KICKING COWS .- Some farmers and inexpe-

rienced dairymen are greatly troubled with unit ly milkers, and frequently allow themselves to get

into a passion, and abuse them cruelly. This is

bad policy. Cruelty never yet cured an animal e

this defect, but on the contrary, tends to contra-it. The following remedy for the "kicking evil,"

was published some time since in the papers, and

in several instances which have fallen under my

observation, has been attended with complete suc

rope of suitable size, and from twelve to fifteen

feet in length, and fasten one end of it to a post behind the animal, and very nearly its length dis-

tant fram her, securing the other end to her les.

just above the foot, drawing it back into the post-

sition in which, it is naturally placed when she a milked. This done you can seat yourself, and milk without trouble." It is not unfrequently the

case that valuable animals are utterly ruined by

thrashing and beating, whereas they should be kindly and gently troated, and soothed rather that

BREAK THE CRUST .- Every observant farmer,

must have noticed the crust which forms on the

sprface of newly stirred soil, after lying a few

days exposed to the action of the dews. A much

heavier crust is formed by each shower of rain

which falls. Good and successful cultivation re-

A striking instance in proof of the important of this practice has just been stated by an exten-sive farmer. He planted a field of broom-com-

and by way of banter told the man who assisted

him, that each should choose a row as near

alike as possible, and each should hoe his row

and the measured amount of crop on each should

be the proof which was hoed the best. Our in furniant stated the result in substance as follows: "Determined not to be beaten, I hoed my row well once a week, the summer through. I had

not seen my assistant hoe his at all; but had ob-served that for a long time he was up in the more

ing before me. At length I found him, before

his row beat mine, by nearly double the amount'

FRENING TURNIPS .- When milch sows at

nicated by the turnips, different substances have

been recommended to be put in the milk, such as

saltpetre, chloride of lime, &c. Mr. J. D. Melas

tyre, of this city, who is in the habit of feeding.

his cows during winter with both turnips and brewers' grain, informs us that while both these

articles are used, an unpleasant taste is given 10

the milk ; but that if the grains are omitted, the

flavor of the milk is affected by the turnips. Hu

rule has been to feed each cow about half a bush

el of Swedish turnips and half a bushel of grains

per day, and it has been repeatedly noticed that

when the turnips are stopped, the milk is coni-

derably decreased in quantity, and the cows appeal

METHOD OF SUPPORTING TREES .- The bran ches of trees when loaded with fruit, may be kept

from breaking in the following manner : Connect

with cords all the heaviest branches, commencies

with the lower ones, and fasten the ends to the upper part of the trunk. Branches when thus

secured together cannot break. This plan is fat superior to the old method of props.

yesterday at the Bank of Missouri. It seems that about two hundred little boys, are employed at the Arsenal in the filling of cartridges, and yesterday, having received the proper documents, they marched up in a body to the Bank to make a draw upon Uncle Sam. The whole heighborhood was lively as a bee-hive, and the jingle of silver made music of the merriest kind. There were half dollars in hats, half dollars in handkerchiefs-pantaloons pockets were ripped, and coat tails were torn off by the weight of the treasure. The floor -if the bank within was completely covered by sqnads of urchins who were busily counting over their piles. Such a run on the bank has been un-

CHANCELLOR KENT .- We meet the following in the Cleveland True Democrat. Whether true or not, it is truly characteristic of the brisk, quick

spoken and humbrons old jurist: POCRETING AN INSULT -- Nicholas Biddle, when President of the U. S. Bank, obtained the opinion of Chancellor Kent on some important point of law, for which the Chancellor charged a of \$100. That is not enough, Judge, said Mr. B.' there are \$200 and your services are chesp enough at that.' 'How is this ?' said the Chancellor; 'do you think I do not know the value of my own opinion ? You have insulted me, sir, in-sulled me; but on the whole I guess fill pocket the insult," and very quietly put the money in his pocket.

GOING OVER TO THE ENEXY .- The London Herald relates an anecdote of a poor lith woman who kept a small fruit store in the vicinity of Covent Garden, and who seems to have had her own understanding of the motto-" Of two evils choose the least."
