Now Felix Magee puts his pipes to his knee.
And with floorish so free sets each couple in motion;
With a cheer and a bound, the lads patter the ground—
The maids move round just like swams on the occan.
Cheeks bright as the rose—feet light as the dos's.
Now coply retiring, now boldly advancing;
Search the world all around, from the sky to the ground.
No such sight can be found as an Irish lass dancing: Sweet Kate! who would view your bright eyes o deep blue. Beaming hunidly through their dark lashes so mildly four fair-turned arm, heaving breast, rounded form. Now feel his heart warm, and his pulses throw wildly? Poor Pat feels his heart, as he gazes, depart, Subdued by the smart of such painful yet sweet love; The sight leaves his eye as he cries, with a sigh, "Daze light, for my heart it lies under your feet, love."

Wit and Humor.

A GOOD STORY. Old Col. W-, formerly a well known character in one of our eastern cities, was remarkable for one passion out of the ordinary range of humanity, and that was for buying any lot of trumpery which came under the head of "Miscellaneous," for the reason that it could not be classified. Though close-fisted in general, he was continually throwing away his money in fives and tens on such trash. In this way he had filled all the old corners in his dwelling and outhouses with a collection of nondescript articles that would have puzzled a philosopher to tell what they were made for, or to what use they could be put. This, however, was a secondary consideration with the Colonel; for he seldom troubled his head about such articles after they were fairly housed. Not so with his wife, however, who was constantly remonstrating against these purchases, which served only to clutter up the ses, which served only to clutter up the house, and as food for the mirth of the domestics. But the Colonel, though he often submitted to these remonstrances of his better half, could not resist the passion: and so he went on adding, from week to week, to his heap of miscellanies. One day while sauntering down the street, he heard the rich full tone of the auctioneer, and of course stepped in to see what was being sold. On the floor he perceived a collection which looked as if, it might have been purloined from the garret of some museum, and around which a motley-group were assembled; while on the counter stood the portly auctioneer, in the very height of a mock-indignant remonstrance with his audience.

"Nine dollars and ninety cents!" cried the sinctioneer: "Gentlemen, it is a shame,

the auctioneer; "Gentlemen, it is a shame, it is barbarous to stand by and permit such a sacrifice of property! Nine dollars and ninety—good morning. Colonel 5. A magnificent lot of—of antiques—and all going for the most Unidontical Character, sufficient to fill erery column in this paper!

AN EXTRAORDINARY CASE, ficent lot of-of antiques-and all going for nine dollars and ninety cents. Gentlemen, you'll never see another such a lot; and all going-going-going for nine dollars and ninety cents. Colonel W-, can you permit such a sacrifice?" The Colonel glanced his eye over the lot, and then with a nod a cart, and having seen everything packed sequence of frequent exposure to the weather, in the dis-

tell you why. A few days ago I gathered I have recommended the BELT and FLUID to many together all the trumpery with which you who have been likewise suffering from Neurolgic affections. They have tried them, with harry assurers, I have been cluttering the house for the last BELIEVE, IN EVERY CASE twelve months, and sent it to him with orders to sell the lot immediately to the highest bidder for eash. He assured me he would to so in all this week, at farthest, and pay er the proceeds to my order. And here I save been congratulating myself on two things: first, on having got rid of an intolerable nuisance,; and secondly, on receiving money enough to purchase that new velvet now, what do you think? This inorning, supply this deficient power, and a complete and entire cure is thus effected. again without a word of explanation!" The 1000 Cases of Palsy and Paralysis Colonel looked blank for a moment; and then proceeded to clear up the mystery. But the good woman was pacified only by the promise of a ten dollar note beside that in the hands of the auctioneer: on condition, however, that she should never mention it. Of course she kept her word!

"POOR JERSEY."

The following incident took place not long since, on board one of the Mississippi steamers:—A party of gentlemen were conversing upon the all-absorbing topics of the unhappy differences existing between the North and South, and each one, of course, had something to say in favor of his own State. One of the gentlemen remarked that he belonged to Jergent and was proceeding to chest forth the feet and was proceeding to the feet since, on board one of the Mississippi steamsey, and was proceeding to show forth the generally is, can be cared by this wonderful remedy. merits of that much-abused portion of our Union, when he was interrupted by a jollylooking customer, with a merry eye, and a somewhat elongated proboscis, with the in-

terrogatory, "Do you really belong to Jersey?"

"I do, indeed!" was the answer. "Well, then, give me your hand. Ah! poor Jersey!" he continued, with, a deep drawn sigh-"poor Jersey! Come, sir, what'll you take to drink! You are welcome

For the Removal and Permanent Cure NERVOUS DISEASES, And of those Complaints which are caused by an impaired, weakened or unkealthy condition of the NERVOUS SYSTEM.

This beautiful and convenient application of the mysterious powers of GALYANISM and MAGNETISM, has been pronounced by distinguished physicians, both in Europe and the United States, to be the most reliable medicinal discovery of the Age.

Dr. CHRISTIE'S GALVANIC BELT - MAGNETIC FLUID, GENERAL DEBILITY.

Strengthening the weakened body, giving tone to the various organs, and invigorating the entire system. Also in FTTS; CRANP, PARALYSIS and PALSY, DYSPER, STANDING STRENG PURPHLY ACCUSED AND ASSESSMENT OF THE PARALYSIS AND in FITS, CRAMP, PARALYSIS and PALSY, DYSPERSIA or INDIGESTION, RHEUMATISM, ACUTE and
CHRONIC, GOUT, EPILEPSY, LUMBAGO, DEAFNESS, NERVOUS TREMORS, PALPITATION OF
THE HEART, APOPLEXY, NEURALGIA, PAINS is
the SIDE and CHEST, LIVER COMPLAINT, SPINAL
COMPLAINT, and CURVATURE of the SINE, HIP
COMPLAINT, DISEASES of the KIDNEYS, DEFICIENCY OF NERVOUS and PHYSICAL ENERGY,
and all NERVOUS DISEASES, which complaints arise
from one simple cause—namely,

A Derangement of the Nervous System. A Derangement of the Nervous Dystem.

(G) In NERVOUS COMPLAINTS, Drugs and Medicines increase the disease, for they weaken the vital energies of the already prostrated system; while under the strengthening, life-giving, vitalizing influence of Galvanism, as applied by this beautiful and wonderful discovery, the exhausted patient and weakened sufferer is restored to former health, strength, elasticity and vigor. The great peculiarity and excellence of

Dr. Christie's Galvanic Curatives,

CERTIFICATES AND TESTIMONIALS SUPfrient to fill every column of this paper, can be
produced, setting forth the wonderful virtues of Dr.
Swayne's Compound Syrap of Wild Cherry.
The most common saying is, that I would not give
one bottle of Dr. Swayne's Compound Syrup of
Wild Cherry, for half a dozen of any other preperation. I have tried all the popular ones, but this
stands unrivalled for the curre of the following
diseases, viz:
Influenza, Conghs, Colds, Consumption, Splitting of
Blood, Palpitation of the Heart; Whomping Cough,
Fickling or rising sensation in the Throat, Bronchitis, Asthma or weakness of the Nervous System, or impaired Consituation from any cause,
and to prevent persons from failing into a
decline, this medicine has not its equal.
And when too much calomel or 'quinine has been
used this medicine will prevent its evil effects on the
Celward Hanson, Engineer at Mr. Pettit's
Factor, corner of Ninth and Wallace Streets, Spring
Garden. More substantial evidence of the wonderful
curative properties of Dr. Swayne's Compound Syrup
of Wild Cherry.
Philadelphia, April 15, 1830.
Dr. Swayne.—Dear Sir—Being severtly afflicted

can be effectually cured by DR. HOOFLAND'S CELEBRATED GERMAN BITters, prepared by Dr C. M. Jackson, at the Ger-man Medicine Store, No. 120 Arch Street, Philadelphia. Their power over the above diseases is not excelled, if equalled, by any other preparation in the U. States, as the cures aftest, in many cases after skillful physicians had failed.

Those Bitters are worthy the attention of invalds.

digestive organs, they are, withol, safe, certain and pleasant.

READ AND BE CONVINCED.—The Hon. Chades D. Hineline, Editor of the Camdem Democrat, the best paper in West Jersey, says, July 21:—"Hoodand's German flitters.—We have seen many flattering notices of this medicine, and the source from which they came, induced us to make inquiry acspecting its merits, arom inquiry we were persuaded to use it, and must say we found it specifie in its action upon discases of the liver and digestive organs, and the powerful influence it exerts upon nervous prostration is really surprising. It calms and strengthens the nerves, bruging them into a state of repose, making sleep refressing.

"If this medicine were more generally used, we are satisfied there would be less sickness, as from this to-mach, liver and nervous system, the great majorty of

would advise our friends who are at all indisposed to give a trial—it will then recommend itself. It should, in fact, be in every family. No other medicintean produce such evidences of merit."

[From the Boston Bee.]

The editor said. Dec. 224—'Dr. Hooffand's felebrated German Bitters, for the cure of liver complint, jaundice, dyspepsia, chronic or nervous debility, is deservedly one of the most popular medicines of the day. These Bitters have been used by thousand, and a friend at our elbow says he has bimself received an

constitutions with any times thirtys advantageous to their health, as we know from experience the squary effect they have upen weak systems."

Ludge M. M. Noah, a gentlegian with great sentific and literary attainments, said in his hew fork Reckly Messenger. January 6, 1850:—Dr. Hordhol's German Bitters.—Here is a preparation which the Weekly Messenger. January 6, 1850:—Dr. Hockhol's German Batters.—Here is a preparation which the leading presses in the Union appear to be unanthous in recommending, and the reason is obvious. It is made after a prescription furnished by the lat Dr. Christopher Withelm Hoodand, Professor of the University of Jena, Private Physician to the King of Prussia, and one of the greatest medical writersfermany has ever produced. He was emphatically the enemy of Aumberg, and therefore a medicine of which he was the inventor and endorser may be confidulty relied on. He specially recommended it in liver omplaint, dyspepsia, debility, vertigo, acidity of thesionach, constipation, and all complaints arising from a disorded condition of the stomach, the liver and the intestincs. Nine Philadelphia papers express heir convictions of its excellence, and several of the editorappeak of its effects from their own individual aperience. Under these circumstances, we feel waranted, not only in calling the attention of our readis to the present proprietor's (Dr. C. M. Juckson's) breparation, but in recommending the article to all alici-

MOFFATS

Life Pills and Phonix Bitters. These Medicines have now been before the public for a period of FIFTEEN YEARS, and during that time have maintained a high character in almost every part of the globe for their extern ordinary and immediate power of restoring perfect health to persons suffering under nearly every kind of disease to which the human frame is liable. IN MANY THOUSANDS

of certificated instances, they have even rescued sufferers from the very verge of an untimely grave, after all the deceptive nestrums of the day had utterly failed; and to many thousands they have permanently secured that uniform enjoyment of health, without which life itself is but a partial blassing. So great, indeed, his their ment of health without which me a partial blessing. So great, indeed, has their a partial blessing and infallibly proved, that it efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were acquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It was to their manifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor, that they were indebted for their name.

Unlike the host of pernicious quackeries which bast of venetable ingredients, the LIFE MEDI-

Unlike the host of pernicious quackeries which boast of vegetable ingredients, the LIFE MEDICINES are purely and solely vegetable; and contain neither Mercury, nor Antimony, nor Arsenic, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, are allogether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious ever before administered in so happily efficacious

combination.
The first operation is to loosen from the coats ch and bowels the various impurities and crudities constantly settling round them and to remove the hardened faces which collect m the convolutions of the small intestines. Other medicines only partially cleanes these, and leave such collected masses behind to produce habitual such concered masses bening to produce nabitual Costiveness, with all its train of evils, or sudden Diarrhoa with its imminent dangers. This fact is well-known to all regular anatomists who exis well-known to all regular anatomism who ex-amine the human bowels after death; and hence the prejudice of these well-informed men against the quack medicines of the age. The second effect of the **VEGETABLE INFE** MEDI-

CINES is to cleanse the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. Tha blood, which takes its red color from the agency blood, which takes its red color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them; and nourished by food coming from a clean stomach, courses freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infallible.

DYSPEPSIA, by thoroughly cleansing the DYSPEPSIA, by thoroughly cleansing the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and acrid kind; Flatulency, Loss of Affertie, Heart-Burn, Headache, Restlessness, Ill-Temper, Annert, Languor, and Melancholt, which are the general symptoms of Dyspepsia, will vanish, as a natural consequence of its cure, Costiveness, by cleansing the whole length of the intestines with a solvent process, and without violence; all violent purges leave the without violence; all violent purges leave the lowels costive within two days. Diarrhæa and Cholera,, by removing the

sharp acrid fluids by which these companies are occasioned, and by promoting the lubricative secretion of the mucous membrane

Fevers or all kinds, by restoring the blood to a regular circulation, through the process of perspiration in such cases, and the thorough solution of all intestinal obstruction in others. The Life Medicines have been known to ure Rheumatism permanently in three weeks, and Gout in half that time, by removing local uflamination from the murcles and ligaments of

Dropsies of all kinds, by freeing and strength ening the kidneys and bladder: they operate most delightfully on these important organs, and hence worst cases of Gravel.

Also Worms, by dishedging from the turnings of the bowels the slimy matter to which these

Asthma and Consumption, by relieving the air-vessels of the lungs from the mucous which, if not even slight colds will occasion, and which, if not removed, becomes hardened, and produces these theory values, we investigate Sores, by the perfect parity which these LIFE MEDICINES give to the blood, and all the humors. Scorbutic Eruptions and Bad Complexions, by their alterative effect upon the fluids that feed the skin, and the morbid state of which occasions all emptive complaints, sallow, cloudy, and other liengrecable complexions. The use of these Pills for a very short time

will effect an entire cure of Salt Rheum, and a striking improvement in the clearness of the skin. Common Colds and Influenza will always be cured by one dose, or by two even in the wors PILES. As a remedy for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic mEDICINES deserve a distinct and emphatic recommendation. It is well-known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afflicted with this compaint for upwards of THERTY-FIVE YEARS; and that he tried in vain every remedy prescribed within the whole compass of the Materia Medica. He however at length tried the Medicine which

is now offered to the public, and he was cured in a very short time, after his recovery had been proiced not only improbable, but absolutely impossible, by any human means. FEVER AND AGUE. For this scourge of the western country these Medicines will be found a safe, speedy, and certain remedy. Other medicines leave the system subject to a return of the disease—a cure by

medicines is permanent—TRY THEM, BE SATISFIED, AND BE CURED. Bilious Fevers and Liver Complaints.
General Debility, Loss of Affette, and
Diseases of Fenales—these medicines have been
used with the most beneficial results in cases of this description: -King's Evil and Schorela, in its worst forms, yields to the mild yet powerful action of these remarkable Medicines. Night Sweats, Neavous Debility, Neavous Com-PLAINTS of all kinds, Palritation of the HEART, PAINTER'S Colic, are speedily cured.

MERCURIAL DISEASES. remons whose constitutions have become im-aired by the injudicious use of Makcony, will find these Medicines a perfect cure, as they never fail to eradicate from the system all the effects of Mercury infinitely sooner than the most powerful preparations of Sursaparilla. A single trial will place them beyond the reach of competition, in the estimation of every patient.

BE CAREFUL OF COUNTERFEITS. Several have lately been discovered, and their nefarious authors arrested, both in the city of New Buy of no one who is not an AUTHORISED Prepared and sold by Dr. W. B. MOFFAT 336 Broadway, New York. FOR SALE BY

[Fatract from the London Medical Journal.]

AC. J. B. Williams, M. D., F. R. S., Professor of Medicine in University College, London, Consulting Physician to the Hospital for Consumption, &c., says: I have prescribed the Util in above four hundred cases of tuburculous disease of the Lings, in different stages, which have been under my care the last two years and a haif. In the large number of cases, 206 out of 234, its use was followed by marked and uncquivocal improvement, varying in degree in different cases, from a temporary retardation of the progress of the disease, and a mitigation of distressing symptoms, up to a more or less complete restoration to apparent licalth.

"The effect of Cod-Liver Oil in nost of these cases was very remarkable. Even in a few days the cough was mitigated, the expectoration durinished in quantity and opacity, the night sweats cased, the pulse become slower, and of hetter volumy and the appetite, flesh and strength were gradually finjorved.

"In conclusion, I repeat that the pure fresh oil from the Liver of the Cod is more beneficial in the treatment of Polmonary Consumption than any agent, medicinal, dictic or regimenal, that has yet been employed."

As we have made arrangements to procure the Cod Liver Oil, fresh from bead quartors, it can now be had chemically pure by the single buttle, or in boxes

The old apple tree, where in childhood I played, Round the chair of my grandetre, that fat in its shade; Oh, the loved once that once sat beneats it are gone, And the old apple-tree is deserted and lone. But dear to my heart is the old apple free.
Its blossoms still nourish the nurmuring bee.
The red-breast still rustles its branches among.
And the lark from its top pours his orison song. The grass is still green on the turf, underneath,
The sweet-brief distills there its odorous breath.
The rose and the eglantine still are as fair.
And assweet as in childhood's bleat season they were Oh, mog may that tree in its verdure be seen,
And long may the turf underneath tible green.
The birds there sing sweetly, and flowers blossom fair,
For the loved ones of childhood are slumbering there.

THE OLD APPLE TREB.

By Charles H. Lewis.

The Farmer.

There is no more danger of injury to the norse than to ourselves by eating a hearty meal when warm. And who ever heard of a man killing himself with a hearty dinner, occause he ate it when he was fatigued or heated! It is hard driving immediately after eating grain that kills the horse. Not an instance can be shown in which he has sustained injury from eating grain merely because he was warm. We have known men, prudent in most matters, yet guilty of stuffing their horses with grain in the morning just before starting on a journey! How absurd to let your horse stand for hours, after a violent exercise, to chop up his own fodder and attempt to appease his hunger on hay. Give the horse half a bushel of oats or one peck of corn-if he has been used to grain—as soon as you lead him into the stable, and he will fill himself in an hour or two, and be willing to lie down and enjoy a nap, even before you retire to rest yourself. In any part of the country, if you see the grain into the manger you may be pretty sure the hostler has not forgotten his duty. Watering .- If you ride moderately, you ought to let your horse drink at any time on .

the way; but if he has been long without water, and is hot, a load of cold water, greedily swallowed, will chill and deaden the tone of the stomach; but two or three swallows are really necessary to cool his mouth, and may be allowed him at any time. Heaves .- Mix ashes in his food, and lime-

water for his drink. Prevent Botts by cleanliness, and giving salt, often and regularly; and, occasionally, few potatoes.

When your animal has fever, nature would dictate that all stimulating articles of diet or nedicine should be avoided. Bleeding may be necessary to reduce the force of the circulation-purging, to remove irritating substances from the bowels-moist light, and easily digested food, that his weakened digestion may not be oppressed-cool drinks to allay his thirst, and, to some extent, compensate for diminished secretions-rest and quiet, to prevent, undue excitement in his system—but nothing to be done without a reason. We might sum all in one general direction :- Treat your brutes like men. Cuts should be cleaned, laid smooth in the

natural position, and allowed time to cure. Sores, when large, should be protected from the air and external irritation. Bruises and Sprains should be kept quiet, or inflammation will chaue: endeavor io re-

duce the heat, if more than natural, and avoid the certain "curd-alls." Colic.-The horse rolls and is in pain. Administer a table-spoonful of strong muswater. Wrap the neck of the bottle with

twine to prevent its breaking. If inflammation is suspected, breathe a vein. A Damp Stable produces more evils than a damp house; it is there we expect to find horses with bad eyes, coughs, greasy heels, sweeled legs, mange, and a long, rough, dry, staring coat, which no grooming can cure. Lock-Jaw.-Throw wo or three hogs-

heads of water on the spine. The skin becomes loose, then wrap in blankets-feed with gruel and nourishing diet. Botts are said to be buried too deep in the mucous coat of the stomach, for any medicine that can be safely administered, to affect them. Symptoms .- The horse hangs his head, is drowsy, and bites himself. Try a. mixture of molasses and warm fresh milk. and rub externally with spirits of turpentine; all of which may loose the botts-then work them off with a large dose or two of oil. Lampas (the roof) sometimes grow level

Touch with a lancet gently, and allow to bleed freely, instead of the usual painful cure of burning." Ring Bones .- Blister of oil of turpentine one ounce, to which add, slowly, vitriolic acid, two and a half drachms, lard four ounces, powdered spanish flies one ounce

with the front teeth, and impede the feeding.

and a half. Mix.

THE RAVAGES OF INSECTS. Such insects as the Hessian and wheat flies, curculies, weevils, army and boll worms annually destroy crops to the amount of wenty millions of dollars . If a pirate on the high seas, or an Indian savage on land, injures the property of a citizen to the amount of a few dollars, millions are expended, if need be, to punish the offender. This is right. But when public enemies of a different name, do a thousand times more injury to a whole country, are its citizens under: any necessary restraint which forbids their making a common effort to protect their property against insect devastators. Parasitic plants, such as rust on wheat, and many fungi, as well as injurious insects, are on the increase. To attempt to explain the reasons why this is so, would lead at once into questions in animal and vegetable physiology, out of place in this brief synopsis of such rural topics as are believed to be of general interest. It may not be amiss to remark, however, that many boys are, apparently, educated to kill small birds that subsist mostly on insects, as soon as these youngsters are large enough to shoulder a gun. Government can do much to check the ravages of insects, by collecting and diffusing useful information as to their habits,
