particular construction of the LOCOFOCOS AND THE TARIFF.

The locofocos are very busy, at present, in explaining the difficulties into which their free-trade, leaders have involved the country. The presses in the keeping of Mr. Polk, assign various reasons for the downfall of the produce markets-the disasters attending every kind of manufactures, and the general inactivity of Business--the principal ones of which are referred to the old cause-(a convenient retreat for them when they are "cornered"-) the Banks and the Currency! Now, laying uside the absurdity of any endeavor ed up to apologise for, or to extenuate, the situation in which they have placed our affairs.

It is scarcely necessary to observe, that under find it. judicious rates of duties on imported goods the currency at home must remain comparatively healthy and vigorous. The reason is, that the specie basis is preserved, which is essential to maintain confidence, and secure credit. However romeous the different banking systems may be, '(and that of our own State is much better than for so long as you continue to take them they many others) or however they may fail to harmonic than the continue to take them they have been educated at the much early spears to be no hardships, impropriety, or however they may fail to harmonic them at once; in the continue to take them they really spears to be no hardships, impropriety, or however they may fail to harmonic them at once; indicate the much early the hollows that you approve their course, and you injustice. tions in the currency, which are the inevitable not affect the best interests of the people one way and only two weeks ago promulgated a statement erate :-- but when it is withdrawn from their vanits, and emptice upon foreign shores by the million, they must curtail their operations, or run the hazard of those failures which are sure to overtake them. Money thus becomes scarce-enterprizes of great moment are laid aside; and the regular husiness of the manufacturer, the miner, and the merchant, is crippled, and business confidence between individuals is impaired.

Such ridiculous ninnies if ordered to do similar work, would be killed out. right with the blazing heat, and ere a dozen blows would be struck with the ponderous hammer, they would burst a blood vessel; or amash their toes! Such men can easily talk of low wages, when realizing \$2000 per annum for attending to lands, in the management of which many others could bring people, are at perfect liberty (as at best they are) to sum up the evidence elicited, which would to bear more skill and common sense for one fourth to withdraw their support any time.

the amount. But the principal argument used by your empty inflated free-tradists, or advocates for foreign labor, in opposition to the labor of our own country is, that when wages are low every thing else becomes low also. James Buchenan in his famous speech in the Scuate against the tariff, declared "that if you reduce the nominal standard (wages) to the real standard throughout the world, and you will cover our country with blessings and benefits." That is from 15 to 20 cents per day, as it is in all other countries, except England, where it ranges a little higher, because provisions are highyor. Now a greater lie was never proclaimed .-The reduction, of wages in this country does not and cannot bring down the price of every thing else. It does not bring down the price of Medieine-it does not bring down the price of Tea and Coffee-it does not bring down the price of Provisions-it may affect the price of clothing a little -but even this we doubt. Provisions are affected by other causes:--a scarcety of the crops at home or abroad, will enhance the prices here ;-which was fully illustrated last year, by the enhancement of the price of our. Produce from 30 to 50 per cent. But did labor go up, in the country, last year? Far from it. In many places it retrograd. ed in the very face of the rise of provisions. Did the price of labor go up in England and Ireland during the famine, when provisions rose so rapid. lv! Far from it : or else all the accounts we re ceived from those suffering countries were incorrect. We repeat that such assertions are downright falsehoods, proved such by the whole history of ,the past; and the man who, observing the laws of trade and exchange, can adduce such arguments, must be either a very great fool, or a very great knave. He is welcome to either horn of ,the diiemma, and between the two he is sure of

getting what he is entitled to ! Now, reader, mark the expressions of these ininnies!-when they say that everything is too high-that it must come down-they intend to strike at labor! But to do this openly would not answer; therefore they strike at the proprie for, and endeavor to prove that he has made enormous profits. If this were true, we do not believe that so many manufacturers of woolen, cotton and iron, in all sections of the country, would stop business, or fail entirely. Every body will instinctively, if not from pride, keep his business from stopping as long as he can; and if these manufacturers make the enormous profits stated.

Rifter's Connound Syrup

OF TAR AND WILD CHERRY.

This preparation is believed to be the best medicine now in use for the cure of diseases of the Cust. Longs, Bronchial Fassacca, &c, while the low price at which it is fourshed, places it within the reach of all. The following voluntary testimonial has been received from a gentleman well-known in Philadelphia, engaged in the Dry Goods business in Market street:

Messre, J. L. & B. J. Ritter:—Gentlemen:—Your Compound Syrup of Tar & Wild Cherry, has cured me of a most severe Catarrh. I was so hoarse as to be unable to speak distinctly, and greatly oppressed in the Chest, besides having a terrible Cough. The first dose relieved me, and a single bottle cured me entirely.

Yours respectfully.

H. B. STABLE.

This pleasant, safe, efficacious remedy is for sale at the low price of 25 cents per bottle, by storekeepers generally in this and adjoining countles, and wholesale and retail by the proprietors.

PATENT METALLIC ROPES, FOR THE USE OF MINES, RAILWAYS, &c., For sale, or imported to order, by the subscriber.

THESE Ropes are now almost exclusively used in I the Colliaries and on the Railways in Great Britan, and are found to be greatly spector to Hempen ones as regards safety, durability and economy.

The Patent Wire Ropec, have proved to be still in good coudition after three year's service, in the same situation where the Hempen ones, previously used, of double the size and weight would wear out in the or ten months. They have been used for almost every purpose to which Hempen Ropes and chainshave been applied. Mines, Railways, Heavy Cranes, Standing Rigging, Window Cords, Lighthing Conductors, Bignal Hayards, Tiller Ropes, &e. They are made either of Iron or Copper Wire, and in cases of much exposure to dampness, of Calvanized Wire.

Testimonials from the most eminent Engineers in England can be shown as to their efficiency, and any additional information required respecting the different descriptions and application will be given by.
