THE MINERS' JOURNAL, AND POTTSVILLE GENERAL ADVERTISER

CONTINUED FROM FIRST PAGE.

nternal improvements are still more seriously affected. The raw material in its transit to the satisfactory evidence of the bunn fit value of its manufactory, and the fabric on its way to market, assests, shall have convinced a committee sp-aro principally conveyed along our canais and rail roads, thereby yielding a handsome revenue to ability to redeem all its liabilities. Such state-the Commonwealth. When, therefore, the manu. ments duly authenticated, should be filed on recunprotected by the government, is com- ord in the state department for the inspection of pelled to discontinue his business, not only the all persons interested. Babore; the arizan and the agriculturat, but the state also is seriously injured in the gen ral de-State also is seriously injured in the gen ral de-

These observations apply to the laborers en-recal to basiness, tha diminished wealth of the country, and the reduced value of capital. These observations apply to the laborers en-recty of the State consists of noise, and transporting, gared in the bunness of mining, and transporting, our coal to market, as well as to the operatives issued by foreigo institutions, about whose solventhe demand of household use is supplied, this This circulation, while it inflicts injury on the article must seek a market in those districts or the community, is in direct contravention of the ex-country, where manufacturing industry abounds, press terms of the law. As it is manifest, the and the demand for it increases or diminishes in example. gested, shat an act preventing under severe pen-alties, the banks and brokers dealing in monsy, proportion to the active operations of these estab hments. Hence, every fire that is extinguis and every wheel that is stopped, lessens the de-mand for coal, decreases it value in the market, the same from their counters, would have a ben-and reduce the same for their counters, would have a benand reduces the prices of labor, by lessening its eficial effect in driving these notes from circulavalue to the owner of the article. When to this added the fact of competition from abroad, under-selling in the home market the domestic article, infinitely to be preferred, that they should be isthe occupition of the laborer is destroyed, and the, such is own State banks, whose solvency is runn is complete. The revenue system invites known, rather than foster a circulation issued by such a result, while the system of discriminating institutions, whose shifties to redeem them may by nacertain. With these elight modifications of for protection for bids it.

The policy of giving fair and reasonable pro-tection to the domestic industry of the country, has beretofore received a support so cordial, from wine and matricin articity externations are the total and the renewal of those now existing the tions, or the renewal of those now existing, th vize and patriotic statesmen who have conducted the affairs of the national government, as well as those who have preceded me in the administration realth, thet I cannot refrain from grants of power, I should deem it right to leave of in P Commonwealth, thet I cannot refrain from the insertion of a few extracts from their several messages.

In his eighth message. Washington deemed it proper to bring the subject to the attention of Congress:

In his eighth message. Washington deemed it proper to bring the subject to the attention of Congress. "Congress have repeatedly, and not without success, directed their attention to the encourage-ment, of manufactures." The object is of too much consequence not to in-ure a continuance of their efforts in every way which shall appear cligible." The eighth annual message of President Jeffert son, contains the following reference to the sub-ject : "The suspension of our foreign commerce, pro-duced by the injustice of the beligeent powers, and the consequent losses and sacrifices of our citizens, are subjects of just concern. The eighth impelled us to apply a portion of our industry and cspital to internal manufactures and improve-ments. The extent of this conversion is daily increasing, and little doubt remains that the e-tablishments formed and forming will-under the subschering to apply to make the following terming will used the subschering duties and prohibitions—become permanent." President Molison calls the strention of Cor-gress to the subject, in the following terms: "Although other subjects will press more im-ments the subject, in the following terms: "Although other subjects will press more im-conserved the subject, in the following terms: "Although other subjects will press more im-ments to easily on the following terms: "Although other subjects will press more im-ments to easily to make the following terms: "Although other subjects will press more im-ter the full of the subjects will press more im-ter to be subject, in the following terms: "Although other subjects will press more im-ments to easily on the subjects will press more im-ter the subscription lists, BOOKSELLERES

therefore cordinally recommend it. "TIONAS II. BURNOWES." Q Lancester, Nov. 28, 1857. Litic, Sept. 20th, 1848 Mr. Rannan-Dear Sir :-- I have received from yoo with much pleasure a copy of the "Columbian Calcula-tor," a treatise on elementary arithmetic, by Almon Ticknor. After a careful examination of the wirk, 1 have come to the corclasion that it is well-calculated to import a full and clear understanding of figures, as applicable to the business transventions of the country, and cracely sack a work as should be introduced unto the school throughout the State of Pennsylvania. The work is full and comprehensive, and treats of several subjects which are often comitted in elementary works, mong which I was particularly pleased to notice, is that of "Fractient Mensuratios." A familiar a conjuntance with the principles therein developed would form an ea-cellent has for an ordinary mithematical education. Yours respectfully, Jonn Buce, Yours respectfully, Jonn Buce, So far as I have bady no opportunity of examining Mr. Ticknor asystem of artification and should be much pleased with the mode of its execution and should be much pleased to have 'z generally jairoluced into the Counton schools of this place. II. II. BLAIR, Teacher.

Principal of Institute for Boys, York, Pa. Yor2, Reprender 21st, 1948. Mr. Ticknor-Sir: -- have examined will consider-able care and attention your treatise on arithmetic sty-led the Golumbian Calculator. It is, in any opinion, a very valuable work for schools not only on account of the system and practice which it embodies, but for its adoptation to the currency of this country. Explana-tions throughout the whole work are plain and as its fac-tory, and the brief system of mensuration which is ap-pended embraces many things useful both to the busi-ness man and the student

Bespectfully yours, ANDREW DIMNORE, Principal of York County Academy.

The undersigned, having carefully examined the Youths' Columbian Calculator.' by Almon Tickbor Souths' Columbian Calculator.' by Almon Tickbor Lag believe it to be an excellent introduced into all the Dis-trict schools and Academies throughout the United tudy of articulation on yolter arch of fatters. Richering tto be a work of practical utility and he kind they have examined. They intend to introduce into their respective schools as some as practicable, A. C. Fisurga, J. Hory, Farra Bracarnesars, Js. Sclins's Groer, Pa., June 2d, 1848. Teacher Brain and States and the citizens of this great Re-light that hour, when all the citizens of this great Re-light that hour, when all the citizens of this great Re-light that hour, when all the citizens of this great Re-light that hour, when all the citizens of this work is sclins's Groer, June 2d, 1848.

Selia's Groce, Pa., June 2d, 1648. Teachers. Selia's Groce, June 2d, 1648. Teachers. Selias Groce, June 2d, 1849. Having examined the Columbian Calculator, by Mr. Almon Ticknor, I believe it is a most admirable work to give the young scholar a pmper idea of the science of Arithmetic. The rules are comprehensive, and the ex-amples being urranged in a natural and progressive or-der, brings the work within the comprehensive of pupils, and is well calculated to farillate their advancement in this important branch of education. The work in my opinion, is well calculated for common schools and academize. I will introduce it in my school as aoon as possible. Thomas LLOTD, Teacher of Belect School. Lendits, which an expensive circulation of thus work is destined to produce wherever it is introduced. B. C. Waaxes, Teacher of Public School, No. I. Having exammed the system of arithmetic by A. Tichner, I cannot but express a decided opinion in its favor : particularly as relieving the pupils under the as well as presenting the science in a plain and concirc view. On these accountion that recommend in spracticable. Principal of Danville Academy, Pa. Daxville, May, 1848. Millos, June2, 1616.

Nillos, June2, 1846. Mr. Ticknor--Dear Sir .--Having examined the work entiled the "Columbian Calendator," I deem it due to the author to say it is the best work upon arithmetic that I have examined; therefore I would recommend it to the public school in our district. Yours respectfully, J. N. Hurr, Teacher. The "Columbian Calendary"

The "Columbian Calculator," by Mr. Almon Tick-nor, I have examined, and must say that I are very much pleased with its arrangement, and I think its in-troduction into our schools would be a great and public breact. Principal Public School, New Berlin, Union Co., Pa.

benefit. Grond Links, Sew Berlin, Union Co., Pa. Principal Public School, New Berlin, Union Co., Pa. [From the Easton Journal.] Mr. Editor:- The grand object in a course of elemen-tary education about dever be, the securing a sure and permanent foundation. It is self-evident, that if this wild foundation be wet accured, the future labor of the teacher will become comparatively valueless, and the database of the pupils' attainments necessarily super-ficial. The well-educated teacher will claimlittle spa-pathy with those of a big profession, who, in order to se-cure an evanescent fame for big school, will heatily rear a superstructure that has but sand for its foundation. It is eminently due the young scholary, and due the index primerity in the school will heatily rear a superstructure that has but sand for its foundation. It is eminently due they young scholary, and due the index primerity in the school advance them by a grad-wal and zere profess of instruction. If will knowners with the primary elements in the various departments of useful study, and "rooting and grounding" them well in those elements, he will proceed gradually, bying broader and depert the foundation of their education, until he has prepared the way for the up-rearing of an elegrant, efficient and permanent superstructure. These remarks premared the various demarities and district erbonis, a work intely published, entitled "Then youth's Columbian talculator," in a which was prepared for the press for the specific object of making it serve as an *introduction* to the latter work, and the want of which was fit by published, entitled "Then by outh's columbian Calculator," will be rewarded tor his pains, by finding at last, a work pre-cherly adapted to the ordinary curve curve of invenile midds, and which ade they object on the hatter work of the mark efforted press for the specific object of making in the school, and finds it exactly adapted to the ordinary endils endinention. The way for ta-the inthe

Interpret for control of the second s Teacher Young Ladies' Ethool. I have examined Mr. Ticknor's work on arithm, "ic? entitled the Columbian Calculator, and consider it au-mirably calculated for common school instruction. As soon as practicable I will introduce it into my school. E. D. STILES, Classical School, Hamburg.

Indiana University, Blassington, Nov. 25th, '45, Mr. B. Bannan :--Bit: Having examined with some care the Columbian Calculator, and the Columbian Youth's Calculator, they appear to me to be better a-dapted to the purpose of School books, on the subject of which they treat, than any other with which I am acquainted. Very respectively yours, dec. ANDREW WYLLE.

Lebans, June 9th, 1848. Mr. A. Tieknor-Sir:-Having had in vetter for some time your system of arithmetic, entity. J the "Co-lumbian Calculator," J to not hesitate to pronounce it a work well adapted for the use of schools, and also well calculated to facilitate the instruction of youth in the science of Computation, for any business. Yours truly, JAMES ROOSES. Mr. Ticknor-Dear Sir --- I have examined your book

Mr. Ticknor-Dear Sir :-- have examined yourbook entitled the "Columbian Calcutator," and can say Iani much pleased with its contents." It combines great per spicitity of arrangement with originality and excellence of matter. Long theoretical explanations, useless to young students, and all else not highly practical and useful is where excluded from its pages. I think it well calculated for all primary schools. The work it-self bears evidence of the ability and experiment of its author, and to those who may have occasion to use or examine it, it will be its own best recommendation. Brofessor of Mathematical and Military Nicherces.
