His prins rank the first in the leaving in uncertainty the face of a few. By a market, although the "Richeli-u" pen, made by market, although the "Richeli-u" pen, made by midshipman Woodworth organized an expedition E. Watson & Co., is equally good. They posto the mount sins in March, and saved from doath sess, in the highest degree, the requisites of duraforty of the emigrants who were lost in the snow ; biliny and elasticity, are made of the finest materstorm. The sufferings of the men, women and if at, and thus had in the most workmanlike manner. children were terrible. Two of Mrs. Graves's in the manufacture of pens, the gold is first rollchildren that died, were eaten by the survivors ed out in ribons, and then cut with a die to the reand when the party was found, they had eaten the quired shape, the points put on, and then ground breast, heart, liver and lungs of Mrs. Graves, who down to the required nib. The points are iridium, also died. The undertaking to save the lost ones: a new metal formed with platinum. The points

from \$7 to \$55 per ounce. The pens and cases sell at from \$10 to \$30 per dozen. The manufacture of the silver cases is a distinct business, selected our rulers as the children of Israel did and employs a large capital. It is not ensy to make an estimate of the number of pens manufactured per annum, but it is not probably less To "Dear father, I am sick-confined by a inches; Thomas Jefferson 6 feet 2 inches; James than 1,000,000, of which Bagley niakes nearly subject would scarcely suppose that eight hundred

pounds' weight of gold were used-up every year in the manufacture of such a trifling article as ches ; John Tyler, 6 feet ; James K. Polk, 5 feet, pens, a business unknown ten years ago-yet such is the fact. The demand for, the article is enormous, and it is now difficult to find a person who writes at all unprovided with this most economical of all pens. One export of 1,000 groce has been made to England, where they sell for a guines

Modern Invention .- The New York Sun makes the following observation on the subject o ing session by Bishop Meade. It is stated that Modern Inventions. The strongest witness the present age has of its superiority over the past is in the number and quality of its inventions. The classic Greek surrounded by muse haunted groves

and statues of inimitable beauty, had not the simple convenience of a cooking stove, and the luxarious Roman, lounging on the silks of Persia amid marble baths and orange scented villas, was forced to burn a floating wick in an open cense of oil to light and defile with smoke his splendid palaces. The spirit lamp, the safety lamp, the rotary stove, kitchen range and ten thousand ap-

pliances which go to make up our labor saving machine system, and in which there is more luxways regarded as competent witnesses in Superior ury and usefuloess than all the purple of Tyre. or gold of Ophir, the haughty old world conquerors tnew nothing about. Their great art was war,

and their inventive faculties studied its successful prorecution. The ancients seem to have contemned, as base, the labor of relieving the common wants of life, and surrounding, all with a portion of plenty and ease monopolized by a few The spirit of our age is entirely different. We regard nothing as truly useful or beautiful that cannot be diffused to all. Our luxuries are divided be-
