WM. B. WELLS, Attorney at Law, Minersville WEGuylkill County, Pa. (Oct. 4.3)

Coal Shipping and Commis--

The following is a summiry of remarks made by Mr. Lyon in a lecture before the Darby Far-mers' Club. The principles laid down are worthy of streation :

generation. When an animal is in good condition it yields as When an animal is in good

greater produce for its food, than when it is poor and lean. If, therefore, an animal be first fed on good

If, therefore, an animal be first fed on good pertore till it is from and far, and then removed to poor keeping me as to lose its condition, not only is the food wholly lost on which it declined in flow, but all the good food which it may con-suras for some time afterwards has very much less effect. The feeding of snimals should therefore be quite

continuous, as well as liberal, in order to be fully profitable.

All animals pay best for that amount and kind

All enimals psy best for that smount and kind of food which causes them to produce more large-ty. That which makes rearing stock grow and thrive fastert, that which makes feeling beasts or sheep fatten most quickly, and that which makes miking beasts milk most profasely, and for the longest time, is the best and most profable kind. The principle of continuous feeding is especial-ty applicable to miking cutte. For if the milk be suffered to fall off, it cannot be brought fully to the the the fattening processity : and it, during

return, like the fattening projensity; and it. during the interval between the cessation of the faith and

cilving, the state or constitution which prometers the flow of milk decline, it requires a log period to bring out the full effect of the liberal field given

afterwords, and the core never yields at largely as she otherwise would have done. It is always profitable to grow on hand a sue

cession of nutritious crops for all stock kept on it. But in those cases where she natural produce of the land is deficient in richness, or where mich.

straw, in proportion to other forage is grown, or where the essualties of sesson cause crips of cattle food to be deficient, it is always advanageous to

add a portion of artificial strong food, such as cake or corn, or linsced. to the food of animals whether.
