Residence

YANKEE COODLE. By Thomas S. Denske. "Yankee Boodle!" Long ago They played it to deride us; But now we march to victory. And that's the tune to guide us:

Yankee Doodle! ha! ha! ha!

Yankee Doodle Dandy! How we make the Red Coats run At Yankee Doodle Dandy ! To fight is not a pleasant game; But, if we must, we'll do it!

When "Yankee Doodle" once begins; Our Yankee boys go through it: Yankee Doodle! ha! ha! ha! Yankee Doodle Dandy! "Go ahead!" the captains cry, At Yankee Doodle Dandy!

And let her come upon the sea, The insolent invader-There the Yaukee boys will be Prepared to screnade her : Yankee Doodle! ha! ha! ha! Yankee Docale Dandy! Vankee guns will sing the bass Of Yankee Doodle-Dandy! "Yankee Doodle!" How it brings The good old days before us!

Two or three began the song-Millions join the chorus! Yankee Doodle! ha! ha! ha! Yankee Doodle Dandy! Rolling round the Continent. Is Yankee Doodle Dandy ! Yankee Doodle:" Not alone The Continent will hear it-But all the world shall eatch the tono, And every tyrant fear it! Yankee Doodle! ha! ha! ha! Yankee Doodle Dandy!

## Wit and Humor.

Freedom's vol. s is in the sons

Of "Yankee Doodle Dandy !"

INCESTOUS TRICK. An English paper relates the following in genious mode of "raising the wind," practised by a musician on the credulity of the inhabitants of a country town:

"A foreigner, named Vogal, a celebrated flute player, advertised a concert for his benefit, and in order to attract those who "Had no music in their souls, And were not moved by concord of sweet sounds,"

he announced that between the acts he would exhibit an extraordinary feat never before. witnessed in Europe. He would hold in his left hand a glass of wine, and would allow six of the strongest men in the town to hold his arm, and notwithstanding all their efforts to prevent him, would drink the wine! So novel and so surprising a display of strength as it was naturally regarded, attracted a very crowded house, and expectation was on the CHERRY PECTORAL." tiptoe, when our hero appeared on the stage, glass in hand, and politely invited any half glass in hand, and politely invited any half are by many prominent professors and physicians in dozen of the audience to come forward and this and foreign lands, should encourage the afflicted put his prowess to the test. Several gentle- to ipersevere with the strong assurance that the use of tnen, amongst whom was the Mayor of the place, immediately advanced to the stage, and grasping the left arm of Vogal, apparently rendered the performance of his promised feat quite out of the profice confidence may be also out of the profice confidence may be also out of the profice of the profice confidence may be also out of the profice of the profice out of the profice o DI. PERKINS, President Vermont Medical College, one of the most learned and intriligent physicians in the cauntry, considers it at "composition of race in the cauntry considers it at "composition of race in the cauntry considers it at "composit

RICH SCENE IN AN AUCTION ROOM. an auction sale of damaged dry goods, where your humble servants. the biddings were "spirited," and the large crowds of males and females were vieing with each other in their offers, when a pair of blankets were put up, and a dozen bids were raised for them. The puzzled auction eer, however, caught up the highest, which was, I think, a dollar, from a female who seemed determined to have them at any price when ere he could say "going," a male voice cried out, "Dollar fifty," from the opposite side of the room.

vo; well done Vogel."

"Two dollars," echoed the woman, elbow ing her way through the dense mass of females, who were separated from the males curing diseases of the Lungs, when they will feel se by a long counter upon which the glibtongued functionary walked to and fro with of choice and amusing "figure of speech," till he touched upon the finale.

"Two fifty," nodded the man. Thank ye, sir; going at two fifty ?" "Three!" screamed the woman.

"Four," replied the man. "Gin the fifty ?" said the auctioncer, turning to the woman, with a half-suppressed smile on his small, sober visage. A nod

own wife! Oh, you impudence! but I won't have them in the house."-[N. Y. Spirit of the Tunes.

## A TIMELY HINT.

Which Disconcerted a Great Orator. Many anecdotes have been told bearing pretty hard upon the late John Randolph, some wholly fictitious, others not. Among them is the following:-"On one occasion when the subject of making appropriations for the public buildings were under consideration in Congress, Mr. Randolph rose, and as usual spoke in opposition to it-appropriations had been frequently asked and granted and still the buildings went up with a stealthy pace; he wanted to see the end of it, and for this purpose he moved to refer the subject to the committee on unfinished business. A workman in the gallery close by, irritated at the opposition Mr. R. had shown to what the opposition Mr. R. had shown to what was to constitute his support, and unable to bear this taunt. cried out, in a voice something like Randolph's, "And I move, Mr. Speaker, that the gentleman be referred to the same committee." This severe retort upon the ill-formed and badly-made orator from Virginia, set the whole House in a roar, and the Sergent-at-Arms was immediately despatched to arrest the offender, but he disappeared and could not be found."

NEGRO ELOQUENCE.

A dandy black stepped into a provision store to buy some potatoes. Before purchasing, he gave the following truly eloquent description of that vegetable:

"De tater is inevitably good. Dare is no amediacrity in the combination of the there."

It never falls while there remains sufficient life to festere a natural and healthy action to the capillary tester and reliation to the capillary tester of the same and pain.

It never falls while there remains sufficient life to restore a natural and healthy action to the capillary tester of the same and pain.

It never falls while there remains sufficient life to restore a natural and healthy action to the capillary tester of the same and pain.

It never falls while there remains sufficient life to restore a natural and healthy action to the capillary tester of the capillary tester of the same and pain.

It never falls while there remains sufficient life to restore a natural and healthy action to the capillary tester of the same and pain.

It never falls while there remains sufficient life to restore a natural and healthy action to the capillary tester of the same and pain.

It never falls while there remains sufficient life to mean the period to the sum all pain falls the capillary tester of the same and pain.

It never falls while there remains sufficient life to mean tester of the same and pain.

It never falls while there remains sufficient life to mean tester of the same and pain.

It never falls while there remai workman in the gallery close by, irritated at and virtue of this great remedy.

March 3, 1850;

Warranted Fire and Thief Proof, and free from Dampness.

THESE SAFES possess every qualification to render them proof against the action of fire or thieves and of sufficient strength to endure a fall from any story of a burning building. They are made of wrough iron, being kneed, riveted and welded together, and lined with a perfect non-conducting fire proof mineral composition, no wood being used in their construction as in the majority of safes sold by other makers. The doors of Gayler's Safes are secured with his Thief Detector and Anti-Gunpowder Lock, which precludes the possibility of picking or blowing them open with gunpowder. Over two hundred of these Safes have been exposed in accidental fire to the most intense heat, in many instances remaining in the burning ruins for several days, and at no time have they ever been known to fail in preserving their contents.

The public are invited to call at the Branch Depoi, No. 10, Exchange Place, Philadelphia, near Dock St., and examine the numerous testimonials in favor of Gayler's Safes, also the large assortment on hand for sale at manufacturers prices, by Warranted Fire and Thief Proof, and free April 20, 1850.

For the Removal and Permanent Cure of all NERVOUS DISEASES, f those Complaints which are caused by an in ired, weakened or unhealthy condition of the NERVOUS SYSTEM.

This beautiful and convenient application of the mysterious powers of GALVANISM and MAGNETISM, has been pronounced by distinguished physicians, both in Europe and the United States, to be the most valuable medicinal discovery of the Age. Dr. CHRISTIE'S GALVANIC BELT MAGNETIC FLUID, is used with the most perfect and certain successes of.

GENERAL DEBILITY,

Strengthening the weakened body, giving tone to the various organs, and invigorating the entire system. Also in FITS, CRAMP, PARALVSIS and FALSY, DYSPEP. SIA OF INDIGESTION, RHEUMATISM, ACUTE and CHRONIC, GOUT, EFILEPSY, LUMBAGO, DEAFNESS, NERVOUS TREMORS, PALPITATION OF THE HEART, APOPLEXY, NEURALGIA, FAINS in the SIDE and CHEST, LIVER COMPLAINT, SPINAL COMPLAINT, DISEASES of the KIDNEYS, DEFICIENCY OF NERVOUS and PHYSICAL ENERGY, and all NERVOUS, DISEASES, which complaints arise from one simple cause—namely. A Derangement of the Nervous System. 60- In NERVOUS COMPLAINTS, Drugs and Medicines increase the disease, for they weaken the vital ener-

cines increase the disease, for they weaken the vital energies of the already prostrated system; while under the strengthening, life-giving, vitalizing influence of Galvanism, as applied by this beautiful and wonderful discovery; the exhausted patient and weakened auferer is restored to former health, strength, clasticity and vigor. The great peculiarity and excellence of Dr. Christie's Galvanic Curatives,

consists, in the fact that they arrest and cure disease by entuerd application, in place of the usual mode of drugging and physicking the patient, till exhausted Nature sinks hopelessly under the infliction.

They strengthen the whole system, equalize the circuitation of the blead, promote the secretions, and never do the slightest injury under any circumstances. Since their introduction in the United States, only three years since

60,000 Persons ENTIRELY AND PERMANENTLY CURED,

when all hope of relief had been given up, and every thing else been tried in vain! To illustrate the use of the GALVANIC BELT. To illustrate the use of the GALVANIC BELT, suppose the case of a person afficied with that bane of civilization, DYSPEPSIA, or any other Chronic or Nervous Disorder. In ordinary cases, stimulants are taken, which, by their action on the nerves and muscles of the stomach, afford temperary relief, but which leave the patient in a lower state, and with injured faculties, after the action thus excited has reased. Now compare this with the effect resulting from the application of the GALVANIC BELT. Take a Dyspeptic sufferor, even in the worse symptoms of an attack, and simply tie the Belt around the body, using the Magnetic Fluid as directed. In a short period the insensible perspiration will act on the positive element of the Belt, thereby causing a Galvanic circulation which will pass on to the negative, and hence back again to the positive, thus keeping up a continuous Galvanic circulation throughout the system. Thus the most severe cases of DYSPEPSIA are FERMANENTLY CURED. A FEW DAYS IS OFTEN AMPLY SUFFICIENT TO ERADICATE THE DISEASE OF YEARS.

CERTIFICATES AND TESTIMONIALS Of the most Undoubted Character, rom all parts of the Country could be given, suffici of all every column in this paper! AN EXTRAORDINARY CASE,

which conclusively proves that "Truth is stranger than Fiction." Rheumatism, Bronchitis and Dyspepsia. REV. DR. LANDIS, A CLERGYMAN

of New Jersey, of distinguished attainments and exalted me what has been the result in my own case, of the appli-cation of THE GALVANIC BELT AND NECKLACE. My reply is as follows:

cation of THE GALVANIC BELT, AND NECKLACE. My reply is as follows:

For about twenty years I had been suffering from Dyspepsia. Every year the symptoms became worse, nor could to thatin permanent relief from any course of medical treatment whatever. About fourteen years since, in consequence of frequent exposure to the weather, in the discharge of my pastoral duties, I became subject to a severe Chronic Rheumatism, which for year after year, caused me indescribable anguish. Father: in the winter of '45 and '46,' in consequence of preaching a great deal in my own and various other churches in this region, I was attacked by the Bronchitis, which soon became so severe as to require an immediate suspension of my pastoral labors. My nerrous system was now thoroughly prostrated, and as my Bronchitis became worse, so also did my Dyspepsia and Rheumatic affection—thus evincing that these disorders were connected with each other through the medium of the Nervous System. In the whole pharmacopoia there seemed to be no remedial agent which could reach and rocuperate my Nervous System; everything that I had tried for this purpose had completely failed. At last I was led by my friends to examine your inventions, and (though with no very sanguine-hopes of their efficiency.) I determined to try the effect of the application of the GALVANIC BELT AND NECKLACE, with the MAGNETIC FLUID. This was in June, 1846. To my ORNET IN EIGHT DAYS I WAS ENABLED TO RESUM MY PASTORAL LABORS; NOR HAYE I SUSCE OMITTED A SINGLE EXENCE ON ACCOUNT OF THE BRONCHITIS; AND MY RECUMANIC AFFECTION HAS ENTIRELY CRASED TO TROUBLE MEZ. Such is the wonderful and happy results of the

experiment.

I have recommended the BELT and FLUID to many who have been likewise suffering from Neuralgic affections. They have tried them, with harry arguing.

I am, dear sir, very respectfully yours, ROBERT W. LANDIS. DR. CHRISTIE'S GALVANIC NECKLACE Is used for all complaints affecting the Throat or Head, such as Bronchitis, inflammation of the Throat, Nervous and Sick Headsche, Dizziness of the Head, Neuralgia in the Face, Buzzing or Roaring in the Ears, Deafness, which is generally Nervous, and that distressed complaint, called Tic Doloreux.

Palsy and Paralysis. All physicians acknowledge that these terrible diseases re caused by a deficiency of Nerrous Energy in the flected limbs. Da. Christeric's Galvanic Articles will upply this deficient power, and a complete and entire cure is thus effected. 1000 Cases of Palsy and Paralysis have been reported to Dr. Christin and his Agents within the last two years, which have been entirely

restored.

(G. Car. Annew J. F. Tours of Brooklyn, N. Y., had not been able to walk a step for near four years, and was so helpless that he had to be fed. The most celebrated physicians gave him up. In five days after he commenced wearing the Galvanic Belt, Necklack, and Balcelers, be walked across the room, and in three weeks he had perfectly recovered his health. Captain Tomes is seventy years of age.

Severe Deafness Cured.

The following is an extract from a letter lately a eived from a distinguished physician in the State ceived from a distinguished physician in the State of Virginia:

"A. Il. Christur, M. D.—Dear Sir: One of my patients, unknown to me, obtained your Galeanie Bell and Neck: dace, with the Magnetic Finid, for a scrious affection of Deafness. The case was that of a lady whose Nervous system was much disordered, and her general health poor. Much was done previously to the application of the Belt, but with very little success, and I feel it only right to tell you, that since afte commenced wearing the Belt and using the Fluid, but a few weeks ago, she has ENTRELY RECOVERED BER. HEARING, and her general health is better than for several years." general health is better than for several years."

(G)— Every case of Deafness, if it be Nervous, as i
generally is, can be cured by this wonderful remedy.

DR. CHRISTIE'S GALVANIC BRACELETS Are found of vast service in cases of Convolions or Fits, Spasmodic Complaints, and general Nervous Affections of the Head and upper extremities. Also in Fatsy and Paralysis, and all diseases caused by a deficiency of power or Nervous Energy in the limbs or other organs of the body.

Tic Doloreux and Neuralgia. The voloreux and Neuralgia.

These dreadful and agonizing complaints are immediately relieved by the application of the Carvanic Bell. Neuralca by the application of the Carvanic Bell. Neuralca by through the system; the Necklace has a local effect, and the Finid sets directly upon the affected nerves. In these distressing afflictions the application NEVER FAILS.

Co-Many hundred Certificates from all parts of the country of the most outraordinary character can be given, if required.

Co-Many to trouble or inconvenience attends the use of DR. CHRISTIE'S GALVANIC ARTICLES, and they may be worn by the most feeble and delicate, with perfect ease and safety. In many cases the sensation at tending their use is highly pleasant and agreeable. They can be sent to any part of the country.

SONG OF THE FARMER. Im of the Band that Till the Land. I'm of the Band that till the land, And draw from earth her store; Right happy indeed's the life we lead, While our days are passing o'er.

Many there are, in inches far Surpassing the farmer's purse, Whilst other pursuits may yield more fruits Yet often produce much worse. We envy not the statesman's lot. Still clamoring for his class, Nor he that fights for glory's rights,
At some redoubted pass. No risk have we on bolsterous sea,

No fears lest tempests whelm;

All we possess, without redress, While laboring at the helm, The fruitful field its bounties yield, A rich reward for toil : Be ours the trade to ply the spade, And deeply plough the soil ; We walk abroad o'er the carpet sod, And flow'rets kiss our feet, Whose colors rise to scent the skies-A tribute pute and sweet.

To all we give the means to live, As brother share with brother, And thus fulfill the holy will That hids us love each other. Oh) life scenre from guile, and pure, To thee my life clings every With all its might in fond delight To change from thee, no, never!

The Larmer.

ECONOMY OF MANURING. Under the improved system of a rotation of crops, root culture, and alternation of grass and grain, combined with vard and stall-feeding of sheep and cattle, the quality of manure produced on the farms has in many instances been quadrupled, and the amelioration of the soil has been in the same

proportion. Scrapings of streets, leached ashes, lime, refuse from skin, leather and soap boilers' shops, slaughter houses, bones, weeds, salt, and any kind of animal or vegetable substances, by the addition of earth, may be largely increased in quality and made to en-

rich and fertilize the soil. But whatever improvements or discoveries may be made, it seems clear that the farmer including all ages, classes and conditions, among which were a large number of ladies, who are peculiarly subject to Nerrous Complaints, have been these most efficient and available. One main object should he to prevent the escape of the liquid and volatile parts of the manure, as experience proves that these are the most active in exciting or supplying plants with food and thus accelerating their growth.the yards and the stables should be provided with litter, such as straw, hay, leaves, weeds, &c., with vegetable mould or muck, with the wash of roads or the overflowing of streams, in sufficient quantities to absorb and retain the urine and other liquid parts of the manure, and where these cannot be obtained, common earth or dry sand will be found of great utility in preventing the loss which must ensue where these parts of the manure are allowed to escape from the yard. If, when the farmer cleans out his yards, he were to cover them with a hundred loads of vegetable or absorbent earth, he would find in the following year a greater number of loads of the most valuable manure, the greater part of which, without such precaution, vould have been wholly lost.

Rotted manure may afford at times more benefit to a particular crop, or may be more conveniently applied to some crops; but as a general rule, manure should be rotted in the ground where it is wanted. Some crops are rarely injured by any quantity that can be given them, as corn, potatoes, and roots generally; of course such should have the advantage of the first process of decomposition in the manure, while its after effect is

served for the grains and grasses. The great object in the application of ma nure should be, to make it afford as a nuch, soluble matter as possible to the roots and the plant; and that in a slow and gradual manner, so that it may be entirely consumed in forming its sap and organized parts.

All green succulent plants contain sa coherine mucilaginous matter, with woody fibre, and readily ferment. They cannot, t itercfore, if intended for manure, be used too soon after their death.

By covering dead animals with five or six times their bulk or soil, mixed with one spart, of lime, and suffering them to remain for a few months, their decomposition woul dintpregnate the soil with soluble matter, : 30, a9 o render it an excellent manure, a. ud by. mixing a little fresh quick lime with it. at the time of its removal, the disagreeable el Tuvia. would be in a great measure destroyed ; and it might be applied in the same way to any other manure to crops.

Green regetables, when put under it we sails nd submitted to the process of decor aposition, are efficacious in restoring exhibits usteen soils. Buckwheat and clover are striki ag instances of this power in green crops to ofertilize soils, and both have been exten. arely used for this purpose.

SEASONABLE HINTS.

Four bushels of Corn sowed broat Beas. over one acre of well ploughed and thore aughly harrowed ground, will furnish a mo at desirable supply of succulent food for cattle when the pastures give out in August Cut your Grain before it is dea Pripe. as the shattering will then not be so great. and the cradling and reaping more assilv done, besides there will be less dan ger of

having your grain lodged. 🕥 Harvest Drink.—A beverage con sposed of cold water and molasses, with the tion of an ounce of ground ginger to every gallon of the mixture, will be found refreshing and invigorating for harvest b Keep your Cornfields Clean.- V Veeds and grass are regular robbers of the fc od of the corn, and should be exterminated at once, and your cornfields kept perfectly clean irom this period to the time of the corn's full maturity. Stir the surface of your cornfiel ds in time of-drought, and by this means the e cariching gases that float in the air, we ill be absorbed, and the growth of the corn l arge-

ly promoted. Gine your laborers extra diet, in harrest time, and the amount of extra work they will perform, will more than con , ipensate you.

Three Pecks or a bushel of buckw theat s sufficient for sowing an acre of groun, id. Save your fire-wood .- Mr. Madison, i o his Notes of Agriculture, says, " Of all the ertors in our rural economy, none perh aps is . to be so much regretted, because no ne so difficult to be repaired, as the excessi ve and injudicious destruction of fire wood."

THE BEST BUSINESS. The safest and most reliable business a young man can enter, is agriculture. A good farm, well attended, is an increase Mercer Jones,
