But the Committee, much as they regretted the state of things, were restrained in ments and payments for miners and laborers, and all their previous reports from recommending reimption along the lines of the Canal and Rail

This object, the Committee constantly kept in view, and if in the suspension which they recommended, they occasioned any inconvenience or losses to dealers or consumer, they feel easured that no one will attribute it to unfairness, or want of sympathy, but solely to the absolute necessities of the trade.

As your committee will recommend a pastial resumption, they would urge upon every operator the great impurlance of not forcing coal into market. Let actual orders be filled, but save the trade from excess of shipments, and adhere firmly and un good faith to the prices. Most of the evil attending the trade her tolors is chargeable to the practice of sending Coal into market, on consignment, without fixed prices, thereby placing it at the disposal of the consigner, whose principle to be is his commission, regardless of the sectification, and the constantly on hand at very low prices the disposal of the consigner, whose principle should be abandoned.
