PIPSIN AND RENET. PIPSIN AND RENET. Pepsin is the chief element, or great Digesting prin-ciple of the Gaatric Julee, it is found in great aban-dance in the solid parts of the human stomach after death, and sometimes causes the stomach 'to digest itself, or eat itself up. It is also found in the stomach of animals, as the ox, call, &c. It is the material used of animals, as the ox, call, &c. It is the material used of which has long been the special wonder of the dairy. The curding of milk is the first process of di-gestion. Rennet possesses astonishing power. The stomach of a call will curdle nearly one thousand inwes its own weight of milk. Baron Liebic, states that "One part of Pepsin dissolved in sixy thousand parts of water, will digest meat and other food."— Diseased stomachs produce no good Gastie Julee. Renet or Pepsin. To show that his want may be per-fectly supplied, we show the following.
