Now Received from all Quarters of the Gobe.

Dr. J. H. Ellison, Frankfort, Ky., 2039.—I was induced, from a failure of the most potent expectorants recommended in our Materia Medica, in some cases of Diaessed Lungs, to try your preparation of Wild Cherry. It is sufficient to say that I was so much pleased with the result of that and subsequent trials, that I now prescribe it in preference to all other remedies. I have been engaged in active practice of twelve years, and this is the first Patent Medicine I were thought enough of to entress an onlinion in SWAYNE'S CELEBRATED VERMIFUGE, "A soft and effictual remedy for Worms, Dyspepsioleta Morbus, sickly or Dyspeptic children o

adults, and the most useful Family Medicine ever of

Andersontown, Indiana. Andersontown, Indiana.

Dr. Swayne—Dear Sir:—A man purchased a bottle of your Vermifuge, the other day, for his child; and by its use, discharged sixty-three of the la gest worms he had ever seen. It is somewhat difficult to get the people to try it, as they have so often been guiled by nauseous and worthless worm medicines. Yours he hauseous and worthless worm medicines. Yours being so pleasant to the taste, at the same time effectual, I shall be able to dispose of a large quantity.

Respectfully yours,

TOWNSEND T. SHARF F. M.

Beware of Mistakes! All Remember Dr. wayne's Vermifuge is now pur up in square bottles.

Bee that the name is spelt correctly. SWAYNE. Dr. Swayne's Sugar Coated Sarsaparilla and Extract of Tar Pills. We have tried the various Pills, which have been so highly lauded through the public press, but they are none which give such general satisfaction as D Swayne's Sugar Coated Sarsaparilla and Tar P. lls. the Alimentary Canal, acting as a gentle cathacti alterative medicine, and are very valuable in con-plaints incident to females.

GAS FROM WATER.

Mr. Paine thrown in the shade: - This great lesideraturn has been found at last, though the means by which the gas is obtained from ple in its construction, requiring only, the attendance of two men, who, in seven hours, can turn off sufficient gas for twenty-four

near as we could ascertain, the process by which the gas is produced: The water used in its manufacture is discharged from a can, in limited quantities. into a pipe passing through a retort kent constantly supplied with iron and charcoal, the intense heat from which converts the water, in its passage through the pipe, into steam. The steam thus formed is amalgamated with liquid rosin, of which there is always a large supply kept in a boiler placed immediately over the retort, so that the gas is obtainsimply from the combination of steam generated in the manner described, and the liquid rosin. The volatile oil produced during the manufacturing process is discharged through a separate pipe into receiving yessels. This oil is disposed of at lalf a dollar per bartel. The expense of charcoal and iron consumed, is very slight, and the amount of rosin reuired is about a barrel and a half.

The apparatus was put up by the Union Gas Light Company, which has its head quarters in Jersey City. The stock of this company has been taken up and the present capital is about \$500,000. The President is Mr. George M. Giddings. The whole of Jersey City, it appears, is to be lighted up with this gas, and the company has alread entered into contracts for lighting several hotels in the different cities of the Union .-New York Evening Post.
