A PRODUCTIVE LAND .- Here is what d Monterey correspondent of the Journal of Commerce says : " I'ho females, as well as the males, are a very healthy and robust people, and mostly live to a great age. The fecundity is extraordi-nary. Those instatuces are very rare, where a fe-male does not have a birth within each two years after her marriage, and many of them have a birth every year. There are now no less than three women in this town who have had a birth cach year since their marriage ; and they have all been matried twenty years or more each. I have no doubt on the whole, that all the women who have been married within the last twenty years in California, would average each the birth of a child every lifteen months?"

A mechanical miracle, almost, has just been performed at Providence, R. I. An immense mill, five stories high, and two hundred and fifty feet long by one hundred wide, owned by Fletcher & Brothers, having been badly built, declined ad much from the perpendicular as to become almost a second tower of Pisa. It was also bowed in at the sides. All feared that it would fall. But see what mechanical genius can perform ! By the application of screws and wedges, the building, in less than nine hours, was restored to its original condition, without a brick being started. A Mr. Carpenter has the credit of this bold and successful act.
