POTTSVILLE.

SATURDAY MORNING, MAY 20, 1840. T We have not time to attend to the Empovium this week. We may devote a few remarks to it next week, and expore the "homorable gentleman's" notorious falsebroods, and also his "order and the safety of persons and property. The emigration to that territory is already great, and will be immensed using the summer; and, if there seemed there apply.

iblish a State government until Congress shall ave acted on the subject, it is probable that it rill go into operation in a short time. Such a measure is indispensable to the preservation of order and the safety of persons and property. The imigration to that territory is already great, and will be immense during the summer; and, if there were no government to restrain crime, there would be little safety for individuals or their property. Most of the emigrants from the United States are persons of respectability and substance, and will contribuse much to the preservation of order; but there will be thousands of persons from the Pacific coast, and from warrous sections of Europe, many of whom may be found trophesome, unless there be established laws for the punishment of offences. There can be no doubt that the Californians will apply to Congress, at its next session, to have the approval of every patrioric places of the white and colored the completion of the completion of the white and colored the salins and cashmer's such a general variety of goods adapted to the completion of the completion. The quantity of Coal sent by Railroad this week, is 36,790 10 tons—by Capil 12,719 09—for the week 49,510 04 tons. The shipments for the corresponding week last year, were 46,651 09 tons.

The decrease from this region this year, compared with the last, is about two hundred thousand fons. This deficiency cannot be unsel up for the balance of the season, and consequently the consumers abroad need not look for an increase in the supply of our staple this year over the supply of 1848.

The difficulties among the Boatmen on the Lehigh was not, on Thursday last, adjusted, and the supply of Coal furnished from that region for the week of course is small.

Col. Benton made a brief appeal to the People f Missouri, some time since, of which the fol-

From this command I appeal to the people of Missouri—the whole body of the people—and if they confirm the instructions. I shall give them an opportunity to find a Scienter to carry their will into effect, as I cannot lie anything to dissolve this Union, or to array one half of it against the other. I do not admit a dissolution of the Union to be a temedy, to be prescribed by statesmen, for the diseases of the body politic, any more than I admit death, or suicide, to be a remedy, to be prescribed by physicians for the diseases of the natural body. Cure, and not kill, is the only remedy which my mind can contemplate in either case."

Something New .- Mr. Snell, of Bethlehem . ays the Easten Whig, has invented a new and agenious machine for which he has obtained a natent. It forms ladies' and gentlemen's gaiters, palf gaiters, and sho t boots without scame, at the same time producing any size required, in all their proportions, so as to fit with the greatest nicety and exactness. The machine will form any of the materials in general use; such as patent leather. calf, kip, men's morocco, splitleather, or any thing woollen. It dispenses with the knowledge of boot cutting and more than half the binding. Such' is its simplicity that any person unacquainted with

the business can use it. Unparalleled Increase in Population .n 1830, says the Lowell Courier, the population, of Manchester, N H., was 887; in 1840, 3,225. By a recent census, it appears that the present population is 14,512, an increase almost without paralled. The number of males is 5,928; females 8,614; excess of females, 2,686; gain two last years, 2,256. It is estimated that by the 1st of July the population will be full 15,000, as the new factory will add several hundred to the resent number.

The St. Louis Fire .- The fire in St. Louis few days ago, appears to have been a terrible onflagration—the property destroyed amounting o \$5, or 6,000 000: The whole number of buildings destroyed is 418; in the lower part of the town, 118 houses. It cannot be ascertained yet how many were killed.
