IRON MANUFACTURES ABROAD. Their Present Position in Regard to the American Market, and some Useful Data in the Im-provement of Machinery, &c.

A communication appears in the last number of the Franklin Institute Journal, from Hugh L. Damsel, Esq., of South Wales, which affords an interesting and comprehensive view of the present state of Iron Manufactures in that region, and elsewhere.

Notwithstanding the low prices of pig iron ufacture. in Scotland, a majority of the malleable iron works there have failed to prove remunerating to their proprietors ;-hence Mr. D. states his conviction that the Welch manufacturer never had any cause for apprehending the and deducting seventy-eight shillings, or shores not in that Senate !" destruction of his manufacture by the Scotch ore, labor, and all other expenses incurred by malleable iron manufacturer; nor does he bethe American manufacturer, at rates twenty lieve that any one acquainted with the presper cent. higher than those paid by his Welch eat condition of the Scotch works would encompetitor, there remains twenty-five dollars tertain such an idea. The facility of manufacturing iron from black-band is so great, will keep possession of the American pig iron market. If the four tons of coal required in ers; but in the article of bar iron, there is of the iron above the twenty-three miles. yet much to be done before he can successfully cost twenty-five dollars and a half per ton, compete with the Welch manufacturer in any there can be no profit, but if they cost less. foreign market.

ton which would accrue to the proprietors. The exhaustion of the celebrated black band, (from which nearly all of the Scotch Nr. D. thinks that, if our works were conducted on the "Welch system " at a mode
