The Whig National Convention will assemb n Philadelphia on Wednesday the 7th of June next. We understand that the Committee to whom is confided the necessary preparations for the holding of the Convention, have procured the Chinese Museum building, the largest structure Philadelphia. The lower floor will be devote exclusively to the Delegates, and the extensive alleries to the spectators.

The locofoco National Convention will meet a Baltimore on Monday the 22d instant. It is next o impossible to predict, with any degree of certainty, whom the nominee of that party will be. Buchanan, Cass, Pallas, Polk, &c. will stand but poor chance, we think.

NEW SPARK ARRESTER.

Messrs. Birch and Cruff, of Washington, D C., the National Intelligencer says, have invented a neat and simple hood for locomotives and 12 00 steamboats, which increases the draught and conreys the sparks, &c. into a receptacle, where they are effectually arrested and extinguished, one being permitted to escape. The apparatus is substantial, permanent, and highly ornamental, and besides its above mentioned important funcliofis, it projects the smoke higher above the train than the mere chimney would, without increasing its length. Numerous spark-catchers have been invented and several are in use, but none, it is believed, have proved p-riect. The above invention cannot become easily deranged, and is as per nament a fixture as the chimney itself.
