FYour Change, Sir.—One of the nonde-seript specimens of humanity, called dandies, trav-elling through Connecticut a few days since, in his own or borrowed conveyance, was brought up with a "round turn" at a toll-gate which he designed to have passed without paying the usual fes. When he found himself in timbo, from which he could not escape without "forking over," be inquired of a young lady who was in atten-dance at the gate, how much he had to pay, before he could pass the formidable barrier.

"Three cents, sir is the charge for single wag-ons," replied the young lady. . "Three cents is a threepeace, the half of a six-pense; due of the smallest bits of silver in use sh I young woman, am I right ?" said the dandy, failing in the packet for his showed

Land thus thrown up is found to be finely polyerized after the frosts leave it, and it is comparatively dry and ready for use some time earlier than such ,

and rearly for use some time carrier instances is is not plowed till spring. For sowing, land plos-od in this manner requires no additional plasing but it is better fitted for the reception of seed than it can be by any farther operation, unless by a

slight harrowing if too rough. The different kinds of grain or poas may be siwn directly upon the burface and covered by the harrow; and if sown very early, the grass and clover steds require no covering, but find their best position in the slight depressions which are everywhere made by the frost, and which the subsequent rains and wind fill up and cover sufficiently to secure a certain growth. When a field is intended for planting and is thus plowed in the preceding autumn.
