the disease; on the contrary, we must expect it to fail sometimes, a circumstance which occurs daily, with all the most val-uable remedues use posses, for the most simple diseas-es. The proprietor submits the following testimonials in its favor from citizens of this County well known to the public. MR.W.J. Haas.—Having been afflicted for the just Valuable Coal Tracts to Ront. 7 Ote on lease, to suit applicants, all that tract of I hand belonging to the North American Coal Co., known as the Mill Greek Tract, containing the fillow-ing list of Goal Veins, hany of which, -auong others, the Peach Mountain Veins-having a ranze of over a mile in length, viz - Lewis, Spohn, Barracheuch, Pearson, Clarkson, Stevenson, Little Tracey, Feath Mountain Veins, Green Park or thyensdale Vein, Per-pendicular, Diamond, and Brg Diamond Veins, along with many others not named. Also, all that tract called the Junction Tract, bilong-ng to the said Company, containing the Salem, Forrest, Rabbit Hole, Mortimer. Tonnel, Black Mine, C. Law-ton and Aiffed Lawion Veins. Also, a Saw Mill and Gries Mill, situated on the Mill Creek Tract, all of which will be reined on underate terms by applying to 1. Patterille, Feb. 21

Having the superintendance of the Works myself, I feel canfident it, would be to the interest of persons wanting any of the above named articles, to call be-fore purchasing elsewhere, as i will warrant the work-manship, and will be prompt to do work at the time work manship, and will be prompt to do work at the time production of markets some now antiopate. Tamaqua, May 6, 1846. 19-6mo The true policy of his country is a more equal division of labor, so rs to prevent such large sums from leaving the country to pay for our imports. We must manufacture more, and thus make a home market for our naw material. The workmen who make these \$52,000,000 of imports must be fed here, and be taken from the producers of grain to be consumers, thus enhancing the frice of grain in two ways: first, by decreasing production, and next, by increasing its consump-non. In short, we should in our intercourse with

other nations, pursue the course adopted by all good farmers, and that is - never to buy from foreigners what can be made as well at home.--Newburg Gozette.

Tunnirs,-It is too early to sow the fall crops of turnips, but not too early to begin to make preparations. Begin therefore, at once to accuate manure-and as turnips delight in a thoroughy pulverised soil, proceed immediately to plough up the ground you intend for a patch,-plough har.ow and roll it-let it remian until about the 223 irst, then m nure it with good, well-rotted manure in the proportion of 20 double horse cart loads to the scro-plough this deeply in, then spread a mixture of

10 bushels of powdered bones, 20 " of Ashes, and 2 " of Sait, per acre, harrow it in; then sow your turnip seed,

harrow it in with a very light garden harrow, and

finish by rolling. Before being sown, the seed should be snaked

for 12 hours in fish oil, then drained and dried in

plaster, ashes, or lime, as taken out of the oil to

To prevent the ravages of the turnip fly-so

soon as the plants come, up go over the ground with a mop, and sprinkle fish oil over them.— This done, strew a mixture of plaster, lime, Scotch

snuff and flour of sulphur over them, Repeat this

each morning until the plants get into rough leaf. A bushel of plaster, 1 of lime, 1 lb. Scotch snuff

and 21bs, of flour of sulphur, intimstely mixed together, will be sufficient for an acre-and we feel certain, that, if our recommendation is strict-

ly followed, neither the Fly nor Fles, will molest

The best time to sow turnips is about the 26th

of July, and the seeding may be continued up to the 10th of August; but we think it desirable to

sow between the the 26th of July, and the lat of

to learn, fro nthe specimen of pots, os, that the fell disease is already at work, thus early, among this valuable esculent. It is evident from the spe-cimen before us, that the commencement and pro-gress of the disease, have been as they have gen-erally been beginning in the left the sector.

erally been, beginning in the leaf then effecting the stalk and passing downward into the potatoe.

These loaves are much affected, the stalk slight-ly, and on the polates the disease is perceptible, on close inspection; the appearance being similar to iron rust. We have some accounts, and only

a few 'comparatively, of the disease commencing in the stalls near the potatoes. In such cases it
