Unike-young S. P. Townsend's it improves with age, and never changes, but for the better; because it is prepared on scientific principles by a scientific man. The highest knowledge of Chemistry, and the latest discoveries of the Art have all been brought into requisition in the nanufacture of the OLD DR's SARSA-PARILLA. The Sarsajarilla root, it is well known to medical men, contains many medicinal properties, and some properties which are inert or uscless, and others, which, if retained in preparing it for use, produce formantation and acid, which is injurious to the system. Some of the properties of Sarsaparilla are so velatile, that they entirely evaporate and are lost in the preparation, if they are not preserved by a scientific, process, known only to those experienced in its manufacture. Moreover, these volatile principles, which ify off in vapor, or as an exhaltation, under heat, are the very essential médical properties of the root, which give to it all its value.

Any person can boil or stew the root till they get a dark colored liquid, which, is more from the coloring matter in the root than from anything else; they can then strain this insipid or vapid liquid, sweeten with sour molasses, and then call it "Sarsapavilla Extention SAPARILLA." Sarsapavilla challed in the coloring matter in the not then every particle of medical virtue is scured in a pure and concentrated form; and thus its irendered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most howerful agent in the CUIRE OF INNUMERRABLE DISEARES.
