OUR MACHINISTS. &c.

We some time since mentioned the fact that Messrs. Haywood & Snyder, of this Borough, had received an order from the Glendon Iron Compa try of Boston, for engines, machinery and castings for an extensive Rolling Mill, now being erected in that city. A great portion of this order has already been completed, and parcels are daily sent off to their future destination. The engines and machinery of this establishment will be of the mo-t powerful and substantial build, and calculated to turn out twelve thousand tons of bar and rail road iron annually.

Many persons would doubtless entertain some surprize at the frequent and extensive orders re. ceived from abroad by our machinists. But great as are their facilities for despatching this branch of business, they are frequently compelled to decline orders tendered them. The firm above mentioned, owing to the multiplicity of engagements, have been compelled to refuse several heavy orders from abroad, within a short time past.

The reputation of our Machinists, in this branch of business, is general throughout the Union. The machinery of many of the leading Rolling Mills, Furnaces, &c. of this State, were made here ;-and not the least feature in the great number of these establishments, and which has tended to place us far in precedence of any other State, in the Union, is the accuracy and faithfulness of their operations,-thus contributing much to the success of the Iron interests. The degree of superiority perhaps most characteristic of our engines and machinery, is the substantial build, and the consequent reservation of strength in each horse power, added to perfection of finish scarcely admitting of rivalry. These features harmoniously joined throughout comprize strength and durability superior to the power required of them, and contribute much to the sucress of the work depending on their faithful performances. By this means, our engines generally raise their alloted horse-power quicker and more regularly than is done by others of different build, but of

, the same allotted capacity. The great amount of work done by our Ma- ly to the Removal. chinists turnishes, perhaps, the most significant evidence of the superiority of their work in general. Last year over fifty engines, (with a proportionate amount of machinery and castings.) were completed in this county. The present year will doubtless equal, if not surpass, last year's aggregate of work, if not the number of engines. Upwards of one thousand persons are employed constantly, and we doubt whether there is anothther county in the Union where the same amount of business, and a like number of hands are employed throughout the year.

- The following establishments are now in successful operation in our county. Their operations are not, in general, confined to any particular branch, but include all work properly understood as pertaining to machinery, In Pottsville : Messes: Haywood & Snyder; E. W. IJ Joshua Lippincolt, Eig. has written communication (a copy of which we have received by Col. Lindsay, and adjourned with three cheers; was incessant. About 4 o'clock Gen. Scott ared,) in reply to the recent Report of the Committee on Tolls of the Schuyskill Navigation Co. Having been absent from the office during the greater part of the week, we must defer further . we have not yet had time to read Mr. L's. remarks.

Our Extra last Fridai was, as usual, twenty-four hours in advance of the Mail, and appeared in our columns the next molning, in adwance of any other weekly paper in the Union! The nows, it will be seen, has since been confirmed. A satisfactory account of General Scott's movements, and of his engagements with the enemy, will be found in our columns this morning.

Damages -In December last a young lady named Eliza Miller, while walking along the streets in Newark in the evening, fell into a ditch made by excavations for gas pipes by the Newark | for a long time. The engraving of Mr. Yueng-Gas Pipe Company and was seriously injured .-A suit was brought which terminated on Friday in a verdict of \$1,500 damages.

The Mauch Chunk Guzette, when copying our telegraphic reports, should give the usual credit. The Mexican news which it copied from our columns last week, cost us about eight dollars, and which it must have received from us consider ably in advance of the city papers.

Farmers-a word! Be not deceived by the cry of taxes, which the Anti Revomalists raise. The people of the Coal Region pay taxes too, and they are the last persons who desire to in-

crease them. The Seat of Justice should be in the centre of territory. Remove it to Pottsville, and it svill also be in the centre of business, wealth, and

spopulation. Don't be uneasy about the Bond! Remowal never can take place unless the citizens of

Pottsville erect the Court House and Public Offices.

Some think that Removal can be carried by about fifteen bundred majority. Let us all go to work; and see if we can't raise two thousand.

Remember if Removal is not carried now costly Jail will be crected at Orwigsburg, which will be a dead loss to the county ten years hence. Is We devote considerable space this morning to the news from Mexico. A full description

of the recent battles will be found. The that stranger entitled to vote ! Have him assesed immediately.

The proposition for an armistice le. fr., were appointed Secretaries.

The credentials of the following Delegates were at the instance of the British embassy. The report heretofore given, that the city of Mexico was at our mercy, seems to be unfounded, and should peace not follow from the negotiations now pend-

ing, another battle must ensue.

A letter from Mr. Kendell, dated Tacubazo August 22d, says the Archbishop's palace of this place is now occupied by Gen. Scott and a portion of the army. After defeating the enemy in two of the hardest fought battles of the war, on the 14th inst., a reconnoisance made by Col. Duncan, having satisfied Gen. Scott that a road for artillery could be cut from Calcoa to San Augustine, Gen. Worth's division moved in that di rection on the 15th, followed by Generals Quitman, Pillow and Twiggs. By this move a new line of operations was taken on the southern and western sides of the city of Mexico, and the strong works of Penon and Mexicalsingo, on which Santa Anna had bestowed such immense labor, were completely turned. On the 15th of August, Gen. Worth marched

as far as the Hacienda of San Gregoris, when a halt was ordered by Gen. Scott, as Gen. Twiggs had met a large force of the enemy at Chalcon .-Gen. Twiggs promptly ordered the heaviest guns to be unlimbered, and after a few discharges, the enemy were dispersed with a loss of six killed.

On the 17th Gen. Worth resumed his match over a terrible bad road, but by 8 o'clock in the of the Capitol, without any opposition except that rocks had been rolled into the road and ditches dug, evidently showing that Gen. Scott had stolen a march on Santa Anna. On reaching this point, however, a scattering fire was opened by force stationed in an advantageous position, which was soon silenced by Col. Smith's light battalion of the 2d artillery, under Muj. Galb. Another

attack was shortly after made, but again the ene my's pickets were driven in without loss. At 7 o'clock on the 18th, Gen. Scott arrived candidates for the different offices, and that it shall at San Augustine, and at 10 o'clock Gen. Thornton of the

2d Dragoons, besides seriously wounding a guide. Col. Garland's brigade was ordered to occupy a position in plain eight of the enemy's batteries at San Antonio, whilst Col. Stark's brigade and Duncan's battery took their station in the rear close by. A party was then sent out to reconnoitre to ascertain the practicability of finding a road by which the village of San Angel could be reached, and the strong hold of San Antonio thus turned: this party had a skirmish with the enemy, killing five or six and taking many prisoners without losing a man.

for the city.

The strength of the enemy at this battle is known to have been at least 15, and I may say 20,000, all fresh troops, and in a position of uncommon strength. Opposed to them were about 6000 Americans, jaded and broken down by marches and counter marches, and incessant toil at Char-

LATER INTELLIGENCE. A letter from Mr. Kendall, dated Tacubaya, 25th ult, says that the armistice has produced universal dissatisfaction in the army: Mr. K. does not believe that an honorable peace is to grow out of it; in which belief he is joined by many officers of the army. He says that the whole matter was plan-ned by the British Minister, who backs Santa

Anna in his course.

It is reported that Paredes and Bustamente ar both approaching the Capitol, from different directions, with strong forces, breathing death and destruction to the Americans. The number of deserters and other foreigner found fighting against us, and now among the prisoners, is 72. A court martial was in session

with Col. Garland as President, for the trial of the precious rascels, and it was thought full jusice would be done them. Riley, the Irishman who commanded them, openly makes his brags of what he has done, and

says he expects no mercy.

Gen. Scott was himself wounded by a grape shot. It struck him on the outside of the leg. below the knee and gave him so little pain at the time that he said nothing about it, but it has since caused him much uneasiness. Three members of the Mexican Congress were

taken prisoners, but are to be liberated to take the deliberations of that body on the question of peace. Another letter from Mr. K. dated the 26th. states that positive information has been received hat Valencia arrived at Toluca drunk with his aid-de-camp. He is said to have been drunk at

the time of the battle.

The prospects of peace look brightening. The dexican soldiers have returned to their homes crest-fillen, many of them having fled before they eccived a shot. They are becoming rational and vining the peace party.

So great was the panic on the 20th, that one of Rumors from the city have it that Santa Anna is throwing up breastworks and destructive batteries, and some think they are to be manned by American soldiers to project Santa Anna against those who oppose him in making terms of peace. Origin of the Barn burners .- We see it stated that a hornet's nest under the eve of a barn, in Taghkanic, New York, very much annoyed a man by the name of Simmons, who wisely resolved to destroy it in the most expeditious mamner. He accordingly tied a bunch of matches to a pole, ignited and applied them to the nuisance. The hornet's nest was soon destroyed. Unexpectedly to the owner, the barn also took fire, and with all its contents, was totally consumed. Some few years since in our State Senste, the Hon. John Strohm described the origin of the term "Barnburners" as applied to a faction of the locofoco party, by an anecdore of this kind. To correct what they consider a minor evil, they apply the torch of radicali-m, and thus endanger the safety of the entire republican edifice. The Imports from England are very large.

The British are pouring in their manufactures at every arrival. In 1846 the importation of plain and printed calicos from Great Britain was in round numbers, thirteen millions seven hundred thousand yards. In 1847, under the new tariff, the imports of the same kinds of calicos have run up to forty-six millions four hundred thousand ards. Now, so long as we could send grain to England at good prices, we could stand these importations well enough; but the great fall in the price of our produce in the British markets, shows too plainly that we have no right to expect high prices there unless the potato rot should again make its appearance. The tauff of 1846 will only now begin to be fairly tested. So says the Sunbury American, a consistent locofoco paper.

Another old Bible .- Mr. M. S. Shoemaker, of Baltimore, has an old Bible that has been. in his family time out of mind, a family that came out with William Penn in 1682. It is printed Froschouer, in 1538, before the Bible was divided into verses. It is now in a fine state of pre-

Sarah and now they will actually feed out of ther hand and allow her to touch their scaly sides. A ven-Ellen Coneway, surety of the peace. Defend-ant and prosecuting, Ellen Kelly, to pay costs. Mr. Astor vs. The Mayor .- The Board of Supervisors having assessed certain property be-longing to John Jacob Astor, in a manner which he thinks contrary to the existing law, and contrary to his interest, he has brought a suit against the Mayor, (Chairman of the Board) with a view of obtaining damages. The Common Council had the matter under consideration, and voted to sustain the Mayor in the matter. It is a singular
