CARDING CATTLE.

We have no doubt it is a good practice to card neat cattle daily. The hair need not 5000 PAIR OF BOOTS & SHOES. JUST HECEIVED AND FOR SALE by the subscriber, wholesale & retail, Boots at \$1.50 per pair, at his Old Es. Buots at \$1.50 per pair, at his Old Es. Pottaville, where he has also for sale a general assori-ment of Saddlery, Trunks, &c., at equally how prices. R. D. SCHOENER. be carded off, and it will not come off, easily at this time of year .- But the skin needs rubbing, and cattle that are extremely food of heing rubbed in places which cannot be reached by a rubbing-post.

R. D. SCHOENER. Then we must consider the effect produced on the disposition of animals that are often approached and handled kindly. Heiters will not be likely to make such gentle cows, and of course good milkers, if they have not often been approached and handled and coaxed before they bring their first calf. How can they be expected to stand quietly to be milked, if their teats have never been approached by anything but bushes and briars ?

And your steers-how are they to be first caught and brought under the voke ? Will you whip them in after a chase, as you will a fox or a hare with dogs and a war cry ?-No, for shame ! Put on the card instead of the whip, and cry cobos. instead of scolding and swearing. 🥒

SOWING CLOVER SEED.

'Sow clover seed on your 'wheat fields, at the rate of twelve pounds per acre. It is a good plan to sow it on the snow. If not sown this month, we would wait until the frost is out of the ground, when we would lightly harrow and roll it in. The harrowing will effectually bury the seed while the harrowing and rolling will jointly benefit the wheat first, by acting as a cultivator to the wheat plants, will destroy weeds, while the latter will restore any plants, throw out, consolidate the earth and otherwise benefit the crop of wheat.
