"If Gen. Taylor succeed in carrying out his views. "If Gen. Taylor succeed in carrying outhis views, he will be the greatest man that America has produced, and the magnificent benefactor of his country. The Americans have coal, tron, timber, and can raise sufficient cotton for the world. They have exhaustless supplies of corn and provisions, cheap and fertile lands, no taxes worth mentioning. Why, then, should they not manufacture for themselves I. Why should cotton be brought four thousand miles to England, to be spun and woven in Lancashirs, and Why should cotton be brought four thousand miles to England, to be spin and woven in Lancashire, and be carried some three or four thousand miles more to the United States to be consumed? We cannot see any reason for it. It is true, that England has had the start in manufactures, but what right has able to expect to be always first in the race? The Americans are not only justified in protecting their own interests, but, as the President says, "It is the right and duty of Congress to encourage domestic industry, which is the great source of national wealth and prosperity." Sounder policy was never broached, traver words never intered.

The party that does that, whatever may be its name, will finally triumph, whatever may be the ups and downs of parties in the mean time. That is the party that must ultimately come into the remainent enjoyment of power, for it will be in fact and in truth the people's party, and they would let such a party, in all things else, do pretty much what it pleased.

We do think there was more treathery of Democratic members in the last Legislature than was ever exhibited in any previous one. Before the enactment of the Turift of 1846, the Central Rail Road Company entered into a contract with the proprietors of the Safe Harbor Works, for the manufacture of a very large quantity of rails at about sixty dollars a ton. The contract is still unfulfilled, and the rails can be made at the price with profit. British rails can be obtained for about forty dollars a ton; but the Railroad Company requires the Contractors to supply rails of American manufacture. Burn from an Explosion of Gunpowder-Blasting Rocks.

HENRY Dalley, Esq., New York—

Dear Sir: I bereby certify, that in the early part of
Jarch last, while engaged in blasting rocks, a charg
of powder premararely exploded, taking full effect
upon my face, chest, and left arm, and burnt me in:
dreadful manner. I was carried home on a litter,
face swollen to twice its natural size; the flesh twice for my man, below the elbow; and my even filled with

bufar all over, and havins thing's black scab over it he directed positives to be applied, to draw out the powder. This I resisted, being fearful of losing my eyes; has having heard much of your Pala Extractor, I was completely cured; without a scar, and formight, and without any other application than your Extractor, I was completely cured; without a scar, and my eyesight fully restored.
