Through Chancery —A gentle-man well known in this city, who for several years kept a fast horse, elegant carriage and all the necessary paraphernalis that pertains to such an establishment, one day suddenly found him-self short of furds, and sundry autographs of his dishonored at the banks. The result was, that in order to get a clean bill of health as soon as possible, he availed himself of that most convenient method of getting rid of his liabilities—coing nient method of getting rid of his liabilities—going into Chancery. Subsequently, however, he continued to drive the same elegant turnout, and had apparently experienced no special abridgment of his comfort by the operation of the law, as ad-ministered by the "master in chancery." Opinions of the Philadelphia Press,

"THE DISPATCH," December 31st asys:—

AN INVALUABLE MEDICINE.—We have frequently heard of the Celebrated German Bitters, manufactured by Dr. Hoofland, spoken of in termsof commendation, and we know deservedly so. It is a too common practice, in certain quarters, to peff all manner of uscless trash, but in the case of their great moral and physical worth. As a medicine for the Liver Complaint, Joundice, Nervous Debilityfund Dyspepsla, this has been found invaluable, effecting cures, and therefore the country of the continued that in the use of the German Bitters, the pulient does not become debiliated, but containtly gains' strength to the frame—a fact

The Bitters are pleasant in taste and smell, and can be administered under any carcumstances, to the most delicate stomach. Indeed, they can be used by all persons with the most perfect safety. It would be well for those who are much affected in the nervour system, to commence with one tea spoonful of less, and gradually increase. We speak from experience, and are of course, a proper judge. The press far and wide, have united in recommending the German Bitters, and to the afflicted we most cordially advise their use.

THIS EXTRAORDINARY substance is found in a strata of rock, of a basin formation. When taken from the nine, it resembles in appearance the finest Indigo, and is about the consistence of cold tailow; but on exposure to the atmosphere, in a short time turns to Stone or Slate. Geologists who have seen it, are of the impression that this substance, when in a liquid state, has been effused through a fissure and filled up this basin formation in the rock.

It has been found upon anylyzation by Dr. Chilton, of New York, to consist of:

Alumina.

THE SOWER. I saw a sower walking slow Across the Earth from East to West;

His hair was white as mountain snow. His head dropped forward on his breas With shivering hands he flung his seed, Nor ever turned to look behind; Of sight or sound he took no head. It seemed he was both deaf and blind.

His dim face showed no soul beneath, Yet in my heart I felt a stir. As if I looked upon the sheath That once had clasp Excalibur. I beard as still the seed he cast, How erooning to himself he sung, "I sow again the boly Past, The happy days when I was young.

Shall plant the Old World in the New. "The fultful germs I scaller free;
With bilsy band, while all men sleep—
In Europe now, from sea to sea,
The nations bless me as they reap." Then I looked back upon his path, . And heard the clash of glitt'ring steel, Then man faced man in deadly wrath, While clanged the tocsin's hurrying peal-

Then marked I now each germ of truth, Which through the dolard's fingers ran, Was mated with a dragon's tooth,
Whence there arrung up an armed man.

And still, without a doubt or fear, Broadcast he scattered anarchy. Lorg to my straining ears, the blast frought faintly back the words he sung. The happy days when I was young?"
