Clippings.

A Saussen Bar, - a f iend tels us the follow ing which he considers a good 'un.

Being in a mechanic's shop, the other day, at richin came in, his dress covered with mud -His father, observing his dirty plight, said to

him-William, my son, how come you to muddy your dress so ?' The boy stopped a moment, then looking hi father in the eye, very solverly asked—Father what am I made of ?!

'Dust. The B.ble says, 'Dust thou art, and. unto dust shalt thou return." Well, father, if I'm dust, how can I help being muddy when it rains on me!' William! go down stairs and get some wood,

RANK IN THE ARMT OR, A DARKET'S DIG SITE—After a portion of the troops had landed on the beach near Vera Cruz, on the might of the Spring Garden Mutual Insurance 9th of March, a body of the everny commenced : brisk fire of small armainto the encampment. Of course, all hands were on the qui vice expecting the Mexicans would make some demonstration upon our lines during the night, and when the firing commenced, concluded there was about to be a general attack. The lines were soon farmed and not a worll could be heard from the feeldiery. but there was a negro who kept running from one little point of hill to another, apparent y in a state of great excitement. He finally hid him-self flat on his face, and commenced working himself into the soft sand with a good deal of caergy. On being asked what he was about? he replied, I is fraid some ob dom fere coppor balls will put a stop to me drawin my rashins. Why, asked the party speaking to him, don't you get up and fight them? No, siece! he said, days my and fight them ? massa's part ob de biziness; he done been to West-pint, where dey makes fightin' people to learn dat, and you don't ketch dis nigger med l'in bessef-wid oder people bizness. My massa dies de fightin' an' I waits on him and nasses him. If he gets wounded we gets promoted . You get promoted! What good will your promotion do you! inquired the individual. Oh, dat question s been settled long time ago in des parts down here; a colored gemmen what wads on a kurnel always outranks one dat wai's on a capten, an' de way we colored gemmen regulars makes desc volunteer niggers equat is a caution to whate

A Lapr's Agra-A lady the other day was asked by an envious femile acquaintance, her Really, said she, I do not know, but I must be about thirty.' It is very extraordinary, replied the other, with a successional you do not know your age.' I never count my years,' said the lady; I am not afraid of loosing a single year; none of my female triends will rob me o

A Good Scour .- There fixed lately in one of the mountainous counties in Western Pennsylvania many Germans, and among them one Henry Shnyder; and there were likewise two brothers, called George and Jako Pulwaer—they were all rich, they each owned a stalling Henry Shryder was subject to his of decangement, but they were not of such a nature as to resider him disagreeable to any one. He merely conceived himself to be the Supreme Ruler of the Universe; and, while under the infituation, he had himself a throne built, on which he safte try the cause of all who offended him; and passed them off to heaven or hell, as his humor prompted—he personating, both Judge and culprit.

It happened one day that some difficulty occur-red between Henry Shoyder and the Fulwilers, on account of their mill; when, to be avenged, Henry Shnyder took along with him a book in which he recorded his judgments, and mounted his throne to try their causes. He was heard to pass the following judgments. Having prepared himself, (acting as Judge and

yet reponding for the accused,) he called George Fulwiler. Shorge Fulwiler, stand up. What hash you been doin in dis lower world?

- Ah! Lort, I do singt know. Well, Shorge, Fullwilge, his nt you, got a Yes. Lort, I ha-h.

Well, Shorge Fullviller, did ut you never take too mucli toll ?" Wes, Lort, I hash-when der water was low und mien stones Wash dull. I take a leetle too Well, den, Shorge Fulwier, you must go to

der left, mid der goats. ·Well. Shake Fulwiler, mow you stand up, What you been doin in dis lower world !' [The trial proceeded throughout precisely like the former, and with the same tesuit,]. 'Now I tries mineself. Henry Shnyder! Henry Shriyder! stand up. What hash you been doin in dis lower world!" 'Ah! Lort, I does' not know.'

Well, Henry Shnyder, has ut you got a mill? Yes, Lort, I hash? Well, Henry Shnyder, didn't you never take too much toll? 'Yes, Lort, I hash-when der water wash low und mien etones wasn, dult, I hash taken a leetle too much toll.

But, Henry Shnyder, vat, did you do wid der *Ah! Loit, I gives it to de poor. (Pausing.) Well Henry Shnyder, you must go to der right der sheep; but it is a tam tight

POSITIVELY A SHOCKING IDEA. - Passing up street, a few days ago, we were met by an old lady, whose countenance betrayed symptoms of anxiety., She had been reading the latest news from the 'war.'
'Friend,' said she, do you think there is any

danger of Mexico being taken into the Union ! "Guess not," we replied; at might be taken in Well' says she, I am opposed to annexing it

to the Union, in any shape. 'Ah, why so?' we inquiring y responded. Why, said the old dame. I am dreadfu

afeered of airthquakes, and don't want such things to come into the United States." . We thought the idea pretty good the positively shocking for contemplation. The old lady shulldered at the thought and then we sepcrated.

A fellow went into the St. Charles, on Thursday, and called for a brandy toddy. After taking it and diving pretty deeply in the lunch, he was going away, when the harvesper reminded him that he did business on the cash principle. Oh—ah—excuse me, John, said he, the fact is, the fog came down so heavy this morning that I could

not raise a dime. There is a man of so strong peace principles in our city, that he will not have a clock in the house because it strikes.

A g'hal of forty fainted on being asked by a spruce widower to become the mother of his children.

GRAMMAR LESSON Timothy, explain the Pie possessive case is when any body's got any thing."

Very well. What is the sign of the possessive It's an apostle at the end of a crooked S.' Very clear indeed. Now please to give me an example.

Yes sir. To avoid having the saufil s the carmen button down their hurse's nose's." It was not had proof of the pirty of traders in a neighboring city, quoted by a wig that

most of them were known to "trust, in Prov."

WEAVING ESTABLISHMENT.

REMOVAL.

THE subscriber has removed his Weaving Establishment to the next door plove the North-west corner of Centre street and the Minersville Road, nearty opposite Mr. Ber's Eagle Tavern, where he has erected a convenient building for his looms, and will be very happy to accommodate his old customers and the public generally, with Woollen Fiannels, Listings and other Carpets. He returns his sincere thanks to the public for the liberal patronage he has received and hopes by being punctual, careful, and attentive to merit their future favors.

for \$65.50 they would receive \$5000 should be die in one year.

JANLARY 20, 1845.

THU Managers of this Company, at a meeting held on the 27th December ult., agreeably to the design referred in the original prospectus or circular of the Company, appropriated a Bonus or addition to all policies for the whole of life, remaining in force, that were issued prior to the 1st of January, 1842. Those of them therefore which were issued in the year 1836, will be entitled to 10 per cent upon the sum insured, making an addition of \$100 on every \$1000. That is \$1400, will be paid when the policy becomes a claim instead of the \$100 originally insured. Those policies that were issued in 1837 will be entitled to \$2 per cent, or \$57.50 on every \$1000. And those issued in 1838, will be entitled to \$7 per cent, or \$75 on every 100, and in ratable proportions on all said policies issued prior to 1st of January, 1842.

The Bonus will be credited to each polocy on the books endorsed on presentation at the Office.

It is the design of the Company, to continue to make addition or bonus to the policies for life at stated periods.

B. W. RICHARDS, President.

JOHN F. JAMES, Actuary.

H'ALLISTER'S ALL-HEALING OINTMENT

INSENSIBLE PERSPIRATION.

THE preceding figure is given to represent the Ixsensible Perspirators. It is the great EVACUATION for the impurities of the body. It will be noticed that a thick cloudy mist issues from all points of the surface, which indicates that the perspiration flows uninterruptedly when we are in health, but ceases when we are sick. Life cannot be sustained without it. It is thrown off from the blood and other juices of the body, and disposes by this, means of nearly all the impurities within us. The language of the Scripture is, "In the blood is the Life." If it ever becomes impure it may be traced directly to the stoppage of insensible Perspiration. Thus we see all that is necessary when the blood is stagnant or infected, is to open the pores, and it relieves itself from all impurity instantly. Its, own heat and vitality are sufficient, without one particle of medicine, except to open the pores upon the surface. Thus we see, the folly of taking so many internal remedies. All practitioners, however, direct their effects.

cle of medicine, except to open the pores upon the surface. Thus we see the folly of taking so many internal remedies. All practitioners, however, direct their efforts to restore the insensible perspiration. The Thompsonian, for instance, steams; the Hydropathist shrouds us in wet blankers; the Homepathist deals out infinetesmals; the Aliopathist bleeds and doses us with mercury; and the blustering Quack gorges us with Pills! pills!! pills!!!

To give some idea of the amount of the Insensible Perspiration, we will state that the learned Dr. Lewenhock ascertained that five-rightlis of all we receive into the stomace passed off by this means. In other words, if we cat and drink eight pounds per day, we evacuate five pounds of it by Insensible Perspiration.

This is none other than the used up particles of the blood, and other juices, giving place to the new and fresh ones. To check this, therefore, is to retain in the system five eights of all the virulent matter that nature demands should leave the body.

It is by stopping the pores that overwhelm mankind with coughs, colds and consumptions. Nine-tenths of the world die from disease induced by a stoppage of the Insensible Perspiration.

Let me ask, now, every candid mind, what course seems the most reasonable to pursue to instop the pores after they are closed? Would you give thysic to unstop the pores? Or would you apply something that would dothis upon the surface, where the clogging actually is? And yet I know of no physician who makes any external application to effect it. Under these circumstances I present to physicians, and all others.

M'ALLISTER'S ALL-HEALING CINTMENT,

these circumstances I present to physicians, and all others,
M'ALLISTER'S ALL-HEALING OINTMENT,
OR, THE WORLDS' SALVE.

It has the power to restore perspiration on the feet, on the head, around old sores, upon the chest, in short, upon every part of the body, whether diseased slightly or severely.

It has power to cause all external sores, serofulous himors, swin diseases, poisonous wounds, to discharge their putrid matters, and then heals them.

It is a remedy that forbids the necessity of so many, and deleterious drugs taken into the stomach.

It preserves and defends the surface from all derangement of its functions. The surface is the outlet of five-eighths of the bile and used up matter within. It is pierceffwith millions of openingsen relieve the intestines. Stop up those pores and Death knicks at your door. It is rightly termed All healing; for thepe is exarely a disease, external or internal, that it will not benefit. I have used it for the last '14 years for all diseases of the chest, consupprion, liver, involving the utmost danger and responsibility, and I declare be fore fleaven and man, that not in ond single case has it failed to benefit, when the patient was within the reach of mortal means.

I have lead physicians, learned in the profession, I

means.

I have had physicians, learned in the profession, I have had phinisters of the Gospel, Judges of the bench, Aldernien and Lawyers, gentlemen of the highest rudition, and multitudes of the poor use it in every variety of way, and there has, been but one voice—saying McAllister, your Ointment is good. CONSUMPTION.

Clover and Timothy Seed
Canary & Hemp Seed for
birds,
Summer Bulbous Roots,
Dahlias, &c.
Hoes, Garden spades and
Canary & Hemp Seed for
Button Seed for
Lit can hardly be desdited littat a salve can have any
effect upon the lungs, seated as they are within the sys
tem. But, if placed upon the chest, it penetrates the
lungs, seperates the poisonous particles
that are consuming them, and expels them from the system.

I need not say that it is curing persons of consumption continually, although we are told it is foolishness. I care not what is said, so long as I can cure several thousand persons yearly.

HEADACHE The salve has cured persons of the headache of 12 years standing, and who had it regularly every week o that voniting often took place. I Deafness and Ear-ache are helped with like suc-

RHEUMATISM. It removes almost immediately the inflamation and welling, when the pain ceases. COLD FEET.

Consumption, liver complaint, pains in the chest or side, falling off of the hair, one or the other, always acrompanies cold feet. It is a sure sign of itsease in the system to have cold feet. The salve will cure even the system to may come acry case.

In Scrofula, old sores, erysipelis, salt rheum, liver complaint, sore eyes, quincy, sore-throat, bronchitis, broken or sore breast, piles, all chest diseases, such as asthma, oppression, pain—also, sore lips, chapped hands, tumors, custaneous eruptions, nervous diseases, and of the spine there is prebably no medicine now known, so go

SCALD HEAD.

**Theory and cases that actually defied every thing the state of the

We have cured cases that actually defied every thing known, as well as the ability of 15 or 20 doctors. One man told us he had spent \$500 on his children without any benefit, when a few boxes of the Ointment cured BURNS.

It is the best thing in the world for Burns. (Read the directions around the box.)
WORMS. If parents knew how fatal most medicines were to children taken inwardly, they would be slow to resort to them: Especially, merturial lozenges, and middi-cated lozenges, 'vermituge' pills, &c. The truth is, no one can tell, invariably, when worms are present. one can terk invarianty, when worms are posent.—
Now kit me say to parents that this salve will always
tell if a child has worms: It will drive every vestige
of them away. [Read the directions around the box.]
There is probably no medicine on the face of the
carth at once so sure and so safe in the expulsion of

CORNS. Occasional use of the Ointment will always keep corns from growing. People need never be troubled with them if they will use it. JAMES MCALLISTER & Co.,

Sole Proprietors of the above medicine. CAUTION.

As the All-healing Onlinent has been greatly counterfeited, we have given this caution to the public that motherinent will be genuine unless the names of James McAllister, or James McAllister & Co., are written lcAllister, or James McAmbies & Arthur of James McAmbies & Price 25 cents per box.

Pottsville. FLOUR & FEED BUSINESS. At William Major's Old Staud.

FORRER & SEILER ly medicine.

SWAIM'S COMPOUND SYRUP OF WILD CHERY For Consumption, Coughs, Cloups, and all Pulmonary liseases.

A NNOUNCE to their friends and the citizens of Schuykill County, that they have purchased the stock of Wm. Major, and will continue the FLOUR & FEED BUSINESS at his old stand, where they will constantly keep on hand superfine. Flour, Grain, Oats, Chops, &c., embracing all those articles generally kept in that line of business, which they piedge tremselves to the public they, will sell at the very lowest rates, and respectfully solicit the patronage bestowed on their predecisor, and of the public in general.

Ap 2, 1847. Philadelphia.

TO CAPITALISTS & OTHERS. 2 Pennsylvania Coal & Iron Lands,

For Sale.

1671 AGRES 19. Perches and allowance of 6 per 1671 cent. of first rate farming Lands, located in Jen's Township, Jefferson county, finely Timbered and Watered, and having several Millsites upon them. Two main roads run through the lands, and improved Farms adjoin, while. Saw and Grist Mills are in the immediate neighborhood. This land was selected by a gentleman of experienced judgment, and is considered by judges to be one of the best tracts in the county. Its proximity to the Clarion and Allegheny rivers, and númerous, navigable streams, and the proposed Raitroad to Pirtsburg and Erie, renders it highly desirable as an investment at present prices.

Abounding in Iron Ore and Bituminous Coal of, fine quality, it is believed to present one of the most advantageous lovations for Iron Works in West Pennsylvania. The present owner purchased with a view of erecting such, Works, but engagements in another quarter obliges him with great reluctance to forego his intention. Maps will be shown, and every information given by the undersigned. The lands are patented, and the titles and quality will be warranted, and sold free and clear of all incumbrance.

free and clear of all incumbrance.

COWS FOR THE DAIRY.

Good dairy cows are produced by something like the following management:

In the first place, the animal must be one constitutionally disposed to milk. Milking qualities are as much, or more, peculiar to individuals, than fattening qualities. There can scarcely be said to be a breed of milkers, unless the Ayreshire cattle are named The English cattle have been bred for fattening, and not for milking; and hence a breed of milkers is to be raised up among us, if we are to have one. Individuals may be selected here and there, which may be bred from, and dai-

ry. cows obtained; Then they must be fed evenly. Not much will be effectually done in this line, without cultivated grasses; such as afford a supply of succulent feed, not only for three or four summer months, but from winter to sunimer, and from summer to win-ter. The great sloughs of spring and autumn must be bridged over with grass. Then pure wa-ter and pleuty of it, constant milking, and kind, gentle treatment, will do the work of two-thirds. or a little more or less, as the case may be, of the

The winter treatment is simple, but equally imperative. If cows give milk in the winter, they require to be kept warm. A milch cow cannot bear cold like one not in milk. The continual drain of the secretives, has a reducing tendency on the system. Cows, whether in milk or not, should be fed clean bright hay, and have plenty of water, which can be got at often. It is some-times the case that this water is too cold, expecially for milch cows—sometimes causing swellings in the udder, and hindering the flow of milk. If water is unavoidably cold, cattle ought to have free access to it, so that they will drink but little at actime. In addition to the folder given to cows in winter, the question arises, what is the best extra feed for them. We believe that there can be none better than corn, fed in small quantities. It is the best ground, and for those giving milk, should be sed at the rate of from a pint to a quart-should be sed at the rate of from a pint to a quart of meal per day, in a pail of slope, If the farmer sees no difference during the winter, he will see it in the spring; cows so fed will come out of the winter lifty per cent, better than those fed sim-

ply on hay. As a summer feed for milch cows, perhaps the very best is rye meal; or if easier obtained, oil meal. This may be fed at the rate of a quart per day, from March to June-then a pint in a pail of slop will be enough till October, if grass is plenty. Let these rules be adhered to, and we shall

soon hear of dairy cows and plenty of them.— Prairie Farmer.

DAINT HUSBANDUY.—England has long been celebrated for its, dairy products, and they are often of a superior description.

Butter.—The butter in England is, much of it, delicious, especially that which is made in private families, where it is churned from new and sweet cream every morning, and brought fresh from the churn to the breakfast table; and more particularly when the butter is made from the cream of an Alderney cow. The common market and shop butter, however, is of the same various character with that in our own markets, with no larger pro-portion of very excellent butter than is to be found in the markets of Boston, New York, and Philadelphia. Indeed, much of the butter found in the market of the last named city, for its freshness and deliciousness, is nowhere surpassed. The butter in England is generally sent to market fresh, and you are left to salt it at your pleasure as you use it. The salted butter, in tubs or firkins, is mostly imported from Ireland or the continent. Even this, however, is not heavily salted. In most of the markets a good-deal of butter made from the wifey of cheese, is sold at a reduced price. It is of inferior taste and quality, and is bequality by the poor, or to be used in cooking. where, like a good many nameless things, it may

b. thoroughly disguised, and pass without detection. The Dorsetshire butter, which stands at the head of the market, comes packed in neat casks of about thirty pounds each; but is very lightly salted, and of course will not keep long. It is likewise sent up to London in lumps, perfectly fresh for the table. Its quality is excellent. The table

butter, likewise, from Epping, and especially, Ayle-bury, is of the best description. The Devonshire butter is almost universally made by first heating the milk, just so much as to cause the escape of the fixed air. In twelve hours. the cream is all brought to the surface, and in a state of consistency to be easily taken off. It is a disputed point, whe her as much butter is obtained in this way, as by the ordinary mode of leaving it stand, without being heated, a much longer time. The butter is thought to acquire in this way a peculiar taste, but it is by no means unpleasant. The skimmed milk remaining is perfectly sweet, and appears the richer for being heated. In this way sobtained the famous clotted cream which is to be

found on the hospitable tables of Devonshire, and is a great luxury. Glass milk-pans, made of bottle glass, are much ipproved, and with proper care, are in no danger of being broken. They recommend themselves by their cleanliness and incapacity of rust, or corrosion, or decomposition. In some dairies I found shallow leaden troughy used for setting the milk. with a tap at the bottom, so as to draw the milk off and leave the cream. Some persons maintain that the more shallow the pan, the more cream in proportion will be obtained; but in a large dairy in Scotland, the milk is always set In deep casks, and tubs. Such is the diversity of opinion everywhere prevalent. The Scotch had no fears that the cream would not find its way to the surface unless the principle of gravitation were to be reversed. One of the best dairy women in the country never suffers any water to be applied to the butter when taken out of the churn, a practice

not uncommon. INDIAN CORN PLANTED FOR FORDER. Malcolm Little, Jr., of Tyre, planted a single here of corn in drills, two and a half feet hy eight inches apart. All the labor he restowed on the growing corn was to plow between the rows with a shovel plow, twice, before the corn had attained the height of six inches. He cut and cured, in August, six tons of small edible stalks, encumbered with many small nubbins of corn. He values the fodder more than hay. It is bound in bundles, and stood in the field until late in the fall. Now let every farmer plant an acre or two of corn for folder, as soon as his spring work is over, as we may with good reason anticipate a dry season and a short crop of hay. The usual quantity of rain that has fallen the past year, pre-supposes a coming year of drouth, trying to the plants; work among them the more, and if possible while the

dew is on .- Gennessee Farmer. FARM WORK .- Beans of all kinds may Lo planted from the 20th to the last of May, and they often yield well when they are planted as late as the 10th of June, but more risk of frost is run.-The bran is so sensitive that a slight frost cuts the vine in May, and it is not prudent to plant

whites are best. Squashes, pumpkins, cucumbers, water melons, muskmelons, &c., should not be planted till after. the middle of May; and the 20th of the month is soon enough. Under glass, or under coarse cotton cloth, these vegetable are planted earlier. *Indian corn, that rich and most productive of the cereal plants, ought to commence its growth TERIMS:

For board, including light &c, and tuition in all the branches of the English course per session of five months.
