DR MCLANE'S LIVER - PILLS.

PROM the state of New York .-A' Messrs, J. Kild & Co. Gents:—Please send me by Express, 12 dozen boxes "McLawe's Liver Pills" They are selling good here, and suit generally. Yours &c. E. P. Stroman, Mayrille, Chatauque Co., N. Y., Dec. 29, 1816.
Prepared for the proprieter and sold whole-sale and retail by No. 60 Wood street, Pilishurg, Pa., 45-N. B.—Purchasers will please be particular and inquire for "Dr. McLane's Liver Pills," and take no other.

ther.

The increased demand for Da. M'LANES LIVER ILL, since their introduction by us as his agents, has are acceded our most synguine expectations. It is now thout TEN YEARS since they were brought before the milit. During this time hundreds of certificates have seen banded us, testifying to their efficacy, and stating he very great relief they had derived from the use of hem. We have now in our possession many certificates! from respectable persons, who have used Da. YLANE'S LIVER PHL. with the most happy results, where every other known remedy had been used in vain, also, quite a number of regular-physicians, of good stan ling, through the country, are using and recommending a their practice.

their practice. It mashes our sincere wish, that these Pills should a fairly and fully tested by experience, and stand or fall the effects produced. That they have been so tested, and that the result hos been in every respect favorable, e call thousands to witness, who have experienced e call thousands to Witness, was a sixteenedial effects.

Dr. 1.'LANE'S PILLS are not held forth or recomsended (like most of the popular medicines of the day)
a universal cure alls, but simply for LIVER COMto the symptoms connected with a de-LAINTS, and those symptoms connerted with a de-niged state of that organ. J. KIDD & Co. or sale in Potraville by John S. C. Martin, and John an 3-8-6mo.

Also from
Preceptor of Sheffield High School.
Reading, Pa., 1845.
Having examined Mr. Tickhor's Arithmetic, I am fully persuaded it possesses we'll of no ordinary kind, which onight to enlist the attention of teachers of youth on the all-important science of Common Arithmetic. I stabil introduce it into my school without delay.

on the all-important science of Common Arithmetic. Is abail introduce it into my school without delay. It shall introduce it into my school without delay. It shall the mode as a storm, will arke, which always more or less dangerous.

I think Mr. Ticknor has well-aveceded in comprising much in a smill space in his "Collumbian Calculator" it strikes me favorably in several respects, particularly the "Reviews" and the "Appendix," where "articlearly the "Reviews" and the "Appendix," where "articlearly sord" is arranged under different leads. The book is decidedly practical, the "Appendix," where "articlearly in the "Reviews" and the "Appendix," where "articlearly in the "Reviews" and the "Appendix," where "articlearly in the "Reviews" and the "articlear countered and arithmetic designation our direct care more difficult care given to an arithmetic designation our direct care more difficult care given to an arithmetic designation of the "Collumbian Calculator." I feel at liberty to say that I regard it as admirably adapted to the purpose of common school education. The rules are well expressed, and the different steps of very process so distinctly unalked, that the student is into danger of confounding their other or michaling their order. This is the outside the process of their commendations of the work. The other will be come only our subming the first order. The state of the process of the process of sixth process of the pr

Principal of the Male High Senool, Carlisle, Pa.
From W. McCa tney, Eaq., Professor of Mathematics,

I alayett: College.

Easton, January 7, 1615.

Mr. Tickner:—Dear Sir:—I have looked over some of the proof sheets of your treatise on arithmetic, and an pleased to observe that you have introduced many practical examples in illustration of the rules. Your book is well adapted to those who desire a practical work on the subject, and is felt in details and illustrations for those who are commencing the study of this science. Practical books are the kind adapted to the business transactions of the age.

Very truly yours, &c.,

Dara Sir:—In reply to your inquiry, I can say that I have been engaged these tea years in the cause of educating our country's children and in that time have used nearly a store of arithmetics in my school, among which were Pike's. Daboill's, Rose's, Smiley, Watts, Emerson, Davies, Smith. &c.: but they are all seriously deficient in all those eninent respects, parricularly in relation to our carrency, as well as in other points.—The arrangement of your arithmetic is excellent, and loffices very little thance of improvement in this respect. It is an American Aritmetic, adapted to American Currency, to American Teachers, and Scholars. The numerous and appropriate examples given under the respective rules, illustrating and explaining the medas operand, de, is a feature that places is above all other arithmetics in this respect. I can teach the children more of arithmetics in less time, with less labor to them and myself, from this than any other arithmetic. I have no doubt but that it will soon superved all the old antiquated, obselete, and "heterodya" systems now so widely circulated and generally used. My children careadity seriate arithmetical principles in the use of this book it they seem to have an instinctive preference for it, over all others. I am delighted with the guess'ify and guilty of beciral matters which it comprehends. To am sure its explanation in decimals alone will secure.

int, over all others. I am delighted with the geastity and gudity of dictinal matters which it comprehends. To make the sephantion in decimals alone will secure the widest use—as wide as our country extends.

Yours tuily,

Teacher, Ashbury New Jersey.

VERMIFUCE

A MEDICINE which is perfectly safe, and may be given on the children, from tender infancy to advanced age, lays under no reatraint as to cold water, or any kind of food. Furges mildly, subduing fever,—desironys and expels worms with invariable success—and neastly administered to children.

That it proseases these valuable properties, is fearlessly asserted—still claiming the additional advantages of being given in small bulk, and requiring none of the direnthing which Worm Tea and other supposed Vermifuges demand. During its brilliant career, it has been introduced into many families, where every other known and accessible Vermifuge has been tried without the least success, where it has prumply excelled Worms to an almost in-redible amount.

As evidence of the surprising effects of Dr. N'Lara's WORM SPECIFIC, we give the following:—

On Saturday, February 7th, 1816, Mr. James Richardson called at the Drug Store of J. Kidd & Co. corner of Wood and Fourth streets, Phishurg, Pa. and made the following statement:—"A child of mine had been very sick for some ten days—we had given her purgative medicines, but it had done her no good One of our neighbours came in and said it was Worms that were destroying the child, and at the same time spoke of the wonderful effects she had witnessed from using Dr. Al'Law's Worms. As a duty I owe to you, and the commanying statemer if freely make known these facts. My child is now well. What is most remarkable, the Worms are in processed in a bulk of the worm safer if gave it to the child."

For sale in Pottville by John S. C. Marnin, & John G. Brown Druggists. A MEDICINE which is perfectly safe, and may be giv-

Postscript.

From our Telegraphic Correspondent. NEWS TO THE LATEST MOMENT!

PHILADELPEIA— Jan. 7, 1815. }
Oo'cluck, P. M. }
Since the receipt of the Caledonia's news, the markots have been somewhat unsettled, and fow transactions worthy of note have occurred. Good brands flour are worth \$6,37a6,50 per bbl. Corn meal is without inquiry, and prices tend downward. Wheat is held at 133 cts, for prime reds. Coru, Southern white, 62 cts. per bushel. Outs. 44 a 45. Whiskey has (naturally enough!) a THE FOREIGN NEWS.

The Steamship Caledonia arrived in Boston on Woduesday evening last, with lifteen days later intelligence from Liverpool. Her nows is rather important. There is no alteration in breadstuffs, the inarket remaining firm at provious quotations. The general character and prospects of the grain market will doubtless be materially affected by the resumption of the sliding scale of duty in March next, of which notice has been given by the Government. The duty will esciliate upon wheat from 4s to 10s. per quarter, and upon thour from 2s. 6d. to 6s. per bol, adjusting itself to the rise and fall of the market. Indian corn now free, will be subject to a duty of is. per quarter, and moul to 6d. per Ubl. Cotton has experienced a further slight de-

resido. The money market had been easier. The bank of Eugland had upwards of eleven millions bullon, and was discounting freely at the minimum rate of t per cent. Good paper, however, could be accommodated out doors at less. The general news is unimportant, and we therefore fast
