citizens and exposed them to the most active competition from abroad. The price of labro in England of necessity fell in proportion to their financial difficulties. These in their turn caused the abandon-ment of many projected Railways and large quantities of fron, which it had been supposed would be required at home, were thus forced upon foreign markets. Under the present system of advalorem duties, these importations, at extremely low rates, produced a corresponding decline here, and closed many Mills, Furnaces and Mines. Thus the consumption of Coal awas greatly lessened, and the price sank to an extent almost unprecedented. Many of those engaged in the Trade became uterly anable to meet in cash the demands of this Company for Freight. To have refused them credit would have been slike injurious to our policy and permanent interest. The object of those connected with this work, must ever be to enlarge, encourage and foster the trade. The Governor recommends the payment of the interest on the public debt—hitherto dischanged in depreciated paper—in convertible funds. He orges the refusal of all moneys for public dues, orges the relusar of an anonys for public dues, not convertible to specie.

He suggests a general reform in the manner of adjusting and equalizing the valuation of property for taxation. A full return of the products of arm and manufactories, by the Assessors is re-

commended, at least, triennially.

An examination of the revenues and expenditures, he asserts, proves the necessity of increased resources; and he makes the real deficit in four years, \$248,912 19.
