POLITICAL INTELLIGENCE. NEW YORK.—Returns from this State continue to reach us, but in such obscure shape that it is not worth while to lay them before our readers.

MASSACHUSETTS.—The Whigs of the glorious old Bay State have carried everything before them—the State has been swept of Whigs, the Whigs have been driven out of the State, and the Whigs have been driven out of the State.

NEW JERSEY.—The Whigs of the Garden State have carried everything before them—the State has been swept of Whigs, the Whigs have been driven out of the State, and the Whigs have been driven out of the State.

LOUISIANA.—Lafayette and Landry, Whigs, have been elected to Congress from this State. The House is a fair field from was about balanced.

MICHIGAN.—The Whigs have been elected to Congress from this State. The House is a fair field from was about balanced.

TENNESSEE.—The Whigs have been elected to Congress from this State. The House is a fair field from was about balanced.

GEORGIA.—The Whigs have been elected to Congress from this State. The House is a fair field from was about balanced.

CONNECTICUT.—The Whigs have been elected to Congress from this State. The House is a fair field from was about balanced.

FLORIDA.—Three counties still remain to be heard from, but it is ascertained that the Whig majority in the Senate will be 5, and in the other 4 or 5.

A HIGH COMPLIMENT.—Dr. Thomas W. Evans, of Lancaster, left this city on the 1st inst., for France, under the following interesting circumstances, which are detailed by the Intelligencer.

Dr. Evans goes to France at the instance of Dr. John V. Clark, who is the only American who has been elected to the office of President of the Paris Convention.

Dr. Evans has already been awarded a premium from the "American Society of Dentists," for the best specimen of his work.

LETTER FROM EUROPE. Arrival of the Washington—Five days later from Europe—Continued Railways and Depressions—Continued—Further Decline in Cotton.

There does not seem to be the least amelioration of the condition of affairs as reported by the London Standard. The cotton market is still in a state of depression, and the price of cotton is still low.

The Corn market looks somewhat more cheerful. Flour is in fair demand at the prices current on the Continent of the Caledonia. It is about one shilling per bushel.

Cotton has again receded, and is down fully one-half of a penny in the five days prior to the departure of the Washington.

In the political world there is nothing new. The accounts from Naples are contradictory, but the general trend would lead to the inference that the insurrection had been crushed.

SWITZERLAND.—Civil war appears imminent in Switzerland. The radical cantons have all directed their representatives in the Diet to enforce the dissolution of the Sonderbund, or separate League, and obedience to the Diet, by force if necessary.

On the 19th the Diet was to discuss the draft of a proclamation, and nominate the superior officers of the Federal staff. The military measures adopted by Bern and Argovie the league were completely nullified, and the last accounts from Prussia, the Catholic district of Argovie, stated that the attempt to side with the league had completely failed.

THE RAY RECONCILIATION.—Narvaez may be skilful; lucky he certainly is. Within ten days he has effected two results, which were ardently desired and diligently sought by preceding ministers, but which mocked their reach.

The reports from all parts of Ireland seem with the most alarming accounts of distress and want. In Limerick a collision has already taken place, and the reports from all parts of Ireland seem with the most alarming accounts of distress and want.

AN ASSASSINATION.—The reports from all parts of Ireland seem with the most alarming accounts of distress and want. In Limerick a collision has already taken place, and the reports from all parts of Ireland seem with the most alarming accounts of distress and want.

THE INTRUMENT UPON WHICH NARVAEZ TURNED HIS EYES WAS ALONSO BRUNELLI. The muncipal guard of the city of Madrid, who had been brought back to the city, repaired on Saturday to the Park, where he had a long interview with the king.

THE QUEEN'S WAITING FOR HER CONSORT IN A balcony of the palace, towards the street from which the carriage issued, she beheld her husband, and she was the first to see him.

At La Cacerie of Paris. The French press is much occupied by the determination of Italy.—From Italy there is a little of novelty.—Letters from Rome, dated the 12th ult., state that although the Pope was satisfied with the present situation of affairs, he had in no respect relaxed his efforts to place the independence of his States on a solid and durable foundation.

It is stated that the evacuation of Ferrara is again indefinitely adjourned. According to them, the Pope demands the complete evacuation, including the city of Ferrara.

The Duke of Luca has abdicated, dated Modena, the 5th ult., and ratified by the Hereditary Prince, was published at Florence on the 11th, with a *motu proprio* of the Grand Duke announcing the incorporation of that duchy with Tuscany.
