op a good idea as follows:

[For the Miners' Journal.]

Mr. Benj. Bannan: Dear Sir-Numerous pelitions to Congre re signed here by all parties for a revision of the Tariff and protection to labor. They are a propr reply to the Report of the Secretary of the Treasury ; this report is an ingenious argument in defence of a bad cause, but it is a revival fourth year of its existence. We would of old abstract doctrines that have been often re-

workmen deprived of employment witness this miles, and the average distance from East to west truth, and answer him by their peritions for relief.

Congress will listen to their complaints—abstract theories cannot contradict evident facts. His article with the same of 125 miles in breath, bound on the list by the Sierra Nevada, and on the West by the Sierra Nevada, and on the business, that many of the working men if all the nations of the carth would permanently eprified of the wages due them, and their fam-open their parts to Free Trade it would be a sre absolutely suffering from want. Every benefit to mankind. We admit this—and if all mankind were angels they would require no laws to restroin and punish them—but all mankind are slothing,—but a supply of food can only be sized by dogations and subscriptions for said punish the ports. They water the large and fertile valley not angels, nor ever will be, and all nations will not open their ports. therefore we must govern the Sierra Nevada and the coast open their ports. They water the large and fertile valley not angels, nor ever will be, and all nations will not open their ports. They water the large and fertile valley and the last from the South, and the last from the South, and both emptying into the Bay of San Francisco at the same point. They water the large and fertile valley into any subscriptions for said to coast the same point. They water the last from the South, and both emptying into the Bay of San Francisco at the same point. They water the last from the South, and the last from the South strength in the South for the So more. Any subscriptions left at this office will ourselves accordingly. It is doubtful whether the world, is about 500 miles long and 50 wide. It is bounded over to the Doress Society, for it would be well for us to open our por's even It is bounded on the East by the great Snawy barrel. Something must be done, and in the if all the rest of the world would. But it is Mountains and on the West by the low range. have manufacturers and mechanics and workmen, and they must live somewhere. Shall it be in Europe, and we pay them largest in upper California, and has a course of about 1,000 miles, emptying itself into the Gulf of California in latitude about 32 degrees North." port royalty and nebility and institutions inimical to our own? Then our Farmers would suf-fer, for their workmen would not buy our pro-duce if they live in Europe where they could get changer, provisions. Wheat can be bought in cheaper provisions. Wheat can be boost in and axion, the city aid port of the saint and in the West—and we take occasion to say, and in the West—and we take occasion to say, and in the West—and we take occasion to say, and in the West—and we take occasion to say, and in the West—and we take occasion to say, and in the produce of the great rivers and valleys. It will also become the great rivers and valleys.

and encouraged in all their agricultural parauits. But shall not our manufacturers and mechanics I returned vesterday from a visit to Kensucky, and laborers be protected also, by sufficient dutyturn them over to agriculture. Then the Farm- boarding and public houses. turn them over to agriculture. Then the rolling his strength daily. He was able to take ers wou'd bave to suffer, for all would be produced by the production of the productio cers and there would be no consumers. What then is our bost policy ! . It is as plain and destinct as the light of the sun!-We should encourage the catablishment of manufactories and workshops here, on our own soil and we should encourage workmen to come here from Europo o conduct them. Then our Farmers would be sure of selling their produce to them-the wages we should pay would not be lost to this country, but would be spent among us-our industrious population would be increased, and they are the real strength and wealth of a nation-their next generation would be American born citizens, and would be republicans educated under our free in Antutions -we would be more independent of For

studions—we would be more independent of For leign Governments in case of war, and in fact we should be benefitted in every way. It is the policy recommended by Washington and Jefferson, the gold fover these central the member by June next to 9000. More dry goods have seen shipped to that region since the gold fover these central the gold fover the Mr. Clay has invited Gen. Taylor to visit A-h- should be benefitted in every way. A man by the name of CLAPP has engaged with a young man of the name of S. P. Townsend, and uses his name to put up a Sarsaparilia, which they call Dr. Townsend's Sarsaparilla, denominating it GENUINE Original, etc. This Townsend is no doctor, and never was but was formerly a worker. was; but was formerly a worker on relironds, canals and the like. Yet he assumes the title of Dr., for the purpose of gaining credit for what he is not. This is to caution the public not to be deceived, and purchase none but the Genuine Original Old Dr. Jacob Townsend's Barraparilis, having on it the Old Dr's. likeness, his family coat of arms, and his signature across the coat of arms.

Genuine Townsend is, now about 70 years of age, and has long been known as the author and discoverer of the Genuine Original "Townsend Sarsaparilla". Beling poor, he was compelled to limit its manufacture, by which means it has been kept out of market, and the sales circumscribed to those only who had proved its worth and known its value. It had reached the ears of many, necercheless, as those persons who had been healed of core diseases, and saved from death, proclaimed its excellence and wonderful HEALING POWER.

Knowing, many pears age, that he had, by his skill, science, and experience, devued an article which would be of incalcuable stwantage to mankind, when once known and extensively used, he hoped and persevered, experting the tipacle arrive when the means would be furnished to bring it into universal notice, when its inestimable virtues; would be known and appreciated. This time has coine, the means are supplied; this GRAND AND UNEQUALLED PREPARATION. Is manufactured on the largest scale, and is called for throughout the length and breadth of the langest precially as it is found incapable of degeneration of deterioration.

Let every man ring throughout the land, that Oid.

necially as it is found incapable of degeneration of leterioration.

Let every man ring throughout the land, that Old Dr. Jacob Townsend is now manufacturing the real Townsend Sarsaparilla, which neces sours, never forments, and neces charges its character.

From this day furth the people shall have the Pure Genuine Trunsend Sarsaparilla, which shall never sour in the hottle, or in the stomach, and it shall yet banish from the land all Fer centing. Souring, Eaploiding, Vinegary Sarsaparillas, now in use. A goad Sarsaparilla, pure and genuine, ought to live; a poor souring, ship-slop-Sarsaparilla upit to droop and die. The Old Dr's. Sarsaparilla will keep pure and perfect 100 years. souring, stip-stop, sarsaparilla, ought to droop and die. The Old Dr's. Sarsaparilla will keep pure and perfect 100 years.

Unlike young S. P. Townsend's it improves with nge, and never changes, but for the better; because it is prepared on setentife principles by a scientific man. The highest knowledge of Chemistry, and the latest discovings of the Art have all been brought into requisition in the manufacture of the OLD DR's. SARSA-PARILLA. The Sarsaparilla root, it is well known to medical men, contains many medicinal properties, and some properties which are hert of useless, and others, which, if retained in preparing it for use, produce fermentation and acid, which is injurious to the system. Some of the properties of Sarsaparilla are so relatife, that they entirely evaporate and are lost in the preparation, if they are not preserved by a schenific process, known only to those experienced in its manufacture. Moreover, these volutile principles, which thy off in vapor, ords an exhaltation, under fleat, are the very essential medical preparities of the root, which give to it all its value.

Any person can holl or stew the root till they get a dark colored liquid, which is more from the coloring matter in the root than from anything else; they can then strain this insipil or vapid liquid, sweeten with sour moissess, and then call it "Sarsaparilla Extract or Symp." But such is not the article known as the GENUINE OLD DR. JACOB TOWN SEND'S SAR-

or Syrap." But such is not the article known actual GENUINC OLD DR. JACOB TOWNSEND'S SAR-SAPARILLA.

This is so prepared, that all the inert properties of the Sarsaparilla root are first removed, every thing capable of beccoining acid or of fermentation, is extracted and rejected; then every particle of medical virtue if secured in a pure and concentrated form; and thus it is relidered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most pawerful agent in the CURE OF INNUMERABLE DISEASES.

Hence the reason, why we hear commendations on every side in its favor by men, women, and children. Byspepsia, and Liver Complaint, and in Rheumatim, Strofula, Piles, Costiveness, all Culaneous Emptions, Pluples, Blotches, and all affections arising from !
