"There are about five millions tons of

our paper was going to press:

"Authracite and Bituminous Coal mined within the limits of this Commonwealth. Probably about three-tourths of this amount is consumed by citizens of other States .-In a revenue point of view, but little advantage arises to the Commonwealth from the transportation of this Coal to market, as but a small portion of it is conveyed on "the State improvements."

"I would respectfully suggest the propriety of assessing a tax, not exceeding
ten cents per ton, on Coal at the mouth of the pit, to be applied to the sinking fund
for the liquidation of the State debt.

Respectfully Yours, &c., J. H.

In addition to the above we would also suggest the propriety of legging 5 cents on each bushel of wheat, com, &c., to be appropriated to liquidating the State Debt. A considerable quantity is consumed out of the State, and does not pass over the public works. This proposition is about as reasonable as the above. Coal land is aiready assessed to its full value, and taxed for State purposes-and to tax the products of Cosl lands only, and not of farming lands, would be a gréat outrage.
