## Wit and Linnor.

Captain Jo.-During Doniphan's march from El Paso to Chihuahua, the black servants of the different officers of the regiment formed themselves into a company. There were twelve of them, of which number eleven were officers, and one high private Jo. C., servant to Lieut. D., was elected captain. He was the blackest of the crowd and sported a large black feather with a small black hat; also a large sabre with an intensely bright brass hilt-which same sabre was eternally getting involved in the intricate windings of his bow legs. With Jo for captain they were a formidable body, and to hear them talk they would work wonders. During the battle of Sacramento. however, the company were not to be seen; but after the action was over, they were espied breaking out from the wagons and joining in the pursuit. That evening one of our officers attacked Jo about his company. Well, Jo, I hear your men were hid behind the wagons during the fight?" "Lieutenant, I'se berry sorry to say it am de truf! I done eberyting—I called on de paterism ob de men—I enjoked dem by all dey hold most deah in dis worl and do nex, but it was no go-dey would go on the wrong sides ob de wagons." "But what did you do there?" "
stood dar gettin' cooler, and do firing kept gittin hotter, and at last de cannon-balls cum so ormighty fass. I thought de best ting dis nigga could do was to git behind the wagons herelf!"-St.

The Laziest Man .- A worthy old citizen of Newport, Mass. who had the reputation of being the faziest man alive among "them hillocks," so lazy indeed, that he used to weed his garden in a rocking chair, by rocking forward to take hold of the weed, and backward to uproot it - had a way of fishing peculiarly his own. He used to drive his old-white faced mare down to the spot where the fautog might be depended upon for any weight from two to twelve pounds, back his gig down to the water, put out his line, and when the tautog was safely hooked, start the old mare and pull him out.

B. A. Fahnestock's Vermifuge. Facts for the People.

The constantly increasing popularity and sale of B.

A. Fahnestock's Vermifuge has induced persons who are envious of its uccess, to palm off upon the public preparations which all medical men know to be inefficacious in expelling worms from the system.

This Vermifuge made its way into public favor upon the ground of its own intrinsic merits, giore than any other medicine of the kind now used; and, while many worm remedies have, by dint of puffing, been forced into sale, and shortly after gone into the obscurity which their worthlessness justly merited, B. A. Fahnestock's Vermifuge continues to be, triumphantly sustained. I has only to be used and its effects will fully sustain all that is said of its wonderful expelling power.

CERTIFICATE.

We certify that we have used B. A. Fahnestock's Vermifuge in our families, and in every case it has provided a decided and effectual remedy for expelling worms from the system. We cordially recommend it to parents who have children afflicted with that dangerous malady.

Scrofflich.—Messrs. Rowand & Wulton:—Gentlemen:—For the beneth of the public and those afflicted as I have been—you are at liberty to use this testimonial as you think proper:

After having suffered over a year, with several painful ulcers on myright shoulder; which covered a space of nearly nine inches in circumference, I was induced to call at your office, to see Mr. Isanc Brooks, (with which I was acquainted) and his cure being so remarkable as to remove all doubt, I commenced taking the same medicine, "Dr. Cullen's Indian Vegetable Panaca." I have not used the number of bottles prescribed, but am pleased to say, I have been entirely cured.

I will be pleased to see any one who may think proper to call upon me for further information at my house, in South Juniper street, a few cors above MELLEN GRUBB, Stone Mason.

TETTER.—Mesers. Roward & Walton:—Gentleme. TETTER.—Mesers. Rouand & Walton:—Gentlemen.
I cheerfully give you the particulars of a cure performed on me by your justly celebrated "Dr. Cullen's Indian Vegetable Panacea." I had been afflicted with "Teter" about ten years on iny body and hands. It was exceedingly troublesome and annoying, I tried Ointments but without relief. Last winter I procured some of your Panacea: the itching was soon allayed; and I had taken the medicine but a short time when biles made their appearance on different parts of my body: when the biles disappeared the Tetter went with them, and I an now entirely well. I would certainly recommend the Panacea, to all like afflicted.

R. & W.

ERYSIPELAS.—Encouragement.—For the benefit of the afflicted. I freely give you a statement of my condition, before I commenced with your Dr. Cullen's Indiana Negetable Panacea. Some four years since, my leg became swollen, inflamed, and painful. The disease was pronounced "Erysipelas," I resorted to the usual remedies, but without effect—except in one case, in one case, in which I tried a medicine advertised in an ALMANAC, which, instead of curing, cat the thesh to the hone: my leg became very troublesome, and I began to fear it would result in something serious. Mr. Thornton, a neighbor of mine, was taking your Panacea for a scrofulous sore leg—and much benefitted, (now well) and also a lady of my acquaintance. From their representations I was induced to give you a call, and your offer being so fair, it gave me confidence in your medicine. I commenced its use—and in less than three months was entirely cured—my leg is perfectly sound, and, as several months have clapsed, I have not the least-fear of a relaifse.

I give this testimonial cheerfully, hoping it may induce others to make trial of what I believe to be one of the best medicines ever offered to the public. It would give me much pleasure at any time to see those who wish any further information for regard to the Panacea, and my residence, No. 240, Carnenier street, between Sth and this streets, north side WILLIAM FLEMMING.

FOR THE BENEFIT OF THE AFFLICTED.—

New Orleans, Jone 13th, 1847.

Rowand & Wallon, Philadelphia:—Gentlemen.—Neven months ago, our child, a boy, then five months old, was first attacked with a disease which made its appearance in the form of a sore on his head, which covered the entire scalp and part of the forehead. It was so infinited as sto prevent the possibility of the little sufferer getting his rest night or day. This state of things lasted about two months, and i we give our permission to use this as you see fit.

1 ARIES FOR 1848—Of every description, for gentlemen or ladies: just receive and for sale at Dc4-49 BANNAN'S Cheap Book & Variety stores.

The Great Preventive Medicine. THOUGH Wright's Indian Vegetable Pills have I schieved triumph upon triumph, in the cure of obstante cases of disease, even after they had been entirely given up, and after all other remedies had failed, their power of prevention may be justly esteemed their power of CROWNING GLORY! their power of pressures has, their CRO'WNING GLORY!
their CRO'WNING GLORY!
"Storms," it is said, "purify the air," but storms do mischlef also, and are so far an evil. Were it within human power to maintain the
ELECTRICAL EQUILIBRIUM

between the earth and air, there would be no occasion for storms, for the air would always be pure.

So of the human body. If kept free from morbid humors, the action is regular and healthy; but if those humors are allowed to accumulate, a crisis, or, in other words, a storm, will arise, which is always more or less. dangerous.
WRIGHT'S INDIAN VEGETABLE PILLS are equally well calculated to present the storm, of alloy it when it comes. But PREVENTION IS BETTER THAN CURE, besides being cheaper and less troublesome. The de-

casides being cheaper and less troublesome. The delay of a day in the commencement of sickness has often proved fatal, and always renders the case more difficult to munage. Let the sickness be caused by CHANGES OF WEATHER,

proved tatal, and always renders the cases more difficult to minage. Let the sickness be caused by CHANGES OF WEATHER, high living, want of exercise, close confinement, functional derangement, or anything else the effect upon the body is much the same—is equally dangerous, and is removable by the same means.

HAVE XOU A COLD?

Let it not ripen into Consumption: Are you Dyspeptic? Beware of the hypochondria. Two pills taken every other night on an empty stomach, for a short time, will, in nine cases out of ten, cure the Dospepsia, and thereby drive away the legion of "devils blue." For Headache, no medicine is supertor to Wright's Indian Vegetable Pills. Costiveness, that prolific mother of disease, is caused by a torpid state of the liver, which these pills effectually cures. By striking at the root of disease, Wright's Indian Vegetable Pills prevent all and cure all. They can hardly ever be taken amiss, if used with common discretion; and we commend them to the use of those who have not yet tried them.

THE FATHER IS COMING. By Mary Howitt. The clock is on the stroke of six:
And father's work is done, And latter's work is done,

Sweep up the hearth and mend the fire,
And put the kettle on!

The wild night wind is blowing cold,
"Tis dreary crossing o'er the world. He's crossing o'er the world apace, He's stronger than the storm; He does not feel the cold, not he, His heart it is so warm.
For father's heart is stout and true,
As ever human bosom knew. He makes all toil and hardship light;
Would all men were the same,
So ready to be pleesed, so kind;
So very slow to blame;
—Folks need not be unkind, austere,
For love hath readier will than fear!

And we'll do all that father likes,
His wishes are so few!
Would they were more! that every hoar
Some wish of his I knew!
I'm sure it makes a happy day
When I can please him any way! I know he's coming by this sign,
That baby's almost wild;
See how he laughs, and crows, and stares,
Heaven bless the merry child;
His father's self, in face and limb, And father's heart is strong in him! Hark! hark! I hear his footsteps now He's through the garden gate;
Run, little Bess, and ope the door,
And do not let him wait.
Shout haby, shout: and clap thy hands,
For father on the threshold stands?

## Farmers' Department.

your cattle learn this art, put them to an empty cart and let them back it down hill. Never pour their noses, for this gives them pain and wens, makes them hold their heads down to avoid to blows. In such a position of the head the ox h no power over the yoke, for his throat is broug

to bear on the lower part of the bow, and he ca not do much if he would.

By all means keep his head up, and then t yoke itself will bear against the upper side of t neck, the tough side, and against the horns: you use a stick or whip, touch the fore legs w it; keep your stick under, and your steers will n put their heads down to come in the way of it. At first they will refuse to walk backwards, as will straddle away from the cart tongue in order go sideways and see where they are to step. But while the cart is drawing them back it a be your principal business to keep the steers trim, that they may track after the cart. Boy tient now, the cart is helping you, and the ste will soon choose to go backward after the cart ther than stand still and hold it. In a short to your steers will learn to step backwards and ke their hodies close to the tongue, with their he up. Soon you will teach them to run an emcart back on level ground; and eventually y cattle will run back any decent load with nearly much ease as they will draw it forward. Mr. Jonathan Rice, of Marlborough, recer

told us he taught his steers to back by hitch' them to a rock in front of them, and then invit hem to back away from the rock, making th haul it after them and endeavor to avoid it a came along. He says they will hold up the heads and pull stoutly to get away from their le in front. We have no doubt this is a good m of using cattle to run a load back. Massac setts Ploughman. Hay Racks .- Hay racks for feeding sh and indeed all animals during winter, should placed in a vertical position instead of inclinate towards the animals, which was the original property of the tion assigned them. In the former arrangem you have perfect security against loss or waste food beside guarding the sheep from the great convenience of having their necks and wools

combered with seeds and other annoying substant
Where there is an inclination of the rack tows the animals, these unpleasant re-ults are who unavoidable. There is also another imports tion. As there is generally more or less crowds and contention during feeding times, their bres ascend directly into the mass of fodder, giving an ill odor, and rendering it very unpalated and which, where there are animals affected : disease, noxious to health. Vertical racks w admit the food being drawn from both sides now much in vogue, and deservedly approved all who have tried them.
